Maritime Telegraph and Telephone Common

We drew the attention of the investing public to the merits of this stock. The annual statement of the Company shows a large increase in business for the year ended December 3ist, 1913,—an increase of 2379 subscribers, and the directors state that it would appear from present indications that this growth will continue for some time to come. The stock pays an annual dividend of 6 per cent. Public Utility Securities are always very popular. The statements of well managed companies show constant increases in receipts inprosperous times, and only a minimum of disturbance in periods of business reaction.
