THE CANADA BRICK MACHINE.
Patented 1868.

MEDAL and DIPLOMA awarded at the Provincial
Exhibition, Montreal, 1868.

THIS Machine will mould 15,000 Bricks
PER DAY, with the attendance of one man to
put in the Clay, one man or smart boy to attend to
the Moulds, three strong boys to wheel off the Bricks,
and back them up, and a small boy to sand the
pallets

To make SLOP BRICKS, less attendance than the
above will be required.

By an alteration in the relative speed of the pistons
and crown wheel, it will mould

30,000 BRICKS PER DAY.

The Clay can be moulded stiffer than by ordinary
Machines, and the great pressure applied gives more
solidity and strength to the Bricks. They also retain
their shape, and dry much quicker.

This Machine is inexpensive and simple, and is
adapted for either steam or horse power.

If a stone or other obstruction prevents the Moulds
from moving forward, the Machine will not get out of
order, but regulates itself.

Provision is made for giving the pressure required
for soft or for stiff Clay.

The corners are always well filled, and the Bricks
turned out will all be fit for front work.

It is undoubtedly the most perfect and suitable Ma-
chine for making Bricks yet introduced into use.

NINE of these Machines worked by steam, and
TWO by horse power can be seen in actual operation
at the Steam Brick Manufacturing Establishment of
the undersigned, head of Fallow Street, Montreal.

THE CANADA AUTOMATIC BRICK MAKING
MACHINE is manufactured and for sale (with the
right of using it) by the Patentees

EXCLUSIVE application is given to the
COMMISSION BUSINESS, and personal atten-
tion bestowed on each transaction. The utmost
promptness in sales and returns is uniformly observed.
The lowest scale of Commissions consistent with re-
sponsibility is adopted, and due care taken to avoid in-
cidental charges when practical. Consignors are kept
regularly advised by letter, circular and telegram, of
all matters of commercial interest. Consignments
designed for sale in any of the several British or
American markets will be forwarded to strictly re-
liable agents, and advances granted without expense
beyond actual outlay.
