

The Quickaction Chemical Fire Extinguisher

THE GREATEST "SAFETY FIRST" INVENTION
OF THE AGE

The Quickaction Chemical Fire Extinguisher is the result of years of study, and while being the product of a master inventor's mind, is so simple to operate that a child can use it. This new scientific method fights fire in a manner that water has never been able to do. Its method is altogether different and much more effective. The Quickaction, which is charged with a powerful chemical, does its work by chemical action entirely. By air pressure applied through a single stroke of the powerful force pump a strong, swift stream aimed directly at the fire goes straight to the base of the flame. Chemical action then gets in its deadly work of extinguishing the blaze by choking off the supply of oxygen from the surrounding air. Life cannot exist without oxygen; neither can fire burn.

The Powerful Chemical used is Safe, Harmless, Positive. Having secured the agency for this wonderful invention described above, I am prepared to take orders immediately. Goods delivered from two to three weeks after order is taken. The price of the Extinguisher is \$1.50. My plan is to accept 75 cents, or half of the total price, with order, and the balance on delivery of Extinguisher. In this way we both give some security. Those ordering by mail must enclose \$1.00 with order to help pay postage, etc., and remaining 50 cents on delivery.

Hoping the public will see the wisdom of having one or more of these wonderful Chemical Fire Extinguishers in their homes, shops, offices, etc., I will be expecting a fair share of your patronage. Sample shown on request.

Valuable Information.

Deer folks: Now I know why editors go mad. I ben trying to run this paper while the editor is on his vakashun. For three (3) days and nites I ben reading questions and trying to answer them, and if I don't quit I'll be going around talking to myself. I'm going to answer a few more, then go to the ball game —(Jimmie, the office boy.)

1. Do small cows give condensed milk? (Mable B.)

No, Mable. Condensed milk is made by trying to get a quart of milk into a "quart milk-bottle."

2. Please tell me how hash is made. (W. M.)

Hash is not made. It akumulates.

3. Is it right to feed hogs corn-in-the-ear? (G. K.)

No. Put it in the trof and let them help themselves.

4. I am in love with a homely girl who works for us but she don't seem to care for me, while a pretty girl with lots of money wants to marry me? What shall I do? (Will M.)

Marry the one you love and send me the name and address of the other one.

5. My hair is beginning to fall out. What can I get to keep it in?

A sack.

6. Please tell me how to raise a nice fat hog of about 500 pounds.

Get a derrick.

7. How can I tell when the water is the right temperature for bathing baby? (Young Mother.)

If the kid gets red and hollers, the water is too hot. If he gets blue and shivers, it's too cold.

8. I am 40 years old and have a nice little farm, and am thinking of taking a wife. What would you advise? (Old Batch.)

I would advise you to be kerful whose wife you take.

9. Our old red bull is chasing me around a forty-acre field. What shall I do? (Mike F.)

I don't know, but don't give up, Mike. The editor will be back in a week.

His Way.

A Canadian woman wanted to show her Chinese servant the correct way to announce visitors, and one afternoon went outside her front door, rang the bell, and made the man usher her into the drawing-room. The following afternoon the bell rang, and not hearing him answer it went to the door herself. To her surprise he was standing outside. "Why Sing", she asked, "what are you doing here?" "You foolee me yesterday I foolee you today," was the reply.

Some Really Need Them.

On Jonny's first day of school he was given a registration slip on which mother was to write his birth record. The following day he came tardy and without the registration slip. His teacher said: "Johnny, you bring an excuse for being tardy and don't forget the slip about when you were born."

All out of breath, next day, Johnny rushed in, holding out a note from mother.

"Teacher," he gasped, "I brought the one about being tardy, but I forgot the excuse for my being born."

The landlord who refuses to allow children in his house or apartment ought to be brought up short with the curb rein. He is anti-social, anti patriotic, anti-everything. The one great need of this country is more, and still more children.

Minard's Liniment Cures Diphtheria.

Death of Mrs. Delila Cossitt

The death took place at Smith's Cove, early Thursday morning of Mrs. Delila Cossitt, widow of the late James Cossitt, at the advanced age of 81 years. Mrs. Cossitt was born at Smith's Cove, being the daughter of Capt Eben Rice and Eliza Thomas Rice. Her long life was a specially useful one, and she will be long missed as a friend and neighbour by the whole community. She had no children of her own but brought up two sister's children who had been left motherless and to whom she gave the most devoted care. To these two, Mrs Orville Jones, of Digby, and Dr. S. B. McGregor, of Smith's Cove, we extend our deepest sympathy, and also to the brother, Mr J. W. Rice, and the two remaining sisters, Mrs. Cynthia Cossitt and Mrs. Jas. Young.

The funeral which took place from the home of Dr. McGregor on Friday afternoon was conducted by Rev. A. N. McNinth, pastor of the church of which the deceased had been a faithful member during the most of her long life.

Save Your Clover Seed

Two methods may be followed with success by clover seed growers in Nova Scotia. One is to allow the first crop to mature without interference. The other is to cut the first growth about the last of June, not later than the first of July in any case, and harvest the second crop when mature. The second method gives the cleaner seed, for obvious reasons, and probably yields a larger quantity of seed. It will be remembered, of course, that this is not applicable to Alsike, which will not develop a second crop.

The clover should be left standing until the blossom is black and then well cured before storing. In selecting the field to be saved for seed, if the intention is to use the first crop a poorer stand may be selected so as to avoid rank growth of other material, but if the second crop is planned on the richest plot is best.

Great Distinction.

An English lord who had just arrived from England was talking to an American boy. "My grandfather," he said, "was a very great man. One day Queen Victoria touched his shoulder with a sword and made him a lord" "Aw, that's nothin'" the American boy replied. "One day Red Wing, an Indian, touched my grandfather on the head with a tomahock and made him an angel."

LIFT OFF CORNS!

Apply few drops then lift sore, touchy corns off with fingers

Doesn't hurt a bit! Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic.

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.

Lantic Sugar

Do your next winter's marketing now!

Cold weather increases the craving for sugar. Nature's great heat and energy food. Preserve plenty of early berries with Lantic Sugar bought in clean original packages.

2 and 5 lb cartons 10, 20 and 100 lb bags

Safe, Clean Cooking

SAFE, because the oil tank is away from the heat, and because the height of flame cannot vary. Clean, because there are no wicks to smoke or need trimming.

Burners can be regulated to give degree of heat desired, and when not in operation are left completely up out of oil contact. The asbestos lining and dead air space, and glass door of "Success" oven ensure heat retention and visible baking.

An economical cooker and baker, beautiful in appearance.
