## BAIN WAGON COMPANY'S KNEE-BOB

PATENTED JANUARY 12, 1888.

### REASONS WHY OUR SLEIGH IS THE BEST IN THE MARKET.

Because with our Patent Attachment to Hind Bob it is the easiest running Sleigh made.  
Because it will go in and out of pitch-holes without any strain on itself, even when heavily loaded.  
Because it will go in and out of pitch-holes without the hind bolster sliding back and forth on the box or rack, as it does with the old coupling.  
Because with our Improved Coupling it can be backed up the same as a wagon.  
Because with our swivel in coupling it can be used on the roughest roads without any twist to the reach.  
Because with our swivel in coupling it will allow either bob to turn up on its side when loading or unloading logs, without any danger of breaking the reach.  
Because with our improved coupling it can be turned around in its own length.  
Because it is always in line and will track under all circumstances.  
Because it cuts off less than any other sleigh made.  
Because it is well made of the very best wood and iron.  
Because it has a good length of runner and faced with a two-inch steel shoe.  
Because all sleigh makers who have seen our coupling say that it was just what was wanted to make the bob-sleigh perfect, and wonder why such a simple and necessary improvement was not thought of before.
