They have been profuse in their predictions of the "retaliation" that would follow if we did not promptly surrender at Mr. Wiman's bidding, and acknowledge that Washington is the capital of these provinces as well as of the States. Their hopes of terrifying the Canadian people into consent have, on their own avowal, been largely based on the expected potency of "retaliation" in railnatters. The Chicago Times of Saturday has a letter from "A Merchant," showing how General Wilson's retaliatory proposal would injure American interests. The writer takes the Chicago view, which is, of course, that of the Northwestern States generally. of the President, or of both together, a sudden stop was to be put to the carrying of American freight on Canadian railways. That, it was urged, would soon bring us to our marrowbones, and give an easy victory to Commercial Union.

But there is another party that insists on being heard on this question, and it is going to make itself heard, too. And that is, the people of the Northwestern States. They feel themselves to be a pretty heavy end of the Union now, and they think that their end is quite heavy enough to overbalauce any influence which would deprive them of the teneficial competition which the Canadian railways give them. Of this we may rest sasured, that the whole Northwest of the United States, from Chicago to San Francisco, will rise in rebellion against any such proposal as that made by Gen. Wilson is Congress to amend the interstate Commerce law as to stop Canadian Railways from carrying American freight. That is not going to be done.
