Toronto Markets.

"CANADA FARMER" Office, Feb. 11, 1865.

The market is better supplied with grain and flour to-day than it has been for several days past, there is, however, very little activity. Advices from Europe do not inspire dealers with much hope of very high prices in the Spring. The block on the Grand Trunk Railway has caused a stagnation in the grain and flour markets, it being impossible to get cars to ship produce to Montreal except by two or three cars a day.

Flour—Not much offering; No. 1 superfine at \$3 80 to \$3 85 per bbl, extra, \$4 25, superior extra, \$4 60 to \$4 60, fancy, \$4. Fall Wheat scarce but higher, with a good demand, selling at 90c to 94c per bushel.

Spring Wheat more active at 75c to 86c per bushel. Barley better at 60c to 73c per bushel. Oats at 33c to 42c per bushel. Rye 60c per bushel.

Pease in good demand at 60c to 66c per bushel. Hay—Market well supplied at \$15 per ton.

Straw in good supply at \$11 per ton. Provisions—Butter—Fresh, wholesale, per lb, 14c to 17c; retail, per lb, 18c to 23c; in tubs, wholesale, per lb, 15c to 17c.

Eggs—Wholesale, per dozen, 14c to 15c, retail, per dozen, 19c to 25c.

Hams—Wholesale, per lb, 9c to 11c; retail, per lb, 10c to 12 1/2c.

Fitch Bacon—Wholesale, per lb, 8c to 9c; retail, per lb, 11c.

Cheese—Wholesale, per lb, 10 1/2c to 11 1/2c; retail, per lb, 13c to 15c.

COE'S SUPER-PHOSPHATE OF LIME

FOR

Potatoes, Turnips and Hops.

RICHMOND, C. E., Jan. 25, 1865.

DEAR SIR,—I used some of your Super-Phosphate last year, by way of experiment, upon part of a field of Potatoes. The ground had been previously dressed with barn yard manure ploughed in. Then a little Phosphate put in the hill at the time of planting. In the same field I tried Plaster in the same way, using a larger quantity, so as to equal the cost of the Phosphate; also on another portion of the same field I applied good farm yard manure in the hill. The result was, that the Potatoes where the Phosphate was used appeared the best through the season; were ripe two weeks the earliest, and gave a fine yield. I also tried it on Turnips. The land had been prepared like that of the Potatoes, then Phosphate applied in the drill with the seed. That portion where the Phosphate was used yielded, I think, double to the other, and the Turnips were all of good size and quality. I used about two barrels in all, and am so well pleased with its effects that I intend to use about two tons this year.

I am very respectfully yours,

GEORGE H PIERCE

MR. ANDREW COE, Montreal

BENR PLAIN, Stanstead Co., C. E., Jan. 29, 1865.

I used a small quantity of Coe's Super Phosphate on five rows of Turnips through the middle of a field. These rows were far superior to the rest of the field, and yielded, I think, more than double that of any other five rows of the field. I also tried it on a few hills of Hops, and the good effects were very distinctly to be seen through the season.

PERUVIAN GOVERNMENT GUANO.

THE undersigned have on hand a few tons of this most valuable Manure.

They can safely challenge any Manure, natural or artificial, to produce the marvellous results which the use of the Guano will positively ensure.

This manure will give life to the most worn-out soil, and is peculiarly adapted to the recovery of quantities lost by land which has been subjected to a successive course of exhausting crops.

The following table, made by R. Osborn, Esq., of Haverly, England, shows the relative profit from the application of different proportions of guano—

Table with 4 columns: Guano per acre, Grass per acre, Hay per acre, Increase per acre. Rows show results for 2 cwt, 4 cwt, and 8 cwt of guano.
