

nest boxes will be put up this spring and at the Experimental Farm 160, under the direction of the Club. The question of protecting birds, the economic value of certain common species and the proposal of the Club for the protection of the native birds around Ottawa were dealt with at one of the winter lectures by Dr. C. Gordon Hewitt, Dominion Entomologist. An abstract of this address was printed in the March number of THE OTTAWA NATURALIST.

THE OTTAWA NATURALIST.

Under the direction of the Publications' Committee, THE OTTAWA NATURALIST, the official organ of the Club, has appeared regularly during the year and Volume XXVII is now complete. Mr. Arthur Gibson has continued to edit it. The ten numbers issued (two of which were double numbers) comprise 180 pages, in addition to which 23 plates appeared. This large number of plates adds very much to the appearance of our journal, and, of course, increases its value very materially.
