uscless the delegations, the books, the Japan, also, rail- the burden of the war; and though she the other evidences of a colossal maritime sition in Asia be made secure from Rusembition. The Liverpool of America be- sian aggression, it will doubtless be found comes only "St. John's," with a seaport that her terms will be in keeping with the rational and correct attitude she has

There is another consideration, how-maintained throughout the whole con ever, which perhaps is not without some versy. omise of good. A newspaper which can sick up Point du Chene from its snug ings on the Straits of Northumber The International Brotherhood of Team and and transfer it to the shores of the sters received a severe shock at Philadel en ought to be able to harden. If the convention, when an excited delegate enatter were brought to the attention of tered to announce a startling discovery. the Toronto Globs, the members of the He had found a non-union teamster—and staff would doubtless give it some thought a negro at that—delivering a load of coal Tel. 1432. in connection with their efforts to make at the very building in which they were Owen Sound the deep water terminus of then assembled.

SCHOOLS IN ENGLAND

The development of purely technical portant matter. schools in the large cities of England, for union teamster found himself unable to schools in the large who desire to qualify themselves for industrial or commercial husky union delegate sat on the man pursuits, after they have left the common pursuits, after they have left the common hole, and said things to him and to the crowd that gathered around. The negro during the past five years. In an interduring the past five years. In an interview last week Mr. Robert Saxon, B. Sc., view last week Mr. Robert Saxon, B. Sc., a professor in the School of Science in the marhole; but to no purpose. The Bradford, England, gave the Toronto harangue continued. Finally a policeman News an interesting account of this development. German industrial and com-hole obeyed the command of the law. The welopment. German industrial the British noise obeyed the command of the law. The mercial competition roused the British negro emptied his cart and went away. public to the need of such schools. They But the union committee went after the Of a year or two ago—and they are old—can't stand today found that they were losing trade, and to engineer, and he was constrained to prommeet the changing conditions technical ise that no more coal would be delivered schools began to grow in number. Prof. by non-union drivers while the conven

"One great result of the movement has When Mayor Weaver has driven out been the change in the management of the grafters, and the unions have driven technical schools provided for by the Edu- out all non-union men, the city of Philacation Act tyear. There were teen delphia will once more become the "city nical schools England for years before, of brotherly love." but they were under private management, though receiving government grants when subject to inspection and complying with operain regulations. But any child could Mr. T. B. Kidner's admirable article subject to inspection and complying with be admitted to those schools, and there on manual training, which the Times has was no systematic arrangents t between pleasure in setting before its readers to the primary and secondary schools and day, should be read with particular the technical. Of course, the secondary by any who are doubtful about the value schools all had, and still have, a certain of such a course; and it will be of much for educational purposes. The student is given some thought to the subject. taught various lines, while in the technical school he knows what line he wants that other studies should be sacrificed,

"By the recent act, provision is made training has its place in intellectual defor placing all the schools under one man- velopment, and can no more be omitted agement, that is, the city council and the with propriety than other agencies adopt technical schools are governed by a com- ed in the schools. And in addition to its technical schools are governed by a committee appointed by the council. Students are not admitted till 14 years of the hand, and lay the foundation for inage, and arrangements with the other dustrial and technical training. schools are in a less chaotic state.

"The schools are greatly appreciated by sons in other communities that it should the people, the reason being that a course seem necessary to say as much as has at the school greatly increases the student's earning power, and insures his obtaining employment as well. The efficiency of the work of the schools is attest. introduced in the schools of this city. ed by the fact that employers always apfore advertising, and the schools keep a three and three quarters millions to spend list of these ready to leave. A graduaic student, though somewhat green in a shape of first leave for the sense of the sen student, though somewhat green in a purposes. The city's assessment will be shop at first, learns faster and applies his \$5,000,000 more than last year, less \$1,000,

"There are a great many scholarships given at the primary and secondary. The stock markets continue to show a schools by the city, and these give free very high level of prices, but the public tuition and free books at the technical is not indulging in speculation on a large school. The fees are usually from \$45 to scale. The crop prespects and the state of \$50 a year, but the technical schools have the money market are being watched with the largest attendance in the city as a interest, as important factors in the situarule. Every city of 50,000 population has tion. ones are at Manchester, Birmingham, If beer made Milwaukee famous, graft

London and Finsporough. In any of the bids fair to make it infamous. Thus far large cities a workingman can attend in the cyenings and learn any trade he likes.

"The Bradford School is not one of the largest, but it is as well equipped as most The council of Russian ministers is still
