Miscellaneous.

The following exchanges have been received.—*The Cincinnati Lancet Clinic*, *The Medical and Surgical Reporter*; *The Times and Register*; *The Quarterly Journal of Inebriety*; *The New England Medical Monthly*; *The Buffalo Medical and Surgical Journal*.

OWING to pressure upon our space we have been unable to give the excellent address of Dr. C. T. Campbell, Vice-President of the Council on Medical Legislation in Ontario, it will appear in our next issue, and is deserving of a careful perusal by all those who desire to become thoroughly posted on Council proceedings.

ACROLOZONE "Harvey," manufactured in this city, is a somewhat similar but much more stable preparation than hydrogen peroxide. It is a powerful antiseptic and can be used with greater freedom than the peroxide owing to its being unirritating. It is of particular value as a wet dressing for ulcerated surfaces; serviceable in cases of chronic suppuration, and simply invaluable in diphtheria. It is also being administered in teaspoonful doses in certain cases of dyspepsia.

THE Johnston & Johnston Co., (Ltd.), desire to draw the attention of the profession to the price list of new remedies and rare alkaloids, which appears on page vi of this issue. Heretofore it has been difficult to obtain many of these preparations, and we have no doubt that the profession will be gratified to learn that there exists a convenient depot for the supply of those chemicals that are only occasionally used.

THE attention of our readers is directed to the line of carbonated waters on page iv. McLaughlin's Hygeia Waters are recognized by the medical profession to be the best of their kind in Canada. The carbonic dioxide gas used in their aeration is generated from Brunner, Mond & Co.'s, 98 per cent. pure soda bicarbonate, which, as a source of gas, is immeasurably superior to the prevalent marble dust and whiting with their earthly impurities. The waters are supplied in bottles and syphons, but the syphon form is the more popular with the public as it involves no waste, the water remaining fresh until used. The waters most generally used are Seltzer, Vichy, Double Soda, Carbonic and the B. P. Soda, Lithia and Potash.

DIARRHOEA MIXTURE.—The following is a good astringent formula which may be used to relieve the diarrhoea prevailing about the period of cholera epidemics.

R Tinct. kino	ʒ iv
Tinct. catechu co	ʒ v
Tinct. opii	ʒ ii
Spt. ætheris	ʒ iii
Mist. crete	ad ʒ vi

S. Take one tablespoonful after each liquid stool, the bottle have been first shaken.—*Hill's Dictionary of Treatment*.

Births, Marriages, Deaths.

BIRTHS.

PRIMROSE.—On August 9th, at 196 Simcoe Street, the wife of Alex. Primrose, M.B., Edin., of a daughter.

SMITH.—On 24th July, the wife of Dr. Harley Smith, Spadina Avenue, of a daughter.
