54. On the east half of lot 10, concession 11. Richard Anderson. He has found pottery fragments, a pipe, two iron tomahawks, and other evidences of early occupation; though these were probably not extensive, as there are no springs now at the surface of the ground. Mr. Anderson also found a few pottery fragments and skinners on the east half of lot 11, concession 11, which he also owns.

55. On the east half of lot 11, concession 12. Alexander Brown. Camps strewn with pottery fragments, pipes, etc., were found beside the stream here (Rugby Creek).

56. On the east half of lot 12, concession 13. Silas Locke. Mr. Locke has found pottery fragments, etc., in a field north of his barn. The grand at the place is comparatively low, and near Rugby Creek. He has found skinners at the site and elsewhere on his farm, but no iron relies.

57. On the northeast quarter of lot 10, concession 14. Thomas Morrison. There are about four acres on raised ground, on which remains have been found. This patch extends into the adjoining farm of Robert Anderson, southeast quarter of lot 10. There were some prominent ash-heaps, and quantities of pottery fragments, pipes, etc., have been found. There is conflicting evidence of the finding of two iron tomahawks. A boulder or two of some kind of ore was found on the site, its peculiar coloring having perhaps attracted the attention of the Indians. Mr. Morrison regards it as a "worship stone." In 1899 I obtained five typical relies from Mr. Morrison, and they are now in the Ontario Museum: 21370-71, two bone awls; 21372, part of small clay vessel, with finger-nail markings; 21373, two bone beads, one within the other, as found. A few single graves had stones in them besides the bones.

58. Along the south edge of the main swamp there are a few sites, but they are less extensive and numerous than those on the north edge. On the east half of lot 16, concession 6, John C. Steele, who formerly owned and occupied this farm, found some pottery fragments, a stone axe, and other evidences of the aborigines; but he said these were few in comparison with other sites. And the evidences have been obliterated by cultivation, as the present occupant, Peter McCuaig, has observed no signs of ashbeds or pottery fragments. The farm was originally the Dunsmore homestead.

59. On the east part of lot 15, concession 8. Robert Paisley. Some remains were found on this land, more especially when Jas. Coates lived on it. He found, about twenty years ago, some flints, pipe-heads, etc. The place overlooks the wide, swaampy basin already mentioned. Originally it was cleared by the Bell family, who found the first traces of Indian occupation.

On the west half of lot 16, concession 12, the occupant, James Maudsley, ploughed up, about the year 1867, a sword or rapier of an interesting kind. This blade bears on one side the inscription, "M. C. Fecit," and on the other. "in Valencia." It was exhibited
