Forty-Seven Thousand up to Wednesday Oct 2nd.

Agriculturists Meet and Talk About Cold Storage.

The Live Stock Make a Good Showing-The Prize Lists-Notes.

SEVENTH DAY'S PROCEEDINGS. Our country cousins took the city by storm Tuesday 1st. They came in by every train and steamer and flocked to the exhibition grounds from the very moment the gates were opened till well along in the afternoon. After dinner the citizens began to swell the throng, and the place of those visitors who left before tea was more than filled by the new-comers, who trooped in to see the fireworks. The capacity of the turnstiles was tested to the utmost, and at one time they showed that 213 persons had passe in per minute, when the pressure at the wickets was at its maximum. Of course the cattle sheds and agricul-tural hall were the centres of attraction, and all day long a large crowd watched the judging of the horses in the ring on the Barrack green. Ma-chinery hall, too, and the art gallery had their admirers, while the space around the band stand was filled to overflowing while the concerts were going on. Tired humanity occupied every chair and resting place, and lunches were eaten by thousands who came early but stayed to see the fire-works. Amusement hall drew largely on the multitude, but it is safe to say that none of the country visitors went back the second time. If the exhibition association is wise in its day and generation it will for the future supply a better class of special attractions than those advertised at present. While the main buildings were filled all day long, the crush became greatest as the sun went down, lasting until the fireworks began, when every-body made a bolt for the open. The echnical display was a good one and the best pieces were loudly applauded by the crowd.

The attendance yesterday reached the grand total of 13,439, breaking all previous records in the history of St. The clothes washer is his own inven-

AT THE HORSE AND CATTLE SHEDS.

Many thousands of persons visited the sheds containing the horses, cattle, sheep and swine Tuesday. The crowd began almost as soon as the doors towards noon. After the arrival of the grounds around the sheds and Agricultural-hall were thronged, and nearly every man, woman and child crowd was from ont of town. ers since the exhibition opened.

The live stock was all in the sheds

Grand Pre; W. W. Stockton, Sussex; J. H. Bailey, Maugerville; W. H. Par-

Coldbrook; W. A. McFate, Golden itors in this line, but their exhibits The Leicester sheep shown by W.

H. Parlee of Sussex were fine; the shed. A. Boswell of P. E. I. also had a number of very fine Leicester ewes. They were large and their wool was of an excellent quality. F. C. Colpitts hald a very handsome ram on exhibition, and the sheep of Messrs. Harrison of Maugerville, N. B., did their owners credit. Wm. Mullin of Coldnumber of sheep on exhibition that will hold their own with

The exhibit of swine, while not so darge as has been seen, is in every way an excellent one. The following are the names of the exhibitors: Dr. J. W. Manchester, Apohaqui; S. Z. Dickson, St. John; J. R. Semple, N. S.; J. E. Page & Sons, Amherst; Geo. Dissart, Sussex; H. S. Parlee, Sussex; W. Donovan, Coldbrook; D. S. Smith, Petitcodiac: Chas. Hales, St. John; J. P. Lynch, St. John.

J. E. Page & Sons of Amherst had a number of very fine Poland China pigs: Geo. Dissart of Sussex had on exhibition a White Chester sow with twelve pigs, which were a credit to their owner; J. P. Lynch, Wm. Donovan and H. S. Parlee each made a very creditable showing in thorough-

The exhibition of live stock was never excelled at any show held in this city. All day long the spaces between the stalls were crowded with admirers of live stock, and every person who was heard to give any expression to his sentiments said tht exhibit was one of the best he had ever seen.

The following is as complete a list

of the exhibitors as could be obtained. A number were not ticketed. Senator Ferguson, P. E. I.;
Alward, Butternut Ridge, Kings Geo. A. Fawcett, Messrs. McDonald, ville: Kane McGrath, St. John; Treadwell, Upper Maugerville; Chas. Hales, St. John; Wm. Donovan, John: W. W. Black, Amherst, N. S .: S. Creighton, St. John; S. E. Frost, Hampton; H. S. Hayes, Sussex; H. J. Belding, Hampton; J. M. Donovan, J. way, Fairville; C. L. S. Raymond, Woodstock; E. B. Elderkin & Sons, Amherst; D. W. McKenzie, Nerepis: Robt. McLean, Coldbrook. The Ayrshire bull owned by Mr. Alward perhaps the largest ever on exhibition here. He weighs 2,000 pounds.
The herd of Galloways owned by Hon. Mr. Ferguson of P.E.I. were one of the attractions at the cattle sheds. They are black as ebony, without horns, and possess very long hair, especially about the head and fore parts of the

ordinary scrub cow. The Galloway cow excels in that she will thrive upon food that an ordinary cow could not be induced to eat. They are hardy and do not mind the cold, while it is stated they generally give an average quantity of milk. Messrs. McDonald, Kane and McGrath have a number of fine exhibits in fat cattle. Wm. Donovan has a herd of very pretty Ayrshire and graded cattle. S. Creighton has one of the best looking herds of Jersey cows in the shed, fourteen in all. They are as pretty as picture and attracted the attention of every person who visited that part of the show. Mr. Elderkin and Mr. McKenzie, whose herds were mentioned in Tuesday's Sun, had many visitors yesterday.

THE EXHIBITS.

THE MAGNET SOAP EXHIBIT The Magnet pyramid on the main floor of the annex cannot fail to attract the attention of all who come near it. It is a well arranged construction. Mr. McFarlane, who is in charge, is kept busy day and night answering questions, handing souvenirs to visitors and pointing out the virtues of Magnet and Venus soaps. The soap is the equal of anything produced anywhere. Mr. Logan has advertised it extensively, and it is no onder that the sales have increased ormously. The Logan works are ept running all the time, turning out ands of pounds of soap. They keep two travellers on the road and have an agent in Montreal. Mr. Losays they have been sold ahead for fifteen months and look for a regular boom this fall. It has always been Mr. Logan's aim to make Magnet a first-class soap, and that he has succeeded goes without saying. It is an absolutely pure soap and one which if used according to directions will do a washing with very little labor. leaves the hands as soft and smooth as velvet. Venus soap is made for bath and hand purposes, is a cocoanut oil soap and is deliciously perfumed. It floats, which with its snow white color is proof of its purity. The firm give away a small pocket mirror which is very useful. They also give away a fine steel engraving for every 25 Magnet or Venus wrappers sent in to them.

GILBERT A. WILLETT of Westfield Centre, N. B., has on exhibition on the main floor of the annex a dish washer, a clothes washer, a bread mixer and a stumping machine tion and is known as the Willett washer. Mr. Willett is agent for the other things. They are all handy labor saving contrivances. THE LETTENEY MANUFACTUR

of Digby, N. S., make a large of their stove polish, put up in differwere opened and increased in volume ent ways. It is the Comet polish and is to be seen in cake, powder and the various excursion trains and boats paste form. They also have on exhibition Comet enamel, for stove dealers use.

of Sackville manufactures harness of It was the greatest day for the farm- all kinds, boots, moccasins and Tantramar buffalo robes. His exhibit, one of the most attractive of the kind in hour yesterday morning, the building, occupies a position in and the exhibit was pronounced a the southern annex gallery. Mr. Ayer's exhibit includes trappings of all kinds for which horsemen have learned to prize Grove. There were a few other exhib. highly. For two years Mr. Ayer has been manufacturing the Tantramar buffalo robe. The sample which he has on exhibition is large , thick and in every way should take the place of animals were very much admired by the old buffalo skin. The outside covering is manufactured from cowhide. generally taken from a black cow When the real worth of these robes known the manufacturer will have no difficulty in selling all he can make. The exhibit is in charge of C. B. Herritt and A. E. Wrv. who will take orders for any of the goods manufactured by Mr. Ayer. The goods on exhibition are also for sale.

CROTHERS, HENDERSON & WIL SON'S exhibit of carriages, etc., in the drill shed was admired by hundreds yesterday. Their Essex carriage is one of the special features of this firm's exhibit. In style, beauty and finish, it is not excelled by anything of the kind in the shed. Every passer by noticed and admired it. The two-wheeled cart in this firm's exhibit is something worth examining. It is suitable for doctors, for ladies, or, in short, for any one who fancies a light, stylish looking two-wheeled vehicle. This has one of the most attractive lines of carriages, carts and sleighs on exhibition. Their carriage lamps are ahead of anything in the building.

A FARMER'S PAPER. The booth of the Co-Operative Farmer and Maritime Dairyman has been arranged attractively in agricultural hall. This is the only paper publish ed, exclusively in the interest of farmers and dairymen in this province It is published semi-monthly at Sussex. Kings Co., and is edited in all its departments by the best talent to be found in the province. W. W. Hubbard is editor. The following are the names of the corresponding staff Geo. E. Baxter, Perth Centre, N. B. P. C. Black, Falmouth, N. S.; J. E. Hopkins, Nappan, N. S.; Prof. E. Faville, Wolfville, N. S.: Dr. G. M. Twitchell, Augusta, Me.; Abram ward. Fredericton, N. B.; H. B. Hall, Gagetown; Dr. J. W. Manchester, St John: Amasa Kennedy, Sussex; W. S. Hopkins, Middle Southampton, N. S. J. B. McKay, Stellarton, N. S.

MASSEY-HARRIS CO., LTD. To farmers one of the most attrac tive exhibits on the grounds is that of the Massey-Harris Co., Ltd. machinery hall they show several machines in operation, including world renowned Brantford and Toronto mowers, and the Massey-Harris wide open binder. This latter machine is constantly surrounded by an admiring throng, who watch with wonder and delight the celerity with which it converts the loose straw body. They are not as large as the scattered on its platform belt, in sim-

ultation of falling grain, into snug, square-butted sheaves. The Massey-Harris ensilage cutter is another ma chine that attracts a great deal of attention, particularly of those up-to-date farmers and dairy men who appreciate the value of a silo for the preservation of corn fodder for the winter feeding of stock. This machine is also shown in operation, cutting up large stalks of fodder corn with amazing rapidity and conveying it by means of an andless belt carrier to a height of fifteen or twenty feet for delivery into the silo. The exhibit is tastefully decorated with bunting and colored lithographs representing harvest scenes, etc., and over all an immense British flag informs the visitor that the Massey-Harris Co. are the largest manufacturers of farm machinery in the world-wide empire over which it waves.

The machinery hall exhibit, how comprises but a small portion of what the Massey-Harris Co. has to show, including, as it does, only such machines as the firm thought advisable to run by power. For a view of their general exhibit, it is neces sary to repair to agricultural hall, where a large proportion of the ground floor space is occupied by the magni ficent display made by this firm. Here our farmers not only meet with all their old acquaintances in the imple ment line, such as plows, harrows, cultivators, mowers, horse rakes, etc., in infinite variety, but the Massey-Harris Co. is able to introduce then to many new friends in the shape of labor-saving machines. Among latter, one of the first to attract the attention will be the Massey-Harris grain drills and sectional seeders. The sectional seeder is designed for sowing all kinds of grain and grass seed, and at the same time harrowing it in and cultivating the ground. As a cultivator, being made in sections, it has great flexibility, adapting it to use on the roughest ground, and the spring cultivator teeth are so attached that they can be grouped together for cultivating between rows of corn or other growing crops, while as seeder it is capable of sowing all kinds of grain and grass seed in any required quantity per acre far more rapidly and evenly than it can posbe done by hand, ensuring ter crop results and a great saving in seed in consequence of the evenness and uniform depth of sowing. Space forbids even a mention by

name of the greater part of the implements exhibited by this firm, but 2nd. among those which possess the attraction of novelty to many of our farmers, the Big A Brantford mower with dropper attachment, and Kemps' manure spreader, are perhaps the most prominent. The Big A mower is the latest addition to the Massey-Harris Co.'s production, and as mower is a machine of great capacity for heavy work, being furnished with either four and a half, five or six foot cutter bars. The dropper attachment, though now introduced for the first time to maritime province farmers, has had a large sale in Great Britain and Ireland. world wide trade, finds it necessary to cater to a great variety of demands Hence, the dropper attachment, originally produced to meet the requirements of foreign trade, is now shown here with the idea that it will meet a want long felt by many farmers in New Brunswick and Nova Scotia, who not growing a sufficient quantity of grain to warrant the purchase of a reaper, have frequently enquired for some attachment by which a mower could be adapted to the harvesting

of grain. Kemp's manure spreader, mentioned above as deserving special attention, and many other implements such as the Bain farm wagon, and a line of fodder cutters, root pulpers, etc., we regret our inability to describe more fully, but commend them all to the careful attention of every farmer who desires to adopt the most improved methods of agriculture, to whom the Massey-Harris Co.'s exhibit will be full of interest and educational value.

WM HARLAND & SON of Merton, Surrey, England, have been in business for 105 years, and their goods are used in every country in the world. They have the cream of the trade of the globe. They make nothing but high grade carriage varnishes, Japans and Filling-up Powder. Their business in the United States has increased wonderfully within the last few years under the able management of F.C.Reynolds. Their Canadian trade has also increased rapidly of tries)-W. A. McFate, Golden Grove, late years, so that they can now claim the proud position of leaders in high grade carriage varnishes. A walk through the carriage building at the exhibition will give sufficient proof of this, as 90 per cent of the carriages on exhibition are finished with their Geo. M. Killam, Albert Co., 3rd. varnishes. In conversation with their Canadian representative, The Sun was told that this year they have exhibited at Toronto, London, and Clifton, Kings Co.,1st; W.T.Hayes, Sus-Ottawa, and carried off the sex, 2nd; James Robinson, Sussex, highest honors over all compe-They are exhibiting here titors. in the carriage building, and their representative, who is constantly in atendance, would be pleased to have any person call and see him. Owing to their increasing trade they have found it necessary to open a branch warehouse in Canada, which is located at 50 Esplanade street, west. Toronto, Ont. Norman Duperow, who has been pushing the varnish business on the road for the last seventeen years, is then manager. W. H.Thorne & Co., and M. E. Agar handle their goods in St. John.

S. A. DAILEY. The gold, silver and orioide plating on the carriages of Messrs. Crothers Henderson & Wilson, and Edward Murphy, was executed by Samuel E. Dailey, No. 15 Waterloo street. work has been greatly admired since the carriages were placed on exhibit Mr. Dailey is an expert in his line and understands how to make a good article look still better.

THE PRIZE LIST.

Most of the visitors complain bit-terly because St. John does not use standard time.

EIGHTH DAY'S PROCEEDINGS. A cold, raw wind Wednesday cut down the attendance considerably from Tuesday's figures, nevertheless the buildings and grounds were pretty well thronged, particularly after tea, when it seemed as if half the city had ssembled to view the fireworks. The regatta in the harbor and the horse races at Moosepath also had a depression on the morning and after noon gathering, but on the other hand helped to swell the throng at night. During the afternoon His Honor the Lieutenant Governor and Mrs. Fraser paid another visit to the exnibition and spent some time examining the various sections. Excursionsts from across the bay and also by rail from many parts of this provin and Nova Scotia were very much in evidence. All were loud in praise the excellence of the exhibition, and the country visitors were particularly struck with the fine showing made in norses and live stock, the animals comparing most favorably, so far as their numbers went, with any similar display in Upper Canada. This morning at 11 o'clock there will be a grand parade of all the horses and cattle in the ring on the parade ground, which will constitute one of the most attractive features of the entire show. The work of the judges is not as far advanced as has been the case

in past exhibitions at this stage, but that is the result of several unforseen

exceptionally large attendance on Tuesday, when, owing to the crush, the judges had to suspend work altogether in several classes. Even yesterday the public desire to inspect the poultry manifested itself so strongly that the judges had to close up their books and postpone operations

till a more convenient season. A chat with the men who run the weighing machines, phonographs and other special attractions inside the buildings, shows them to be in high spirits over the volume of patronage they have received, while the attendants at the booths where tea, etc., is offered without money and without price must be endowed with an unusual measure of physical strength, else they would have dropped down at their posts days ago from sheer

exhaustion. It is doubtful if in any other city in Canada such a large crowd could as semble day after day which would show such a marked absence of drunkenness as has characterized the gatherings day after day at the exhibition. Years ago, when not ever wedding, a christening, or for that matter a funeral, was properly conducted unless the decanter was freely passed around, rum drinking was as much part and parcel of an exhibition as eating, but thanks to the work of is today a sober province. Some there be who scoff at the Scott act, but the aring of the crowd from the country at this exhibition has demonstrated the Canada Temperance act to be a power for good all over the land. The attendance yesterday reached 8,779, making a grand total of almost

THE MEETING IN AGRICUL-TURAL HALL.

47,000.

A meeting of persons interested in cold storage was held in Agricultural hall last Wednesday. The sakers, along with his worship Mayor Robertson, W. F. Hatheway, Professor Robertson and one or two other prominent gentlemen occupied seats on the dairy platform.

Mr. Hatheway called the audience to order and introduced D. A. Macpherson of Ontario. That gentleman said it afforded him very much pleas ure to be present on such an occasion He had taken very much interest in the exhibition and was especially pleased with the agricultural portion

of it. In passing through the province some time ago, the speaker said, he was impressed with the manifold advantages' possessed by the people The soil in New Brunswick was rich. the climate was excellent, and in many ways did the people of this province possess a rich heritage. He was also very favorably impressed with the men and the women whom he had the pleasure of meeting. They were clever and intelligent and had stamped upon their features the unmistakeable signs of refinement and culture. Mr. Mac pherson said he appeared before them as an Ontario man and would crave their indulgence while he addressed a few words to them upon the subject my-one he would venture

versity of opinion as to what really constituted working the constituted working the constituted working the constitution of what the constitution will be constituted with the constitution of what the constitution will be constituted with the constitution of what the constitution will be constituted with the constitution of the cons sisted. The speaker said in his opinion wealth for which the masses of people were striving came from Tamworth boar and sow-(extra sec- value; that value came came from surplus, and that surplus

> the speaker pointed out that in this. as in every instance, it was necessary to have first of all value. human family was demanding more and more not only the very highest was also requiring that these goods present an attractive appearance. The speaker explained that the increase of the surplus lessened the cost of production. This was as true in agriculture as it was in any other pursuit. As the surplus increased an export trade was created, and then the population of the country became greater, and as the population of any country increased, the wants of that country increased, and so an import trade would be created, and quite naturally the manufactories of the country became more numerous, and following in natural order, the banks and railroads would increase their business, and following this again was the increase which would be certain

to take place in real estate.

all these lines, an increase in wealth took place, and then came greater intelligence, and a broader education. The speaker said he regretted that in the United States, as well as in this country, the training given in agricultural colleges was not sufficiently practical. Farmers, he said, should not sell hay; they should convert grass into milk and flesh, and in this way produce the greatest value and the greatest surplus. What the farmers of this country required was valuable object lessons. He had been lecturing the farmers in his county for 25 years and had he not made his own farm an object lesson to them; had he not gone to work upon it and demonstrated to them just what could be done; he might as well have been talking to the wind.

When there was an increase along

The farmers of this country lacked skill and capital, and he held that the government of this country should come forward and assist them along this line. If this were done, the exports of this country would doubled, and then would be seen an advance in shipping, and every branch of industry would perience a revival. In closing, he urged upon the necessity of observing the road to wealth as portrayed by him in his opening re-

Mayor Robertson, in introducing the next speaker, Mr. Johnson of Montreal, made several remarks in favor of cold storage for St. John. speaker said he wished to tell them how cold storage might be obtained in this city, for he thought St. John was sadly behind the times in not possessing a house of this character.

The dominion government, he said, had appropriated a sum of money toplacing cold storage departwards ments in a line of steamers which car-

market, and a larger am shipped to En case it had much better fore, and it

trouble.

He held tha years the far country could cold storage necessary for goods landed good a state of any other he successful nations? Th that eggs, f they could ren the owner w course there for the space a cent per de taken into cor which could h the end of th greater. Nowadays
