Pay me when Cured

My World-famed Remedy
Given on Free Trial
Until Cured.

I point with just pride to my invention, which during 40 years has enabled more than 100,000 sick men and women to regain their health and vigor—a record to be proud of. I say record, because I have the proof always open to inspection for those interested. Since discovering the marvellous curing powers of electricity 40 years ago, I have faithfully and persistently labored to bring it to the notice of sufferers who need building up mentally and physically, who are troubled with Nervousness, Rheumatism, Lame Back, Wrecked Stomach, Varicocele, etc., and how well I have succeeded is best shown by the fact that the Dr. Sanden Electric Herculex is now standard in every part of the world. I admit the first 30 years was hard work, but I am now enjoying the success and satisfaction I feel is due me.

I do not believe that there to-day is a grown person who doubts the wonderful curative power of electricity—in fact, I take it for granted there is not. I, therefore, only find it necessary to give a few hints as to its application. To restore strength and vigor to a worn-out system, to feed the brain and nerves, to drive uric acid out of the blood, to strengthen a muscular center, as in lame back, to give renewed and healthy action to the stomach, liver and kidneys—in short, to really renew the life forces of the whole body, the continuous galvanic current must be used and applied in

a mild, prolonged manner, to allow the system to absorb it. The strong, harsh current applied from the ordinary battery is mostly wasted, as the system only accepts a small portion of it, just as the sudden heavy shower mostly runs off, while a gentle, prolonged rain is thoroughly absorbed. My invention does exactly as explained above. You put it on when going to bed and take it off on arising in the morning. It gives a soothing, exhilarating current you instantly feel, but not sufficient to in the least disturb you. It fills you with new life, and electrifies every nerve and drop of blood in your body. As weakness and disease is a LACK of electricity, how can you wear my Electric Herculex without receiving benefit? I know you cannot, therefore I invite you to send for it on absolute free trial.

Not a Cent to be Paid Until Cured

The price is as low as \$5.00 in many cases, and you get a discount for cash if you prefer to deal that way

As the founder of the Electric Body-Battery system of treatment, my success is the envy of many, and my Herculex is, of course, imitated (what good thing is not?), but my great knowledge to advise and direct my patients is mine alone and cannot be imitated. I give it free to all who use my invention until the cure is complete—My Herculex is guaranteed to give a current for at least one year.

Call or send for my Electric Herculex to-day, or if you want to look into the matter further, I have two of the best little books ever written on electricity and its medical uses, which I send free, sealed, upon request.

IF ALL WERE SUNSHINE.

If all the skies were sunshine,
Our faces would be fair,
To feel once more upon them
The cooling splash of rain.

If all the world were music,
Our hearts would often long
For one sweet strain of silence
To break the endless song.

If life were always merry
Our souls would seek relief
And rest from weary laughter
In the quiet arms of grief.

The ministers of Port Arthur are exerting themselves in the direction of funeral reform. Features to which objection are taken in present day funerals are: extravagant expenditure for flowers, carriages, etc., when the family have not money in hand to pay the bills; exposure of the living to pay honor to the dead—very often one funeral bringing on another; advertising the hour of the funeral before consulting the minister; selecting Sunday for the funeral because greater parade and numbers can be gained; too much crepe and heathen gloom; exposure of the remains; farewell of the relatives before a gaping crowd; want of promptness, and unseemly display of any kind. Funerals are not so bad in these respects as they were some years ago, but there is still much room for improvement.

Lieutenant U. S. Grant III., of the engineer corps, graduated from West Point several years ago near the head of his class. During young Grant's "plebe" year, about the time of the midyear examinations, his father, Major, General, then Brigadier-General, Frederick Dent Grant, became a little anxious about the stand his son was taking, and wrote to the superintendent of the academy, a classmate of his, to ask his honest opinion as to whether his son would pass the mid-year examination.

The answer which came promptly was brief and to the point and said: "Your son is standing higher in all his classes than you stood in any one."

General Grant has never worried himself since about his son's career.

Owing to the entire failure of the herring fishing, and partial failure of the white fishing, privation in the outer Hebrides has reached such a pitch that there are 2,000 men in the island of Lewis alone ready to leave their homes and try their fortunes in Canada. Mr. Galloway Weir, M. P., telegraphs from Inverness: "Hundreds of fine young men have emigrated from Lewis to Canada and the United States during the past few weeks. The herring fishing has been a failure, and many hundreds more will be on the verge of starvation during the coming winter, and must emigrate or die."

The laughter of the different nations is said to vary greatly. The Italians, laugh is languid but musical; the Germans laugh in a deliberate fashion. The French are spasmodic and uncertain, the upper-class English guarded and not always genuine, the lower-class English explosive, and the Irish of all classes hearty, and the Irish rollicking. The Chinese laugh is not so expressive as the European. It is usually a titter rather than a genuine outburst of merriment.—*Bristol Times*.

The Traveller—"Are these all the sandwiches you've got to eat?" The Refreshment Room Attendant—"I haven't got to eat 'em, bless yer. I've got to try and sell 'em."
