

Clergyman's Frank Statement

and His Family Have Obtained Great Benefits From the Use of

Paine's Celery Compound

Sick of His Parish Have used the Wonderful Medicine With Happy Results.

Rev. J. P. Renaud, minister of the Protestant Episcopal Church, Montreal, is one of the best known clergymen in Canada. He has personally used Paine's Celery Compound and tested its life-giving virtues. The members of his family have derived happy and lasting results from its use, and he is proud to say that many of his parishioners have benefited by it.

Paine's Celery Compound is, without doubt, the greatest of all spring remedies. It is vouchsafed for by physicians, gymnasts, teachers and well read, informed men and women in every part of the country. It is marvellously successful because it accomplishes in every instance exactly what is claimed for it.

Rev. Mr. Renaud writes as follows: "I have personally and in my own household benefited by the use of Paine's Celery Compound, and, having from time to time used it with the same beneficial effect among the members of my family, I deem it but right to acknowledge the great benefit it has proved wherever it has been faithfully tried, and, if this acknowledgment of mine will make your well known compound still more widely known to the benefit of the needy and the sick, you have my authority to use it in any way you think fit."

Ancient and Modern.

An old man and a young one, while travelling from London to Brighton, got into conversation. The old man asked: "Which would you sooner travel in the up-to-date railway train or the old-fashioned stage coach?"

"Why, the up-to-date railway train of course," the young man answered.

"Ah, I would never travel in the old-fashioned stage coach."

"Why?"

"Well, if you are in the old-fashioned stage coach and you are thrown into a ditch, it's 'Hullo, old party, there you are!' But if you are in the up-to-date railway train, and the boiler bursts, it's 'Not 'Hullo, old party, here you are!' but 'Hullo, old party, here the dickens are you?'—London Answers.

Growing Children Thrive Best on Malt Breakfast Food

Mothers truly interested in the nourishment and growth of their children, speak with great delight about Malt Breakfast Food and its health-giving properties for young children. Malt Breakfast Food is a perfect morning and evening food for growing children; it truly nourishes their bodies and keeps the bowels in perfect condition. Owing to its predigestion, Malt Breakfast Food at all times soothes the stomach and is easily absorbed by the system and keeps the blood cool and pure.

If you would keep your growing children in robust health, give them Malt Breakfast Food morning and night. No other food is more economical, no other can keep them so well and vigorous. Your grocer will gladly recommend Malt Breakfast Food.

Harvesting.

A little girl and her aunt went for a walk out on a street the other day, and as they walked the aunt caught her skirt on the sharp edge of her shoe heel and tore off several inches of lace.

"Won't you tear it off for me, aunt?" she asked. "I cannot mend it now."

The accommodating little girl dropped on her knee and for several minutes there was a sound as of tearing goods—really much more tearing than was necessary to remove a piece of lace only half an inch wide.

"Haven't you finished yet?" finally asked the aunt.

"Yes," said the little girl, rising wearily. "I was taking all this off I wanted enough for my doll's skirt while I was at it, and the little bit you tore wouldn't do."

Inginess and Unsightliness Turned Into Beauty

A Simple, Easy and Economical Way of Home Dyeing—Diamond Dyes Make Old Dresses and Clothes Look Like New—Colors that Never Fade—Or Wash Out.

Old dresses, wraps, jackets, capes, blouses and suits that have become faded and dingy in color can be turned into garments of usefulness and beauty by the wonderful re-creating power of Diamond Dyes. Many thousands of women from the Atlantic to the Pacific have scores of dollars every year by using Diamond Dyes. They are the standard home dyes of the world, and, as such, are warranted to give the best results in brilliant and fading colors.

Diamond Dye mat and rug patterns are selling faster than ever. If your dealer does not sell these popular patterns, send your address to The Wells & Richardson Co., Limited, 200 Mount Pleasant, Montreal, P. Q., and they will mail you free of charge, sheets of designs to make selections from.

AMAZING USE OF TIMBER.

Some Astonishing Figures of the Consumption of Wood Per Year in the United States—Mr. Oswald's Calculations.

James Oswald of Madison, Wis., is said to be a great authority on timber and the lumber trade, and in a recently published article he gave some figures showing how great is the consumption of wood per year in the United States.

Over 4,000,000,000 feet of pine lumber is used annually for matches, the equivalent of the product of 400 acres of virgin forest. On American railroads about 620,000,000 cross ties and renewals are required annually. The amount of timber used every year for ties is equal to 3,000,000,000 feet of lumber. In that country there are now standing nearly 7,500,000 telegraph poles. The average life of a pole is ten years, so that about 750,000 are required every year for renewals. These figures do not include telephone poles or railway telegraph poles. The amount of timber consumed annually for poles and ties is equivalent of the timber grown on 100,000 acres of virgin forest.

For making shoe pegs every year the amount of timber used is equal to the second growth of 3,500 acres of hardwood land. Laths and boards require about 500,000,000 feet of wood. Although the making of paper from wood pulp is a comparatively new process, the annual consumption of wood for this purpose is equal to over 800,000,000 board feet of timber, for which it would be necessary, were the trees all growing together, to cut about 80,000 acres of forest. They are now used in America for the lumber and paper trade about 40,000,000 feet of lumber a year, which is equivalent to about 4,000,000 acres of virgin forest, an acre equal to Rhode Island and Connecticut. These figures do not include wood used for fuel, which is four and one-half times as much.

It will thus be seen that, without taking into account of the forests destroyed each year by forest fires, or in the pursuit of agriculture, the present annual demand in the neighboring republic reaches the enormous total of 22,000,000 acres—an area equal to one and a half times the size of Nova Scotia.

Prof. Robertson at Home.

Professor Robertson, Agricultural Commissioner of Canada, has built a charming home for himself in the chief residential street of Ottawa. It stands, in a small plot of ground of its own, but, like most Canadian dwellings, it is not surrounded by a wall or a railing. He married the daughter of a well known Canadian, and his only daughter, Isabel—not Isobel—is named after the Countess of Aberdeen, who was so much beloved in Canada during her husband's Governor-Generalship. The professor's home life is a very happy one; the professor is too busy to care much for society, and when he has a spare time likes to spend it with his wife and little daughter. His library is well stored with volumes, and bluebooks make substantial litter upon his writing-table. I met many interesting people at his house, which is quite a centre of light and learning in Ottawa. No wonder the Duke and Duchess of Cornwall and York—as they were then—were quite delighted with Ottawa and the wonderful view from the Parliament House, but I wonder if they enjoyed driving over those awful roads! The town is in some ways very new, and the houses of olden time; but the roads are far from all that could be desired.—Fall Mail Gazette.

Where He Got His Beef.

An eastern Canadian business man, whose home was in a fine mansion by spacious grounds, and who owned, among other things, a fine farm, stocked with pure-bred cattle, used to tell with much amusement how his hostess at a dinner in Liverpool said to him: "Mr. —, I know you will excuse my asking you, for you know how interested I am in the colonies, but will you tell me how you manage out there to get fresh meat? You are so far from any market that beef must spoil before it reaches you."

The Canadian said, in telling the story, that he did not feel able to enlighten such colossal ignorance at the dinner table, and so he replied: "When we feel we must have some, we go out and shoot a bear."

The answer was accepted as satisfactory.—London (Eng.) Canadian Gazette.

Destroying San Jose Scale.

The Illinois state entomologist says he has abandoned kerosene in all its forms and is now using whale oil soap and the lime, sulphur and salt mixture. It is a well known fact that in Washington and Oregon the lime, sulphur and salt wash is very effective, even in raising weather, and under climatic conditions very similar to those found in Illinois. The winter in Illinois has been open and dry, favorable to this material, and the results have been very satisfactory. It is claimed that at least 95 per cent. of scale on trees treated with the lime, sulphur and salt wash are dead. Indications are that the other 5 per cent. will be destroyed before spring. Only a single application of this material for San Jose scale in Illinois and other orchards is promising.

Loss of Celebrated Herefords.

When at the Charleston Exposition T. F. B. Sotham's celebrated Herefords contracted Texas fever. Since then Checkmate, Golden Lassie, Thickflesh and the magnificent provoker have died. The others of the herd will probably recover. This loss is irreparable. All were splendid Herefords of the very highest type. Improver was the senior champion Hereford bull at the Chicago International Stock Show last December and was a noted prize winner.

Heat and Bacteria.
Erroneous ideas are often entertained concerning the efficiency of heat in destroying bacteria. The importance of time in the operation being overlooked. Recent experiments reported at the Aberdeen congress on public health showed that a temperature of 140 degrees F. applied to nonvirulent tubercle bacilli produced by laboratory culture killed the germs if continued for ten minutes. A temperature of 140 degrees applied for a quarter of an hour killed the bacteria in tubercular sputum in five cases out of six. Tuberculous milk heated to the same temperature for twenty minutes lost its power of infection.

LOST FIFTY POUNDS

The Terrible Experience of an Old Lady Through the Starvation of Dyspepsia—A Very Aggravated Case.

There is no more highly respected family in the neighborhood of Leinster, N. S., than that of Mrs. M. Sears.

The good lady who is now over seventy years of age has enjoyed good health up to a few years ago when her stomach went wrong. Acute indigestion came upon her in her old age, and so badly that she nearly died. As it was she lost fifty pounds in weight before she found out about Dodd's Dyspepsia Tablets and was cured.

In her letter on the subject Mrs. Sears makes the following very strong statements:

"I was a great sufferer from Dyspepsia, experiencing fearful pains in the pit of my stomach. I lost about fifty pounds in weight because of my not being able to eat anything. Indeed I was almost starved. My case was a very acute one."

"I tried all kinds of medicines but got no relief whatever. I used a stomach pump several times and did everything I could think of to get better."

"I went away to Newfoundland for some months hoping that the change might do me good, but I came home no better and quite hopeless."

"I saw Dodd's Dyspepsia Tablets advertised, but as I had tried the doctors and almost everything, I had little faith that they would help me."

"I had failed from 180 pounds until I weighed less than 130 pounds before I commenced to use Dodd's Dyspepsia Tablets."

"I got a box in Antigonish and they gave such relief that I sent for four more which I used. Now I am cured. I am able to eat anything, and strength from the very first and am to-day well and strong."

"Dodd's Dyspepsia Tablets are the best doctor for Dyspepsia or 'Stomach Trouble.'"

He Had His Choice.

"Where is Josiah?" asked Mrs. Constance. "Well," answered her husband, "he proceeded to fill his pipe. 'If the ice is as strong as he thinks it is, he's gone skating'; and if it ain't he's gone swimming."

Glad He Found Out.

Costigan—"Don't say you ain't done nothing!"
Madigan—"An' why not?"
Costigan—"Because it isn't good English."

NERVOUSNESS AND NERVE.

The more nervous a man is, the less nerve he has. That sounds paradoxical—but it isn't; for nerve is stamina, and stamina is the power of nerve. It tones the whole system, perfects digestion and assimilation, and is therefore the best medicine a nervous person can take.

If you get tired easily, mentally or physically, take it—it will do you good.

A person that has lost appetite has lost something besides—vitality, vigor, tone.

SAYS THEY'RE HEAVEN-BORN

A lady in writing of her faith in Dr. Von Stan's Pineapple Tablets calls them "A HEAVEN-BORN HEALER." "Chronic Dyspepsia was her 'cross,' and they cured her."

DYNAMITING TROUT.

First Attempt by a B.C. Miner and Its Consequences.

In British Columbia they are telling a strange story of a mine superintendent and a dog. The story has drifted down to Washington, and is reported by the Spokane Spokesman-Review. The miner, one Cronin, was fond of fish and of fishing, but he never had any success. One day, exasperated by his ill luck, he took a stick of dynamite and a fuse, and he and his dog started for the lake.

Taking the piece of dynamite, the manager attached a fuse by wrapping it carefully in a piece of cotton. He meant to explode the dynamite in the lake. That, he knew, would kill a goodly supply of fish, which he could gather in as they rose to the surface. He lighted the fuse and threw the stick into the lake.

Then happened something he had not counted on. The dog was a retriever, carefully trained, and, as soon as the animal saw his master cast the dynamite into the water he plunged in after it. Cronin shouted, threw stones and sticks and everything he could lay his hands on, but all to no purpose. The retriever got the dynamite stick before the cotton had soaked sufficiently to sink it, and before the fuse had burned out. Then he started for the shore.

By this time Cronin saw that he could not save the dog, and that he must run if he were to escape himself. He set out at a tremendous gallop. But the faithful retriever was soon after him. Cronin knew that there was no hope for him if the dog caught him before the fuse burned down. So he put on still more speed and kept at it, but the dog continued to gallop. Cronin knew that in another minute both would be blown to atoms.

All the wickedness that he had been responsible for during his lifetime brought him to a realization of what death meant at that moment, and he prayed as he had never prayed before.

Then came a deafening explosion. For a minute Cronin did not know whether he was dead or alive. He got up of himself and came to the conclusion that he had escaped. The hole in the ground was only a short distance away from him, and he returned to it. The poor dog had been faithful unto death, and which seems peculiarly hard when one reflects that he was merely doing what he had been taught to do, while his master was doing what the laws distinctly forbid.

Uncertain People.

"I don't know them now," said a charming woman conclusively, when I asked her of the welfare of some erstwhile intimates. "They were so uncertain I gave them up." Do you know, these uncertain people who one day cannot live out of your pocket and the next treat you to a cool nod? I hear so often of them that they must exist, and must also be trying to their acquaintances. Another trying person is he or she who loves you and forgets the affection as soon as your back is turned. This sort will say the most abominable things of the recently kissed, hold them up to ridicule, and give folks the impression that dislike and scorn wait upon every thought of them. To see the reviler, hobnobbing in the next hour with the people who were slow-going change artists a moment ago.

Nine times out of ten they exclaim: "How can she pretend to like that woman—or he that man—of whom they told me so much?" Now nine times out of ten he and she do really rather like the friend they have abused, so that it should be said, "How can they abuse persons whom they like?" Yet one never hears that remark made, and because, alas! we are so much more prone to believe our friends are wanting than overlooked in the better nights.—Lady Gay in Saturday Night.

The Teacher Got a Letter.

A scholar having broken a pane of glass in a certain school house, not a thousand miles from Clinton, was told by the teacher that it should be paid for, says the Clinton New Era. No threats of any kind were made by the teacher, who was amused and surprised to receive the following note from the pupil's father: 189—March 21.

Dear Sir—Mr. Teacher, my girl as broke this pane of glass and you will give me 5 cents as soon as I can get it but I can make big wages by pulling from—7 cents so you needn't be threatening to whip them or threatening them that they will have to leave school I can be led or advised, but force work and me as fell out you have worked up to such a pitch now the girl is sick and the boy is scared to come to school so let this thing stop now or I will come and you will think it is the best school you ever had. now if you ain't pleased with this write me a slip not be sending me threats.

Mystery of Balm Sleep.

A rather startling theory lately put forward by a young physiologist is attracting considerable attention. This student believes that a gland, or certain glands, in the system secrete a narcotic substance, that this substance is stored in the gland or glands until at definite times—mainly influence by habit and "tiredness" of the individual—it is thrown into the circulation and thereby causes the phenomena of sleep. Further, he suggests that sleep continues as long as the "narcotic" is kept up—until the latter is so far absorbed in or wholly abstracted from the blood by the excreting organs.

The Turkish Fee.

There is only one factory in Turkey. Austria makes nearly all of the Turkish national headgear.

There's One Thing About

"SALADA"

Ceylon GREEN Tea it's all pure undoctored tea, no coloring, no foreign leaves, no dust. It's as far ahead of Japan tea as "SALADA" black is ahead of all other black teas. Sold only in lead packets, 25c and 40c per lb. By all grocers.

Envy eats like an acid. Allow it an hour's work, and a year will not repair its ravages in the soul.

\$10 WASHINGTON D. C. \$10

Grand Easter Vacation Excursions to Washington, Friday, March 28th, via Lehigh Valley Railroad. Tickets good for return until April 7th. Tickets only ten dollars from Suspension Bridge to Washington and return. Good for stop over on return trip at Philadelphia. For further particulars call on Route, S. Lewis, Passenger Agent, 33 Yonge Street, Board Trade Building, Toronto.

The best employed people in the world are those who devote their lives to doing good.

OLD AGE.

Old age as it comes in the orderly process of Nature is a beautiful and majestic thing. The very shadow of eclipse which threatens it, makes it the more prized. It stands for experience, knowledge, wisdom and counsel. That is old age as it should be. But old age as it so often is means nothing but a second childhood of mind and body. What makes the difference? Very largely the care of the stomach. In youth and the full stomach, the body is worn out. It can't prepare and distribute the needed nourishment to the body, and the body, unpurified, falls into senile decay. Dr. Pierce's Golden Medical Discovery is a wonderful medicine for old people whose stomachs are "poor." Its invigorating effects are felt by mind as well as body. It takes the sting from old age, and makes old people strong.

Doing good is, perhaps, the only enterprise in which there is positively no element of risk.

Prussian Oil

is doing its work in this province where ever introduced as thoroughly and purely as it has been doing all over the world. It is curing the ill that people are subject to.

Aches and Pains, Bruises and Sprains, Rheumatism and Gout, Bronchitis, Asthma, La Grippe, Burns and Scalds.

very quickly when used as directed. Many people in London, St. M. St. Thomas, Ridge town and Chatham, testify to its wonderful curative powers and say, "Bade the medicine, and I was had in the house, and I use it and prove it."

Sold by Druggists and Dealers.

Self-trust is the essence of heroism.

WABASH

EASTER RATES

Round trip tickets will be issued as follows:

GENERAL PUBLIC

Single First Class Fare

Going March 27th to 31st, inclusive, returning up to and including April 1st, 1902.

Teachers and Students

(On surrender of standard certificate signed by Principal)

Single First Class Fare and One-Third

Going March 21st to 29th, inclusive, good to return until April 8th, 1902.

Territory—Between all stations in Canada, Port Arthur, Sault Ste. Marie, Mich., Detroit, Mich., and East, and to, but not from Buffalo, N. Y., Black Rock, N. Y., Niagara Falls, N. Y., and Suspension Bridge, N. Y.

W. E. RISPIN, City Pass. Agent.
