ANOTHER UPTURN IN GRAIN PRICES

Corn Receipts Likely to In-Of New Electric crease-Heat May Hurt Oat Crop.

Chicago, June 11.-Altho absence of elling pressure led to a material upturn oday in the value of corn, longs afterwards unloaded freely and brought about

as yesterday's finish to one cent higher, with July \$1.74% to \$1.74%, and Septemwith July \$1.74% to \$1.74%, and September \$1.62% to \$1.62%. Oats gained 1%c to 2%c. In provisions, the outcome was unchanged to 7c lower.

Most of the demand on which the corn market advanced came from shorts who were uneasy at finding no signs of general bearish sentiment, despite apparent likelihood of somewhat larger receipts next week.

Planting was reported as rapidly nearing completion, with a liberal acreage almost assured.

Chances of crop damage from hot weather tended to give independent strength to the oats market.

Provisions were inclined to sag.
