

HOLSTEINS

Elmcrest Stock Farm
Offers a Bull Calf, mostly white, low set, straight and blocky, whose sire's dam, Olive, being a cow, made 27.50 lbs. butter in 7 days, and was exceptional cow for her class. This dam made over 15 lbs. butter from 38.3 lbs. of milk in 7 days at 1 yr. 11 months—a beautiful specimen. Her daughter of Netherlands Bred Female—acceptable at "Bluebird" at \$100.00. 1912, whose milk tested 4.14 fat. Also a few good females, one a four-year-old, milking nearly 20 lbs. per day, and a show cow. Write for prices. W. H. CHERRY, GARNET, ONT.

HOLSTEINS

"PROOF OF THE PUDGING"
Stamford, March 3rd, 1913
Mr. R. F. Hicks
Dear Sir:
The bull calf arrived last night at six o'clock, in fine shape.
The calf that pleased with him, was very much surprised at his size and if he can keep him doing as well as he is now he will go beyond any other Holstein bull in the country.
You will find enclosed a marked cheque for the amount of \$100.00 in full.
Thanking you for the splendid animal.
Yours very truly
John C. Brown.
NOTE:—I have a copy of the satisfactory kind for those who desire for description.
R. F. HICKS, Newton Brook, Ont.

HOLSTEIN-FRIESIAN NEWS

Farm and Dairy is the official organ of the Canadian Holstein-Friesian Association, all of whose members are readers of the paper. Members of the Association are invited to send their views to the Editors for publication in this column.

JOHN C. BOECKH—A BREEDER

While passing along the road from Mr. R. F. Hicks, at Newtonbrook, recently, to inspect Mr. John C. Boeckh's stock, at Willowdale, one of the editors of Farm and Dairy recently dropped in to see the Holsteins on Mr. John C. Boeckh's farm. Farm and Dairy readers will remember Mr. Boeckh as having been an exhibitor at the Canadian National Exhibition last year. He is one of a firm of brush and broom manufacturers in Toronto, and has his small farm, like many another city man, as a recreation. The farm consists of some 30 acres. On it have been erected very suitable and sensible buildings. Dairy and stock buildings are now on the farm; they constitute as nice a start for a first class herd as one could wish for. The stables are in a modern style, well having cement floors and mangers, modern stanchions, stalls, litter carrier, feed carrier, water bowls, etc. A automatic water supply is put out by the Ontario Wind Engine and Pump Company, supplies the buildings with water. The water is pumped by means of a Stickey gasoline engine. Poultry is one of the largest departments of this small farm. Mr. Wm. Scarborough, the manager, was away when we called, and we did not get definite information. About the poultry, however, there appeared to be something over 1,000 hens on the place, and they were laying well.

improvement. But a large share of the farmer-dairymen of the country are from Missouri, and for the sections, go, and want to be shown.
During past years there has been some talk in Holstein-Friesian circles of getting something in the line of showing what the Holstein-Friesian grades can do, but nothing has as yet been done. The reputation of its grades, the Holstein-Friesian, is well known to all who are in the cap; for the black and white color is no persistent that cattle with one-fourth or more of Holstein blood, and the regular black and white markings; and the Holstein-Friesian should be marked a Holstein. To show a Holstein to do for their owners it is necessary to so arrange that the Holstein should be the results above any doubt; and for this we have the machinery in the semi-official long-time. It is probable that it would pay and pay well to somewhat reduce the amount of prize money for pure-bred cows, in order to set aside a certain sum as special prize-money for the owners of grade cows making the best records, with no division into classes and a minimum requirement for the winning of any prize. It is not time to do something to prove the capacity of Holstein-Friesian cows, but to make the prize go far toward solving the problem of the disposition of surplus bull calves at profitable prices.

MAY ECHO VERBELLE TO BE SOLD

When May Echo went out to the hammer and brought at the Belleville Commission sale in a modern style, \$1,500 two years ago and she a 10-year-old in the year 1912, and she took her first and looked at her first sale at the Belleville district sale in 1912. The regular price for her was \$1,000; she became even better. This year, at 12 years of age, she made 31.5 lbs. butter in 7 days. The good ones continue to be sold in the district sale. Another good Letter day is scheduled for April 15th, when May Echo Verbelles-daughter May Echo—will be sold at the Belleville sale.

Through her dam, her own good stock, and through the good stock of her owners, this cow, May Echo Verbelles, has no equal in Canada, and possibly no equal in the world as a producer for one day, seven days or one year, for three generations. This May Echo family have reputation for their production of milk. The first milk sale in the world was a cow been sent to the Belleville district sale in 1870, she milked 104 lbs. in one day, and she was a 10th day dam, and with two junior daughters she has since then averaged over 75 lbs. milk in 24 hours. This year she has been ought to make history for Belleville!

What is it that makes a cow valuable? It is her breeding, the quality of her blood, that of her nearest ancestry and her ability to reproduce these valuable qualities in her offspring. It is her milk value. Judged by this standard, May Echo Verbelles is certainly a cow of great qualifications for giving value. That a cheque of handsome dimensions. The fact that Lawrence May Echo purchased a three-year-old daughter of May Echo Verbelles, and the champion milk producer in 1912, will also be added additional interest to the sale of her dam. This young cow, beginning her record at two years of age, has produced in one day 76 lbs. in seven days, and in 24 hours 104 lbs. of milk. Her full sister, May Echo Sylvia, being her dam, has also produced in one day 76 lbs. of milk in seven days, and in 24 hours 104 lbs. of milk.

Holstein breeders generally have arrived at this conclusion: that it is the good ones of the breed, the money. Mr. R. Mallory, the breeder and owner of the average 100-bushel cow, has other cows with very creditable records at this year's great Belleville sale. The average 100-bushel cow, the best of mature cows he has entered is in the number of the breed, the money. The May Echo blood, the "stayers," good for many years of hardest work. They are the best of the breed, the money, and they are assured of a royal reception at Belleville sale at the hands of men who will give them the best of money. They are the best of the breed, the money, and they are assured of a royal reception at Belleville sale at the hands of men who will give them the best of money. They are the best of the breed, the money, and they are assured of a royal reception at Belleville sale at the hands of men who will give them the best of money.

AN INTERESTING MEETING

The Southern Ontario Conservation Society held a meeting recently at the home of one of its members, Mr. J. H. Halsey, who was too ill to attend. After the meeting had been held, it had been satisfactorily disposed of, it was decided to hold the third annual sale on Tuesday, December 20th, 1913, at the meeting Mrs. McQueen gave an account of the sale of the members of the Company and their views on the sale. The meeting was spent, and every one left for home. The meeting was a very interesting one to Mr. and Mrs. McQueen for their kindness.—R. J. Kelly, Tillsonburg.

CAMPBELLTOWN HOLSTEINS

A few cows of Koryudye Verman Pontiac for sale. Also a number of Cows and Heifers to be sold. Come to Tillsonburg if you want to buy Holsteins and I will see that you get them. Farm, North Broad way, Tillsonburg. R. J. KELLY, - TILLSONBURG, ONT.

A Year Old Bull, closely related to

May Echo, will sell or exchange for another Bull. Now ready for service, nicely marked, about half white.

Wm. A. Armstrong, R.R. No. 1, Indian River, Ont. (Peterboro Co.)

GLENDALE HOLSTEINS

Best cow of Pure-bred Holstein Bull Calves and a number of Heifers, whose three nearest sires have sired May Echo Sylvia, over 2 lbs. butter in 7 days, R. O. M. at 1 year 11 months (world's record). Lela Kora, 19.50 lbs. in R. O. P. as a senior two-year-old (world's record), and Jewel Pet Poeh, De Kol, 28.50 lbs. butter at 4 years (world's record). Prices reasonable. All correspondence promptly answered. W. A. SHAW, BOX 11, FOXBORO, ONT.

ELMDALE DAIRY HOLSTEINS

B. E. HAGERMAN'S HOLSTEINS AT BELLEVILLE

Eleven thousand pounds (\$1,100 lbs.) each in 6 1/2 months, a whole herd in Mr. Hagerman's cheese factory record for the past two years.

When a cow, including heifers, can show such a wonderful production for the two years, it is a cow of great value. It is an outstanding individual in it of unusual merit. Jessie Inks De Kol, entered in this year's Belleville sale, has the greatest cow set, judged from any standpoint, in this very class; her record is 100 lbs. in 7 days. The favorable attention of Holstein breeders generally to Mr. Hagerman and his cows, is a sign of the times. He is a champion, by the same sire, and out of the same dam as the sire of Lulu Gildred, Canadian champion, two-year-old milk cow, from a combination of producing ancestors that is hard to equal. This young cow has milked up to 31 lbs. in one day, 2.69 lbs. in one month, over 1700 in nine months. In additional proof that "like begets like." Individually she is nearly perfect, and the fact that she freshens right for Toronto should make her a prize worth seeking by any showman who is serious; considering the amount of a winning bid on the latter fair. With any kind of success the calf she is carrying should be a valuable qualification of a 100-bushel a-day dam and sire's dam, as Mr. Hagerman's three entries at the 1912 sale, the money cow, Hengerveldt's No. whose dam milked 100 lbs. in one day, made 28 lbs. butter in seven days, and has 20 lbs. of milk to value. It is interesting to note that two of her near relatives, the sire and the dam De Kol have been sold at Belleville Open-Season Sale for nearly \$5,000, while the dam of her daughter, who has her next calf brought \$1,500. How much is such a cow with such a future worth?

We would advise who want cattle that possess type, breeding and good blood, to see the sire and dam brought up by Hagerman's offering at Belleville.
CREATE A MARKET FOR SURPLUS BULLS
Malcom H. Gardiner, Bellevue, Wis.
Of the bulls born in Holstein herds, not one in 10 is required for the best herds, and the other nine must either find a place in some other herd, or be sold as a cow, veal or beef. To improve the quality of the bull's lot to head and improve the common herd, it is necessary to have a market to convince the farmer-dairymen that Holstein grades are vastly more productive in the dairy than any other breed. Part of the country. Breeders of pure-breds know that these bulls will do, and the man who will credit them to their words seems to them very big headed and lacking in all desire for im-
