Have Evolved Some Strange and Wonderful Theories Concerning Stomach Treatment.

A Trial Package of Stuart's Dyspepsia Tablets Sent Free.

sprung into existence theories by the score relative to the kinds of food that human belong should see the street of the kinds of food that most reliable manufacturers in Canhuman beings should eat, and should ada. avoid. With the tremendous increase in nervous and stomach diseases which are caused by the strenuous life of this neurotic, neurasthenic age in which we live, we are constantly having our attention called to some food faddist's 'new idea" on the subject of alimenta-

Most prominent among these theorists is the vegetarian who insists that meat was never intended for the human stomach, despite the fact that his ancestors for 600) years or more, used it as their principal article of diet; and the old patriarchs of Biblical history who lived to prodigious o'd ages, were meat eaters. All of the great nations of history have been users of meat and all of the most powerful and advanced countries of to-day employ it extensively in their dietaries, and their superior development and high degree of civilization are in strong and striking contrast to the decadent and degenerate nations of Asia and the tropics, whose inhabitants are

Another fallacy which has lately become a fad, is the so-called "low-pro-teid" diet. Now, the foods which are in proteids are the ones which build up nerve, brain, muscle and blood, so that any great reduction in the amount of proteid used simply means semi-starvation for the most important centres of the system-the ones on which we depend the most to enable us to successfully fight the battles of life Those nations whose people use foods containing but little proteid are never of large frame or well built. The Japanese, who have always been small of stature, have, since adopting a more liberal proteid diet, shown a remarkable increase in size, vigor and general development; and it is only since Japan became a meat-eating nation that it has developed into a world-

Still another theory lately advanced is that sugar pepper and salt are gastric irritants and irritate the mucous membrane of the stomach, although it is known that sugar posthan interfere with it, as is claimed.

The no-breakfast plan, the two-meal per day, and even the one meal daily has been advocated, while some advise a two or three weeks' fast, during which all food is withheld from the stomach "to give it a rest." completely ignoring the fact that the system's tissues are being constantly torn down and cast off, and new material to rebuild them must be supplied from the

It is utter nonsense to concern one's self about all these absurd and illogi-cal theories, as life is entirely too short, and there are other things requiring our attention. Eat what you want when you want it, and as much as the system needs to replenish its waste, and then take one or two of Stuart's Dyspepsia Tablets, and forget all about food fads and stomach troubles. They digest all kinds of food so thoroughly you won't know you have a stomach. They are powerful digestors of every kind of food though harmless to the system, and may be

Cottenham presided for Captain Mor-rison Bell, the Unionist. The Right Hon. A. Lyttleton was vigorously heckled even in exclusive Hanover Square. Many other meetings of both parties showed the heat engendered among the Irish Orange Lodge Manifesto.

The Belfast Orange Grand Lodge today issued a manifesto declaring that

any candidate who opposes a properly selected Unionist candidate and calls himself a Unionist acts the part Lund acted in the siege of Derry, and every man who votes for such records his vote for home rule.

Swift McNeil, M.P., speaking to a representative of the C.A.P., said it wis too late to rouse religious bigotry. Lord Randolph Churchill was up to his neck in the Parnell and Tory combination of 1885, but finding the Tocies could not succeed in giving home rule one suit, judgment on which will decide he told Justin McCarthy: "I have done all I can for you now, and must do

The peers having done so much advance the popular cause by th exhibitions during the last few days, it is not surprising that peers' sisters are now appearing on the scene to show how much better they can manage things.

They are turning their attention to the elementary schools, and, as will be seen from the narratives which we publish below two of them-one in East Herts and another in Chelten-ham-addressed the scholars and told them that their fathers must vote for the Tory candidates. In the Herts schools, "Vote for Rolleston," minent in Toronto, is at St. Mary's the Tory candidate, was actually chalk. School, East Herts, and introduced Lady Rolleston, wife of the Tory can-
