

# Newcombe pianos and players are exponents of the highest principles in piano construction

Back of Piano showing the Howard  
Patent Straining Rods

## NO OTHER PIANO HAS HOWARD PATENT STRAINING RODS

They give strength to the pianos. They relieve the immense strain of the strings and make a better tone possible. They are of the best steel, handsomely nicked and are an ornament to the instrument, and they do not add extra cost to the piano.

THE  
NEWCOMBE LINE  
is the Helping Hand.

Dealers and their salesmen are always welcome  
at any time at our new headquarters—

**359 Yonge St., TORONTO.**

You will find this location very handy to reach and quite near the other places you will want to visit when in the city.
