

False Statements.

AWAY WITH THEM!

It is Only the Lever of Truth that Moves the Great World.

Statements Made in Favor of Paine's Celery Compound Always Ring With Honesty.

A Marvellous Cure in Virden, Manitoba.

A Minister of the Gospel Can Endorse the Testimony.

False statements, like counterfeit coin, for a time will pass current and undetected.

The false statements made in connection with a host of common medicines have duped people in the past, and at the present time there are many who are being deceived from day to day. These worthless and deceptive medicines, with all their false assertions about curing disease, are now being posted on the black list in all well-regulated communities, and are carefully avoided and abhorred by the wise and prudent.

It is only the powerful lever of truth that can move intelligent communities and peoples. This mighty lever is Paine's Celery Compound, an agent that has never had an equal in the history of medicine for the curing of the sick and deceased.

Every statement made in favor of Paine's Celery Compound, rings out with honesty and truth. The letters of testimony come from our own Canadian people, whom doubters may interview or write to for particulars.

Paine's Celery Compound has thousands of records of victories over rheumatism, sciatica, neuralgia, dyspepsia, nervousness, headaches, sleeplessness, kidney and liver troubles, general weakness and vitality.

The marvellous cure of Mr. James Leverington, of Virden, Man., by Paine's Celery Compound, after the failures of doctors and other agencies, should be sufficient proof for all fairminded men and women who are honestly seeking for health, strength and new life.

Mr. Leverington writes as follows about his success with the world's best medicine:—

"I think it my duty, without solicitation from any one, to write in the interests of other sufferers, and give you a testimonial in favor of your (to me) almost miraculous remedy, Paine's Celery Compound. For more than a year I was suffering from the agonizing pains of sciatica; and after trying all that medical skill could devise, and using many remedies, patent and otherwise, I concluded to try the Hot Springs of Banff, under the able superintendence of Dr. Brett. I took the treatment thoroughly and carefully for six weeks, and came home at the end of that time racked with pain and weighing 43 pounds less. At this juncture, when hope had almost fled, I heard of Paine's Celery Compound. It seemed suited to my case, and I sent to my druggist, Mr. J. W. Higginbotham, of this place, and asked about it. He recommended it to me, and I took a

bottle. I soon began to feel better and after taking a second bottle I was a cured man and threw away my crutches.

"I keep a bottle on hand in case of any return of the complaint. I am now 58 years old, and I feel as spry and healthy and free from pain as I ever did in my life. I was born in Norfolk, England, and came to Canada when only 3 years old. I was brought up in the township of Cornwall, Ontario, and came to Manitoba eight years ago. Have always been a farmer, and am as able to do hard work now as ever I was.

"With a heart full of gratitude for the benefits derived from the use of your remedy, and a wish to influence others who may suffer, I gladly and freely indite this letter.

"Rev. Mr. Talbot, Methodist Minister, Elkhorn, can confirm my statements, and will do so if written to."

Mr. Higginbotham, the successful and extremely popular druggist of Virden, vouches for Mr. Leverington's statements, as follows:—

"I have known Mr. Leverington for two years or more, and can confirm what he says in regard to his cure by Paine's Celery Compound. Ever since his cure he has been sounding its praises, and he is a perfect enthusiast on the subject of Paine's Celery Compound. I believe him to be thoroughly reliable."

WITH THE FARMER.

POINTS OF USEFUL INFORMATION CONCERNING THE INTERESTS OF THE FARM.

The clover crop of this year will be short of last year's by 25 per cent, excessive heat and drouth being responsible for the shortage following winter killing and spring frosts: damage by insects has also been against the crop.

Among the conclusions at the Canadian experimental farm is that of the feeding of vegetables, such as carrots, mangel wurzels, etc., in generous quantity, which is necessary to keep the hens in good condition and secure the most eggs.

Red polled cattle are gaining greatly in popularity, not only on account of their intrinsic worth, but because hornless cattle are growing in favor. As dairy animals they are more esteemed, but for beef there is no disparagement of them.

The Germans make the silo the catch-all for all green crops. Turnip tops, green corn, green mustard and clover are sometimes all dumped into one silo. That perhaps would be too economical for our way of doing business.

A creature's ability to assimilate food depends frequently upon the bowels. Constipation is often to blame for waste of food, and laxative feeds like bran and linseed meal are in such cases very helpful. It should not be forgotten that these foods and roots have a value beyond that of food constituents.

An exchange says a well-to-do farmer, who has by slow degrees learned the lesson of "how to make a farm pay," said: "We really never prospered until we learned to lived out of the garden and cellar instead of the grocery store." Good food in abundance and of great variety, grown on the farm, should be the first object of every farmer."

Not much in the food line need go to waste about a farm where there are hogs and poultry. No other kind of stock will take in such a variety of food stuffs with such disregard to the condition in which it is presented.

With the best advantages it is costly business to winter stock. Keep only dairy cows, and those which will make rapid gain for the market. Have the hogs to sell off before very cold weather, excepting the breeding stock and such as needed for home use.

The farmer who buys nothing which he can produce should be on the high road to success. It is not so much the amount of money we can get in as it is the faculty of keeping the expenses down that makes the profit in all cases.

Boil three pounds each of sulphur and freshly slaked lime in six gallons of water until there is but two gallons of it. Pour off the clear water and bottle for use. A solution which, sprinkled upon plants, will prevent mildew.

It is now time to cut out all the old stock among the raspberries and blackberries. Leave but three or four of the strongest of the new vines, and treat the rest as weeds. The strength of the plant will make this large and vigorous.
