Farmers and War Conditions.

Editor "The Farmer's Advocate":

Canadian farmers should feel grateful that they are escaping the direct devastation of the awful struggle now convulsing Europe. But they cannot escape the effects of the commercial depression which will inevitably follow the carnage and waste of to-day. Temporary inflation of prices for certain commodities will disguise or mitigate these effects and lighten the burden for us in comparison with those living nearer the seat of war. But this inflation should not blind us to the evil consequences which are sure to follow the destruction of life and property, and the wholesale abandonment of productive industry. Fruit-growers are even now feeling the pinch caused by the falling off in demand, and this is merely a sample of what will generally happen when the waste of the present has to be made good. The world is only a neighborhood to-day, and what damages one part damages the whole, and, incidentally, every other part. Nature has so ordained it, and Nature's laws cannot be violated with impunity.

It has been estimated that at least twelve million able-bodied men are now engaged in the titanic European struggle. At a very moderate estimate, this involves the loss of \$25,000 a day in productive power. Moreover, the actual cost of operations has been estimated at \$50,000,000 a day, not to speak of the destruction of life and property. All told, the total waste cannot be less than \$100,000,000 a day. To make good this waste in the future industry of Europe, production must overtake and exceed consumption, and lessen the effective demand of Europe for commodities from abroad. Commerce generally will have received a staggering blow, from which it will take a long time to recover.

Realizing that strict economy is not now so much a matter of choice as of necessity, the word has gone forth everywhere to economize. The consumption of luxuries must, or should, decrease very markedly, and labor must, or should, be diverted towards supplying the more normal wants of mankind. Admitting that the Canadian farmer will feel the burden as lightly as anyone, and much more lightly than his brother workers in Europe, it is still incumbent on him to exercise the strictest economy in his business. The future condition of industry and commerce is problematical. We hope for the best, for a speedy termination of the strife. It is wisdom, however, to be prepared for the worst, and it is for this reason that, at this present time, the United Farmers' Co-operative Company presents its claim for general support by the farmers of Ontario. Designed to serve and not to exploit under absolutely democratic management of the farmers themselves, this company can be made the means of effecting great economies in all lines of business, providing that farmers generally will use it for their business transactions. Everyone knows that "Union is Strength." The greater the number of farmers who do business through their own co-operative organization, the greater and more varied this business is, so much the greater will be the advantage of the central office in negotiating terms of sale and purchase. The degree of service rendered by The United Farmers' Co-operative Company will depend upon the foresight and loyalty of the farmers themselves.

W. C. GOOD,
President.

"In the January I made five cents, and in February I made eight. I like to see that of industry in the young. How did you make it?"

Hogs Crave For Meat

It is a well-known fact among hog-raisers that hogs have a craving for animal food—meat. The reason for this is because the usual foods, such as corn, clover, alfalfa, skim milk, wheat middlings, are deficient in protein and phosphate of lime, the two most important food elements needed for the development of the hog. On the other hand, animal food is rich in protein and phosphate of lime.

Harab Digestive Tankage

is an animal food, prepared especially for hogs from wholesome beef trimmings enriched with pure blood. Eight times as rich in Protein and Phosphate of Lime as an equal weight of corn. Incomparable as a quick developer of firm, sound flesh. Endorsed by the experimental farms and big stock raisers.
