

Pigeon: young male taken at Carberry, Man., by Miller Christy, 30 Aug., 1883; adult male and female taken at Fort Holmes, Ind. T., U.S., by C. Dewar, Jan. 1889.

96. **Mourning Dove.** *Zenaidura macroura carolinensis*. Formerly far from common, now abundant in all parts of the Alleghanian region where there is timber, frequenting barnyards that are near the woods.
97. **Turkey Vulture.** *Cathartes aura septentrionalis*. Common summer resident of the prairie region, probably breeding here.
98. **Swallow-tailed Kite.** *Elanoides forficatus*. Geo. Grieve tells me that two have been taken at Winnipeg, one in 1889 and one in 1892, neither seen by me. I observed one in Minnesota, near Pembina, in 1883. Coues reports it as occasional at Pembina, and R. H. Hunter writes me that he has seen it at Selkirk, Pembina Mountain, and Fort Qu'Appelle.
99. **Harrier.** *Circus hudsonius*. Abundant summer resident. The adults, in blue plumage, are common in spring and fall. Arrives April 15; departs October 15.
100. **Sharp-shinned Hawk.** *Accipiter velox*. Common summer resident in all wooded regions. Arrives April 15; departs October 15.
101. **Cooper Hawk or Chicken Hawk.** *Accipiter cooperi*. May be entered as a rare summer resident. Reported by Hine and Hunter. I saw one at Edmonton, but do not know of a specimen taken in the Province.
102. **American Goshawk.** *Astur atricapillus*. Common fall and winter visitant, usually appearing in August. Not noted during the breeding season.
