

DEPENDABILITY

A VALUABLE FEATURE

Aero Brand Cyanide deliveries are practically free from dependance upon outside raw materials. **Common Salt** is the only thing that is bought in the open market. The other materials are produced in large quantities right in the same plant where Aero Brand Cyanide is made.

Regular operation at pre-determined costs makes possible the quoting of a uniformly low price, together with dependable deliveries.

The efficiency of Aero Brand Cyanide has been proved in the use of thousands of tons in Mexico, Canada and the United States, for the reduction of gold and silver ores, and for chemical purposes.
