The Wall of China

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress. ×

The business man who maintains a wall of "dignified reserve" towards the buying public is just as surely retarding his own business growth.

People like to buy from the store that shows its appreciation of their business, gives good value, and courteous, kindly service. with a "come again" invitation. *

Your advertisement in "The Guide-Advocate" would be a standing invitation to your store. When our readers open up their paper do they see your "bid"?

PROMPT ATTENT ON

GOOD WORK

Cobourg, Ontario.

The hope of the future of Cana-dian apriculture lies, in a very large measure, in the fact that our farmers as a class are readers of articles

Relieved by Taking Lydia. bulletins and reports dealing with matters perfaming bothe stience and practice outs farming. Furthermare, E. Pinkham's Vegetable P. we venture to say they are for the Cobourg. Ontario .- "For many years

most part readers with open minds, Cobourg, Ontario.—"For many years I have had troubles with my nerves and have been in a general run-down condition for some time. I could not do my work half the time because of trouble every month. I was told of Lydla E. Pinkham's begetable Compound by triends and advised to try it. It has done me good and I strongly recommend it. Since I have taken it I have been able to do all my own work and I also know friends who have found it good. You can the these facts as a testimonial —Mass ELUXE FLATTERS Box "for, Cobourg, Ontario. anxious to learn and, as far as circomstances permit, to put into prac-Sound: teaching: A These statements may appear to some as decidedly optimistic but that they are not extravagant nor wide of the mark is the opinion of one who for more than thirty years has had an excelent opportunity of learning at first hand, the thought and aspirations of he Canadian Farmer.

If statistics could be obtained, it would most probably be found that astrogards the volume of its agricultural literature in active circulation, Canada consulering her farming population, stands whead of all countries. And there would not be this large output if there were not a de-mand for it. If such be the case we may conclude that apart from econ omic considerations, our prospects for progress, for more efficient and more profibable farming are good; The purpose of these few paragraphs is to stimulate and encourage the reading habit and particularly the reading by the young men and young women on the farm of matters pertaining to the chemistry of agriculture. The facts that chemistry reveal bear directly on foundation problems, such as the maintenance and increase of soil fertility, the economic production of larger yields of farm cross, the futuritive value of forage pionts and forthing shifts, the nature and disc of the piones and fer-tilizers etc., etc. There is addredy a question in connection with soils, rops and stocks that chemistry does not think some time apon. The more one reads the more one is impressed with the fact that Chemistry offers most valuable information on practi-cally eserv pluse of farming and that bits information may be made use of in a very direct way by the man on the land to his profit and ad

vantage. Our plan therefore is for more eading, careful, thoughtful reading. Acquire the habit of devoting fifteen minutes a day to the bulletins and tions and the more educational artpress. This material, in which this

THE ORIGIN OF JAZZ MUSIC

An explanation of the origin of jazz comes from John Philip Sousa, who says that when the efforts of the performers of the travelling minstrel show failed to convulse the audience, they resorted to a kind of musical amboree, or the extravagant taking of the instruments known as Jazzbo, in the slang of the burnt cork. Thus the word orignated. The Jaza orches tra now consists of traps (the main solo performer) trombones, saxo phones, trumpets, clarinets, violing piano, banjo, mandolin, all intento as one observer says, upon a musical joy ride. Jazz is a kind of ragime with its interminable, syncopations plus all meaner of peculiar sounds some of which can only be described as noises since they have no regula vibrations. James Francis Cooke editor of Etude, a musical authority who is widely recognized, says that the monotonous frequency of the syncovation robs jazz of any claim for recognition as a basic element for real artistic musical work. "Jazz and the dances of to-day are Siamese twins," he says, "Kill one and you cripple the other." The probability that this is true is indicated by the fact that it is impossible to magine an audience sitting placidly through a whole concert of jazz. The impulse is to get up and shimmy. All its origins come from the various dances, says Mr. Cooke. It is an attempt to combine in one piece the tom-tom incantations of the Congo the whine of the Orient. the squeak of the Chinese pipes, the sensuous purr of Iberia, the intoxicating syncopations of the gypsy, the plectral pep of the negro's banjo, tha skirl of the Highlander's pipes, the Irish breakdown and the hilarious dances of the American western frontiers' or the Canadian logging camps. This mongrel origin of jazz would seem to decide finally against it ever being developed into national

and distinctive, music like the music of Germany, of Italy, or of Scotland. On the other hand the general testi mony is that the public cannot ge enough of it, which suggests to some critics the certainty that it possesses human elements which master composers may employ in their works ir the future.

Muscular Rheumatism Subdued .-When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Eclectric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a PAGE SEVEN: SALT
