### THE TWIN HALF MINUTE Clinical Thermometer.

FOR QUICK REGISTRATION OF TEMPERATURE.  
INDELIBLE BLACK.

PATENTED MARCH 25, 1890.

The most substantial  
sensitive  
Thermometer ever  
offered to the  
Medical Profession.

With the atmospheric register at 60°, if "THE TWIN" be immersed in warm water of 105°, the mercury will reach that degree in less than 20 Seconds.

The welding the two bulbs into one without any intervening space renders "THE TWIN" much stronger and less liable to break than any other heretofore offered.

It will also be found much more convenient to carry, requiring less room in a case or in the vest pocket. For these reasons, as well as for its Guaranteed Accuracy, "THE TWIN" is universally recommended by the medical profession.
