

## ROYAL YEAST CAKES

As a health builder, Royal Yeast is gaining in popularity every day. It is a food—not a medicine. It supplies the vitamins which the diet may lack. Royal Yeast is highly beneficial in cases where the system seems "run down". Royal Yeast is the richest known source of vitamins, and when taken into the system acts as a corrective agent. Royal Yeast Cakes are recommended for their purity and wholesomeness. It is the purest, the most convenient and economical yeast on the market.

Two to four Royal Yeast Cakes a day will work wonders. A full day's supply can easily be prepared at one time by using one glass lukewarm water and teaspoon sugar to each yeast cake. Allow to stand over night in moderately warm room. In the morning stir well and pour off liquid. Place in refrigerator or other cool place and drink at intervals as desired through the day.

### Serious Charge.

AGAINST U.S. STEAMER MASTER.

BOSTON, Oct. 12.—Charges of having abandoned a vessel in distress at sea, preferred against Capt. W. E. Rosamond, of the Shipping Board Steamer Nocatula, by three members of the steamer crew were investigated by steamboat inspectors yesterday. The inspectors told the inspectors that on the night of October first, the ship, bound from Glasgow to Boston with coal, failed to investigate the condition of a barkentine, that was sending up flames, in a position about four hundred miles southeast of St. John's Newfoundland.

A gale was blowing at the time. Capt. Rosamond, one of the complainants, said that a member of the watch had sighted the flames and notified the captain. The steamer's course was changed, and she made for the barkentine, circling the craft several times. On her approach some one aboard fired three shots and members of her crew shouted to the steamer.

The inspectors said that they would question Captain Rosamond before taking action.

### Positively None Better.

### Religious Exercise.

(From an Exchange.)

Two shipwrecked sailors were on a desert island. They were utterly miserable, pinched with hunger and cold. The one more wretched than the other said to his companion: "Can you pray, Bill?"

"No."

"Can you sing a hymn?"

"No."

"Well," said the first, "let's have something religious; let's have a collection."

### Bouts in London.

LONDON, Oct. 12.—Joe Beckett, the British heavy-weight, scored a technical knockout over Frank Moran, the American heavy-weight, when the referee stopped their bout in the seventh round at the Albert Hall, here to-night.

In the fourth round Moran put Beckett down for a count of five and he repeated it in the sixth round, when Beckett stayed on the floor for seven, but the Englishman came back strong on both occasions. Previously Beckett landed a heavy punch in the pit of the stomach, for which he was cautioned, and eventually was forced to stop the bout. Moran being punished so badly that he could not continue. The bout was scheduled to go twenty rounds.

Jack Bloomfield, the British light-heavyweight champion, stopped Bombardier Wells, in the sixth round. Soldier Jones, the heavy-weight champion of Canada, won from Englishman Arthur Townley. The referee stopped the bout in the third round, owing to an injury to one of Townley's legs.

### Sending Capital Away.

(N.F. TRADE REVIEW.)

A travelling solicitor for funds to complete the erection of the new "Mount Royal Hotel" in Montreal, was in town this week raising the last 1000 required to equip the hotel. It may be interesting to our people who have been talking of a large hotel for St. John's to state the fact, that this gentleman had no difficulty in raising all the capital he needed and selling the shares as easily as the proverbial pig of "falling off a log." This follows, of course, mainly from the fact that the proposition from a financial viewpoint is a most attractive one and will pay a certain and absolute eight per cent, with a profitable fat bonus on stock earnings, and offers attractions, that even the most careful investor would not care to let go by.

The point that we wish to make, however, is this: a big hotel to accommodate over 1,000 guests is a good thing for a Montreal medium in bringing in a flow of money from tourists, certainly a hotel proportionate to our own city—say one with 200 rooms, should bring to us some of the good financial results that the Montreal people anticipate—especially in tourist traffic.

We find our people are quite ready to put up money for a hotel in Quebec Province, but that they get "cold feet" when a scheme such as that is projected for St. John's, even though the local outlook for big dividends is equally as good.

It is a sad commentary on our patriotism and business intelligence that such is the case. Tourist traffic from over the border is making the Canadian cities rich and prosperous. Some people think that "booze facilities" bring tourists into Canada in hundreds of thousands in the summer months. That is a mistake. The Financial Post of Toronto of September 29th, says that of the 617,000 motor cars that crossed the border from the United States into Canada this year, 537,000 registered in Ontario, which has prohibition and 43,000 registered in Quebec, and 28,000 in British Columbia, both of which are wet provinces. American tourists, says the Post, are attracted by good roads and for natural scenery.

There is a lesson for Newfoundland in this. We have the scenery; we are gradually acquiring good roads, but we have not what is most essential of all—A GOOD MODERN HOTEL.

### By Air to the Pole.

PLANS FOR 700-MILE AIRSHIP VOYAGE.

Captain Charles Frohner, who served with the R.A.F. during the war, is now in London in connection with the proposal for a flight to the North Pole by airship. The expedition is being held up for want of funds, and \$20,000 is required to enable the scheme to materialize.

The flight is to commence from London, with stops at Aberdeen, Christchurch, North Cape, Bear Island, and Spitzbergen, where the airship will be tested preliminary for a final dash of 700 miles to the Pole.

On the last stage of the journey, the airship, which will carry a crew of ten, is not expected to attain a high speed than fifty miles an hour. She will have powerful wireless apparatus with which it is hoped to be in constant communication with two wireless stations nearest the Pole.

It is not expected there will be any difficulty in effecting a landing if the Pole is reached.

## A RUPERT HUGHES STORY

WITH ALL HIS HOMELY HUMANESS MAKING MERRIMENT.

# At the NICKEL To-day

## GOLDWIN presents

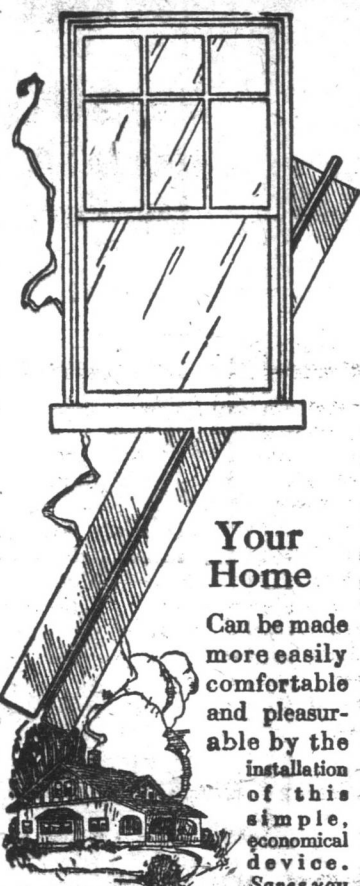

# COME ON OVER

The greatest story from the pen of Rupert Hughes since "THE OLD NEST." A combination of the infectious humour of "Scratch My Back" and the heart tugs of "The Old Nest." She was sorry she'd ever "put her foot on the ocean" until she struck the solid ground of understanding. A truly wonderful story with an excellent cast, including beautiful Colleen Moore.

### Labrador Herring.

(Hr. Grace Standard.)

During the fall, herring in considerable quantities were to be caught at Spang Harbor and vicinity. The fish were of a large size and excellent in quality, and a few barrels that were brought home show that no fault could be found with them. The fishermen unfortunately were not provided with the means of packing what would have been a useful addition to the profit of their labors. Years ago Spang Harbor was one of the chief centres of the herring fishery, and cargoes were sent to Montreal and other markets every fall, the fishery proving a valuable one to the fishermen and the exporters. At present there is not a ready market for this highly edible fish, as the South and West Coast fisheries more than supply the demand. The Labrador herring is in a class by itself, and were the fish caught and marketed they probably would find a market that at present is non-existent.

THE PUBLIC LIBRARY.

Upon the shelves the good books stand, unblemished by a reader's hand; the gilt is fresh upon their backs, the covers show no signs of wear. The books are stored in wisdom, small appeal to readers bored by anything in print whose drift is to instruct or to uplift. The quietly done who is in charge remarks to me, "Our stock is large of volumes stuffed with useful lore; we have nine tons, or maybe more. Our shelves are loaded to the guards with works of sacred and of birds, so choose a book to suit your need, and take it home with you and read."

"I'm looking for a book," I say, "a noble work by Bertha Clay, wherein a serving maid named Luke is married to a belted duke; that noble's jealous aunts now rush to put cold poison in her mouth; plot follows plot till readers quail—this is an outline of the tale, and I'll be glad as glad can be, if you can find this book for me."

"Ah, woe is me," exclaims the dame, "you modern birds are all the same. I thought when I beheld you here, your face so thoughtful and austere, that from the shelf you'd promptly jerk a helpful and uplifting work. But no one wants those noble tomes; you reach for bunk like 'Sherlock Holmes!'"

## Pies and Pastry!

The digestibility of Pies has been called into question but, when properly made, pies are as easily digested as anything else.

Until quite recently it has been taken for granted by the majority of people that it was impossible to make good pastry out of Manitoba wheat without using a large amount of shortening—the proper kind of which is very expensive.

They have thought it necessary to keep two kinds of flour—one for Bread and the other for Pastry. This idea is erroneous.

"Windsor Patent" Flour (which is acknowledged all the world over as Canada's best) makes the most delicious pastry when the same amount of shortening is used as with ordinary pastry flour.

JUST TRY IT AND BE CONVINCED!

### Does Your Roof Leak?

If your roof is in good condition, coat it now with Special Roof Coating Tar and keep it good. You know it is easier to keep a good roof free from leaks than to make a leaky roof water-tight. Prevention is always better than cure. Special Roof Coating will prevent your roof from leaking and will keep it water-tight for the next few years. A 5-gallon can costs \$3.50.

If your roof leaks, fill up the cracks with Lasty-gum; put it on like putty, it won't crack like cement and won't run like tar. Lasty-gum will stop even the worst kind of leaks. Use it around chimneys and skylights. Use it around window boxes to exclude wind, dust and rain. A 5-pound pail of Lasty-gum costs \$1.50. After stopping the leaks with Lasty-gum, coat the entire roof with Special Roof Coating.

If you require a new roof covering we recommend VULCANITE ROOFING, which is made and guaranteed by The Beaver Board Company. Vulcanite Roofing can be had in full size rolls to cover 100 square feet of roof surface at \$5.00 per roll, complete with nails and cement; also in half rolls (18 inches wide) at \$2.70 per roll, complete with nails and cement. A half size roll will cover a porch or bay window roof.

We guarantee the good qualities of Special Roof Coating, Lasty-gum and the best of its kind, warranted to give you satisfaction. When you buy Beaver Board take care to look for the BEAVER BOARD BRAND on the back of each board. If it isn't there you are being cheated.
