

# QUINQUINIA.

Manufactured by the Charles T. White Co., New York.

The Alkaloids of Cinchona Bark before Isolation — Fifteen per cent. of Quinia; fifteen per cent. Quinia; fifteen per cent. Cinchonidia; twenty-five per cent. Cinchonina; and thirty per cent. of Chinoidine (purified Alkaloid).

## ELIXIR QUINQUINIA,

(One Grain in each Fluid Drachm.)

## COMPRESSED TABLETS OF QUINQUINIA,

(In two and Five Grain Tablets.)

## ELIXIR QUINQUINIA, IRON AND STRYCHNIA,

(One Grain Quinquinia, Two Grains Iron, One-sixtieth Grain Strychnia in each Drachm.)

*Manufactured by JOHN WYETH & BROTHER. Philadelphia.*

We ask the attention of physicians to this natural combination of the alkaloids of Cinchona Bark, having satisfied ourselves, that it actually possesses the properties and advantages claimed by CHARLES T. WHITE & Co., the chemists who manufacture it, and brought it to the notice of medical men. It has been long used in hospital, dispensary, and private practice, with uniformly good results, the pamphlet they issue giving many testimonials to that effect, from leading physicians, in the United States. The experience of these physicians, whose published statements, in regard to its antiperiodic and tonic effects are so satisfactory, is daily confirmed by letters received from others, who have tested it more recently. In addition to the data given by them, we have received from our representatives, who come into personal contact with so many doctors all over the United States, most convincing proofs of the admirable therapeutic results, arising from its administration, the claim being urged positively, that, grain for grain, it is as efficient as Sulphate of Quinine, with the advantages of not being nearly so apt to induce cerebral excitement, and, of proving more lasting in its antiperiodic influence, a superiority always claimed for the mixed alkaloids and the bark over the single salt, and, we believe, deservedly. So confident are we of the great value of Quinquinia as manufactured by this firm, that we have secured their entire product, believing that as soon as its merits are generally known, it will be preferred in a large majority of cases to Sulphate of Quinine or Cinchonidia, being, at least, their equal in therapeutic value, with the important advantage, that we shall be able to supply it at a much less cost. Implicit reliance can be placed on its always being furnished of exact strength and uniform quality by the chemists who prepare it, the entire line of chemicals they manufacture being unexcelled—rarely, indeed, equalled—by the products of any laboratory in the world. We shall be glad to send their pamphlet, giving full details of clinical reports, etc., etc., and sufficient of the compressed Tablets of Quinquinia, to test their merits by actual use, to any physician who may desire them. As we are unable to send the Elixir by mail, we will take pleasure in sending by express a sample of either, with printed matter, etc., to physicians who will pay charges.
