

NORMAL SCHOOL Class. Rev. R. Green, Teacher. The Devotional Class in connection with the above institution, has been rather larger than in past years, and the attendance regular. Two of the class are preparing for confirmation, and one intends after June studying for the ministry.

#### HOSPITAL.

The Hospital has been visited regularly every Thursday afternoon for the past year by Rev. D. Hague. Generally there are about five patients who belong to the congregation but often ten or fifteen. They belong to that class that more zealous efforts should be made to get hold of, viz.: those who attend regularly, without having their names on the church books. The work in the Hospital is most gratifying. Four or five of the ladies of the Cathedral are among the most earnest visitors there.

#### THE IMMIGRANTS.

This largely increasing class has demanded and received much attention. With the arrival of every steamer at Quebec those bound for the west are met by the Church of England Chaplain, and provided with a letter of introduction to the clergy at their destination. Many persons presented themselves to your Rector during last winter when their arrival in a strange land was to be regretted. To some timely and greatly needed aid and sympathy were given. For others employment was obtained, while more were helped on their way to other places. "The Shed" was regularly visited by Mr. Beatty, and much was done by him to help those strangers to future usefulness and independence. Their arrival in midwinter is to be deprecated, and it is hoped that by representations in proper quarters, they will in future reach our shores at more seasonable times.

#### THE JAIL.

A weekly service is held by the Scripture Reader, Mr. Beatty.
