

In which the personage he describes lived, and with the aims and ideas which were natural to it, however strange they may seem to us. It is in this necessary knowledge that Dr. Abbott most distinctly fails."—S. R. GARDNER: *Acad.*, xxvii, 411.

11. *The Kernel and the Husk: Letters on Spiritual Christianity. By the Author of "Philochristus" and "Onesimus."* Lon., 1886, p. 8vo. Anon.

"This remarkable book may be regarded as a natural complement of the author's previous works, *Philochristus* and *Onesimus*. It affords a reply to some such question as this: Assuming the origin and early growth of Christianity to be what you represent, how do you propose to apply your method and conclusions to the practical needs of Christian theology in the present day? . . . He wishes to substitute for a miraculous non-miraculous, or, as he terms it, a spiritual Christianity. . . . Incidental defects might be noticed, but they are scarcely worth mention in view of the many excellences of his work. In my opinion it is one of the most noteworthy productions of recent English theology. No candid reader, of whatever school of thought, can rise from its perusal without being equally interested and instructed."—JOHN OWEN: *Acad.*, xxxi, 123.

"The work resolves itself on examination into three connected parts, one of which is personal and biographical, one is philosophical and constructive, and one is critical and theological. The first tells how doubts arose, how the author partly fought and overcame them, and how some of them overcame him; the second describes and justifies the method by which he has reached the goal, and sets forth the basis on which his belief rests; and the third part criticises the ordinary belief in the miraculous, and seeks to substitute belief in the naturalness of the Divine for belief in the miraculous. The whole book is of great interest, apart from the vast issues discussed in it, because it affords us a curious insight into the workings of an individual mind of unusual versatility and quickness of apprehension, and also of quite unusual culture."—*Spectator*, ix, 264.
