voted in favour of an appointment made in
ance of the leading principles of Responsible
Government. It is further stated and on good au-
thority, that if Mr. Read does not resign a vote
of want of confidence will be avowed, and will
probably be carried; and yet the majority refuse
to acknowledge the existence of principles which
they are thus practising to the full extent.—
This is all very fine, no doubt, but we must con-
fess that we do not exactly see at what honorable
members are driving. Yesterday we are infor-
med that the appointed day, beyond which the
House would not wait for Mr. Read's resigna-
tion and the Governor's movements. We can
scarcely imagine that His Excellency will yield
the point now, and that being the case, Mr. Read
can hardly be expected to resign. There seems
to be a moderately fair chance of a general elec-
tion, and no small degree of confusion through-
out the Province. Let it come. Every man we hope
will be prepared "to do his duty."

The girls of Arichat, Cape Breton,
appreciate the married life: no less than 27
couple were united, there last month. We
imagine the Rev. Mr. Marauda, would have
no objections to repeat the ceremony every
month during the year, provided he received
a five dollar bill for each couple.

CURIOUS CALCULATION.—It has been as-
serted, that if all the dead from the creation
of the world to the present time, were to
arise; then would not be room for them to
stand on the surface of the whole Globe.—
This has been proved to be incorrect.—Al-
lowing 300,000,000 in every generation from
Adam to the present time, which is giving too
much) and 3 feet of space for each person
—there would be more space left than re-
quired.

A square mile of 1760 yards on its side,
gives 3,097,630 yards, which multiplied by 3;
the number of persons a superficial yard will
contain, produces 9,292,890. Then, an area
of ten miles square, will contain more than
the living population of the globe; if nine
hundred millions be the maximum,—viz.—
929,280,000. The whole number of gene-
rations of 33 years each, in 5343 years, is
177; then, 929,280,000 by 177, will pro-
duce 159,300,000,000. or, to those who
wish multiplication made easy, one hundred &
fifty nine billions, and three hundred millions.
A square area whose side is 121 miles, will
contain 159,473,749,890 human beings—
exceeding the number of dead and living by
173,740,890.
