British Forces En Route for Ismailia— Arabi Withdrawing from Kafrel-Dwar-Skirmishing at Ismailia—Gen. Macpherson's Arrival at Suez.

PORT SAID, Aug. 21 .- It is stated that all the Arab laborers have fled, and the ships traversing the Suez Canal must be coaled by

their own crews.
The transport "Catalonia" is aground in the canal, but does not stop traffic. Suzz, Aug. 21.—Gen. Macpherson, commander of the Indian contingent, and his

The Daily -News correspondent at Suez says:—"I have just returned from Shaluf where I witnessed the conclusion of the fight, in which 250 of our men, including the Highlanders, Bius Jackets and Marines, brilliantly defeated twice their number of the enemy. The fight lasted from 11 o'clock on Sunday morning until nearly 5 o'clock in the afternoon. The fire of the Highlanders was remarkable for coolness and steadiness. The Gatlings in the top of the gunboat worked with admirable precision, and did much execution among the enemy, who advanced to within a hundred yards of the bank of the canal. The success was all the more brilliant, owing to the extremely difficult nature of the country, which abounded with low ridges and undercourses. Lieut. Lang, of the Highlanders, gallantly crossed the Freshwater Canal in face of a hot fire and brought back a boat, thus enabling a company each of Highlanders and Marines to cross and take the enemy on the right flank. The enemy fought bravely. Their commander was killed.

His father is perfectly satisfied that Arabi will not interfere with the canal if the English do not make it a base of operations.

PARIS, Aug. 21.-In consequence of the intemperate protests of De Lessops, the French Government has sent him an official communication, inviting him to employ prudent circumspection in his language.

CONSTANTINOPLE, Aug. 21.—Said Pacha has abandoned the idea of re-convoking the conference. He promises Lord Dufferin that he will strongly urge the Sultan to accept the conditions of the military convention, which the British declare indispensable, the principal one of which is that Turkey shall not undertake any operation in Egypt without the assent of the British commander.

ARABI'S SENSE OF HONOR.

A romantic story, designed to illustrate at once the delicate sense of honor of Arabi Pacha and his hatred of the English, is pubdivision has been ordered to hold itself in lished in a Vienna newspaper. The story is readiness to pursue the enemy in the event of that last spring an English officer at Cairo insulted a lady, and, having refused to apologize, likewise refused to fight a duel to which he was challenged by a Hungarian nobleman, hour, and that he has an entrenched camp at Baron Atecel. Not long afterward, at a social entertainment, Arabi approached the Baron headquarters. The information comes from and thus expressed himself: "Although the Koran strictly forbids duels, yet if I had discovered that one of my officers had conducted himself in such a despicable and cowardly manner I would have commanded him to ISMALIA, Aug. 21.—During the shelling fight; and if he had then refused I would f Nefich, early on Sunday morning, several have shot him with my own hand." The trains with troops arrived from Zagazig, but story ends with the assertion that Arabi's Arabi, who accompanied them, did not like words were soon in everybody's mouth, and that during the first part of April to Englishman could appear on the street without hearing himself called a coward.

> When we reflect that a power of endurance can be imparted to the brain, and that weak mirds have been restored to strength by Fellows' Compound Syrup of Hypophosphites, we cannot but conclude that the subtle power is really ponderable matter. Persons who study hard should preserve their balance of power by using the Syrup.

A CONVENT FOR RICHMOND.

The enterrprising people of this thriving town are making every effort to induce the Nuns of the congregation to establish a Convent in their midst. The want of such an establishment for the education of the young ladies of Richmond is greatly felt by the residents of the place. We understand that a site has been selected and the land purchased for the new Convent. If the project can be carout, it will give great pleasure to the people

THE PROGRESS OF A COUCH. -The following may be indicated as the progress of a cough in the absence of an efficient check of the lung-destroying malady: First, a cold is con-tracted, the throat becomes inflamed and the irratation causes a spasmodic contraction and dilation of the lungs, accompanied with a dull or rattling sound in the throat. This daily increases in violence, and as it does, aggravates the bronchial irritation until the lungs become seriously affected. Then abscesses or incipient sores form upon their tissue, which rapidly develop into the fatal tubercles of consumption which est into and destroy the lungs. Who would knowingly incur such peril as this? The surest means of averting it is Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Sods, a pulmonic which at the same time checks the progress of throat and lung irritation, and gives strength to those debili-tated by a cough. Sold by all druggists.

ports covering the same period last year. From these figures it would appear that the trade of the city and of the Dominion is increasing in no mean ratio. In the wholesale markets firm prices are still a prominent feature even in cases where no special activity exists at present. The Western breadstuffs markets since our last have been subject to no extraordinary fluctuations. The news that war between Russia and England was imminent, caused a temporary firmness but the market at once re-acted as the report was premature and the receipts at Lake ports were large and the weather continued fine. The receipts of grain at Montreal from the opening of the year up to the 18th of the present month fell below the corresponding receipts of last year by a few thousand bush-

56,937 and rye 55,366. Uny Goods .- The number of fall orders received to far have in some instances been 25 per cent in excess of last year, and it is needless to sav that wholesule men are well pleased with the result, some chronic grumblers of course excepted. Travellers are mostly back from their first fall trip, and buyers are in town from the North-West and also from midland Canada. Fo complete shipments to the interior some of the large houses are compelled to work their staffs over hours. Winter stocks are about complete. Remittances now falling due are not numerous or large in amount but are well met.

A NEW ENTERPRISE.

Toronto, Aug. 17.—The Globe's special cable, dated Loodon, August 16th, says:—another Canadian enterprise has been launched upon the market here. To-day the Canadian Fresh Meat Importation Company issued a prospectus. The company has been formed for the purpose of placing cheap and wholesome meat at the command of all classes. It will import only first quality fresh meats of all kinds from Canada into the Kingdom. The capital stock of the company is £50,000 in shares of £1 each. The directors also draw attention in the prospectus to the well-known superiority of Canadian cattle over those imported from the United States. The company will be their own importers and sell direct to the consumer from its own depots. The average cost of meat delivered in England is 5d. per pound. A contract has already been made with a responsible party in Canada to supply the meat.
