UNIVERSITY TROUBLES

The trouble in the University is not ended yet. The Senate gave the dispute most careful consideration and adjourned from time to time to permit the faculty to meet the students and to remit in a measure the too severe sentence that was passed upon the offenders. The protessors, however, relused to do this in any satisfactory way. It is true that instead of expelling the five seniors they altered the sentence to suspension until the Easter term, but anyone who is acquainted with college life knows that a stutent has but little hope of passing the terminal examina tions when prevented from attending lectures. It seems to us that the Senate was quite

right under the circumstances, in giving the matter still further consideration and the resolution that was passed stated the case exactly. In it they indicate that they were unable to induce a majority of the faculty to "make such alterations in the punishment as would, without in any way impairing their dignity or detracting from their authority, have the result of effect. ually enforcing discipline in the future and at the same time permit the five senior students to take their examinations, and if successful in so doing obtain their degrees at the next encodis, and wi hout in any way extenusting the off ne that has been committed, in view of the fact that the members of the faculty are not unanimous in approving of the sentence that has been imposed, that the students under suspension have apologized humbly for their conduct both verbally and in writing, and have promised to observe strictly the authorit, of the faculty in the future, and in view of the fact that very serious results will accrue to these students now under suspension from enforcem nt of a penalty involving so material an interruption of university studies and that no charge was previously made against any of the students during their college course for which they were called before the

b sard of discipline, have come to the conclusion that the interests of the university will be best served by reducing the sentence of suspension impused upon the members of the junior and sophomore classes so that it will terminate upon the 15th of November instant, and by reducing that imposed upon the five seniors so that it will t rminate upon the 1st December next " This appears to be a very reasonable view to take of the difficulty. The senate is the supreme authority in connection with the institution. They have the right to review the acts of the faculty the members of which they appoint. They alone have the right to expel a student, it is confidently asserted, and therefore the faculty went beyond their powers when, in the first instance they sent five students from the university under that ban. class house. One would think that such sticklers for discipline as some of the professors have proved to be, would only be too ready to submit to the judgement of the senate and abide by their decision but much to the surprise of many, while the matter was under conside ation the annoucement was made in the press that if the verdict of the faculty was altered the three professors who voted with the chancellor would resign their positions ! And when the senate came to the conclusion noted above department the resignations of the three professors were handed in. That of the chancellor has not been received yet.

howing their disapproval of the conclusion the senate has reached. It must be remembered that three of their colleagues on the board of professors did not share their views and this fact had no doubt something to do with the reduction of the sentence. It is not probable that the professors resignations will have any (flect upon the decision that has been arrived at The resignations of some of the students must not be regarded too seriously, though some regret must be felt for the apparent lack of *esprit do corps* in the institu-

A NEW METHOD OF SUBSCRIBING.

The Fredericton City Council have ted down a resolution to donste the sum of two hundred and fitty dollars to the Transvaal Fand. Those voting sgainst the resolution, however, have put themselves on record by minute of council, to grant an allowance even as high as one housand dollars should it be found that

the money is really needed. Had this novel way of making a donation been acted upon in all quarters what a saving would have been effected and what philanthropic and loyal cit zens we New Brunswicker would have proved ourselves! This reminds PROGRESS of a somewhat similar

vote made by the city council of the Capital some twenty years ago when S:. John was scourged by fire. . They then vo'ed the sum of five thousand dollars for the sufferers to be paid over should the money be required. PROGRESS understands the

mount was never asked for. But Fredericton got the credit just the same.

IT WAS MARKED O. Q. D.

Why a Fredericton Man had to pay for a Supposed Gift.

There is a young drug clerk in this city whose mistake in a certain particular has caused much amusement among his asso-cates. The proprietor of the establish-ment has a very particular and life long friend in Fredericton who visits S:. John perhaps once or twice a year and who is always an bonored guest in his friend's

family. The regular visit took place two or three weeks ago, and during it the Fredericton man contracted a severe cold which seemed to cling with more or less persistency to his lungs which have always been a trifle weak.

"l'il fix you up all right" said the St. John druggist on the day of his friend's departure, "I'll send you by express tomorrow or next day half a doz:n or so bottles of cod liver oil, and I want you to take every bit of it."

The Fredericton gentleman, while fairly comfortable is not any too well off in this worlu's goods and so he accepted the offer in the spirit in which it was made. When therefore a few days later he got a large parcel marked c. o. d. and bad to hard over \$7.50 he wasn't quite so sure of his friends generosity.

In the course of a day or two the St. John man found himselt \$7 50 richer than he should have been and he began to investigate the matter. Finally Le discovered that the clerk who had sent the parcel had misunderstood the word the proprietor had written upon the parcel. The latter had marked "cod" in order that the clerk might know it was cod liver oil and would exercise care in shipping it to its destination, The Fredericton man got back his money.

About That New Island Hot 1.

TO THE EDITOR OF PROGRESS :- Some months ago an article appeared in the news papers of Charlottetown, P. E. I. asking why they did not build a new hotel for the ist trade, "that the Divies House was not good enough for travellers." Well, the Davies House is al. ig t, but the idea of some people about a new hotel is most absurd. If they will or ly look at matters in a business light, and is quire of Mr Davies. if he had not the commercial trade, where the Davies House would be or any other first class hotel ? As we all know when people wishing to go boarding on the Island are required te pay more iban five dollars per week they generally stay at home or grumble about having a new hotel thinking that the small prices can support a first TOURIST.
