

THE PACIFIC RAILROAD STRIKE. The Volunteers, and the Strikers—Continuing Opinions of the Winnipeg Papers—The Strike Ended.

WINNIPEG, Man., May 10.—The newspapers here give full accounts of the Pacific Railway strike. The Free Press special correspondent says: "The Volunteers arrived at Cross Lake at 7.15 o'clock last evening. About 75 men were standing at the station when they arrived. The volunteers formed, and Captain Breerton, the stipendiary Magistrate, immediately had five of the ringleaders arrested. They made no resistance, and on being handcuffed said, 'Now we are in the hands of the law, we'll get justice.' They were placed in a box-car for safety, the other strikers at once leaving the place. The volunteers occupied the boarding houses and offices for the night, sentries being posted, it being conjectured that the comrades of the arrested men would make an attempt to rescue them, which a small number ineffectually did at 3 o'clock this morning. The alarm sounded as a dark moving mass was seen coming round the curve of the road, which was soon ascertained to be a large body of the strikers. The military were ordered to fall in as 300 of the strikers rapidly approached in a solid mass. Lieut.-Col. Smith ordered them to halt, when one of them asked him what his authority was and used some insolent remarks. Most of the strikers were armed with sticks and some had revolvers. The sticks were flung, and those in rear shouted to those in front to advance. The military was placed in position to repel an attack and a second time rounds of ammunition were served out. The strikers showing a disposition to advance, the volunteers were ordered to load with ball cartridges. At this critical moment the officers and soldiers never flinched. If they had the result would have been serious. Captain Breerton then read the Riot Act, which, with the firm stand of the volunteers, mollified the strikers, who said all that they wanted was their pay. Charles Whitehead assured them that the would commence paying them to-day, and they would be paid up to the time they ceased work. They wanted to know if they would be charged for the grub consumed, and were answered "Yes." They then retired for breakfast. Twenty men who were working on the steam shovel were sworn in as special constables. A large number of the men returned and were paid off and will come to Winnipeg to-night. The others remain on the works. The men who were paid off are all from different Provinces, and claim to have many grievances. Some of them will go directly home. No damage has been done to property, except provisions taken by the men. The trouble is now apparently over, though the military are not expected to return home for four days yet.

Robinson's Phosphorized Emulsion of Cod Liver Oil with Lacto-Phosphate of Lime.

The Hamilton Spectator having pointed out that the Redpath's had reduced the price of sugar the Times replies "Possibly they have, but does it occur to our contemporary that there is a method in this reduction? Are they not threatened with competition (mighty weakly yet, we know) from Halifax and St. John?" Here is the contention of the protectionists, that protection would ultimately reduce the price of all articles to the lowest living rates practically admitted. If the threat of competition and that threat a "mighty weakly" one compels Messrs. Redpath to reduce their prices what will actual live competition do.—Toronto National.

Weber's Letter to the People of the Dominion.

We received on Friday a very curious letter from Mr. Albert Weber, the great piano manufacturer of New York, in which he alludes to a report circulated in Canadian papers that he was about establishing a piano factory in Kingston, and naively asks if the Weber piano factory already there, is not enough for our people. He states a few facts concerning this factory which a few years ago discarded the original name of his piano and adopted that of the "Fox." Finding, he says, the "Fox" did not thrive, in due time they procured a person named Weber, who consented to allow his name to be used on the piano, and therefore the "Fox" was changed to the "Weber" without his consent. He complains that the placing of his name on the instrument has been a great loss to him as far as trade is concerned, and he bitterly protests against this act of the Kingston Company, and earnestly appeals to the honesty and love of fair play of the Canadian people, reminding them that they belong to a nation pre-eminently honest, detesting all sordid and spurious imitations, and advising the Kingston factory, now that they have Protection, to drop his, and adopt their own name. "If," he says, "they make a good piano the glory will be all their own, and if not why should his name be used to palm off the instrument on the public?" He enters into details to show the amount of labor and capital it has cost him to perfect an instrument that is the popular favorite of every musician and leading pianist in world, and feels it hard to have his good name filched from him in our Dominion where the Bible and Shakespeare are supposed to be read and understood. "Those," he says, "who follow the teachings of these great books of revelation and of nature, will not build upon another man's foundation, nor rob another of his good name." We hope his suggestion will be followed, and the cause of his complaint removed. Our manufacturers should learn to build up their own reputations. The letter is characteristic of the man who wrote it, and there is no doubt that he has great cause for complaint, and some measures should be taken for redress of the wrong that has been done him.

Credit Valley Railway Accident.

TORONTO, May 12.—At the morgue to-night, the inquest on the body of James Gooderham was continued. The first witness called was Mr. Wm. Houston, of the Globe, who told how the collision occurred; he was in the car, but escaped without injury; shortly after the collision he came out of the car and saw Mr. Gooderham lying beside the track, apparently

dangerously injured; Dr. Wright was attending the wounded man; witness did not see the engine-driver nor the watchman. Mr. John Leys said he was standing near the Credit Valley car, waiting for the engine to come from Toronto; he heard the engine whistle, but did not see the switchman open the switch; saw the engine leave the Grand Trunk Railway line, and collide with the Credit Valley line and collide with the directors' car; saw several of the wounded lying on the ground among them Mr. Gooderham, whose legs had been crushed; deceased frequently spoke of his father, and said that he would not recover; he did not attach blame to any one for the accident; witness accompanied deceased home. Mr. Pardoe stated that immediately after the accident he accosted the engineer, and obtained from him the following facts, which he noted down on an old envelope:—"J. Cross, orders to go to Carlton to cross No. 3; if switch had been left alone, it would not have happened; fifteen miles an hour; did not know Credit Valley line; expected to get orders at Carlton."

Note respecting Credit Valley line meant engineer did not know anything about the Credit Valley line, which was in reply to a question by Mr. Pardoe if the engineer knew he was coming for the excursion train. Mr. Pardoe also stated, when he saw the engine approaching on the track of the Credit Valley Railroad, it was swaying from side to side. The jury will visit the scene of the collision to-morrow, and will meet again at 7 in the evening. Mr. P. D. Conger, who was injured at the Valley switch, is reported as sinking fast. In addressing the jury, the Coroner made severe comments on an editorial in this morning's Globe, which he characterized as an attempt to judge the case before it had been laid before the jury.

Mr. James Bethune, Q.C., appeared in the interest of the Grand Trunk Railway, and Mr. Lockhart Gordon for the Credit Valley Railway.

Redpath's Sugar Manufacturing.

The Hamilton Spectator having pointed out that the Redpath's had reduced the price of sugar the Times replies "Possibly they have, but does it occur to our contemporary that there is a method in this reduction? Are they not threatened with competition (mighty weakly yet, we know) from Halifax and St. John?" Here is the contention of the protectionists, that protection would ultimately reduce the price of all articles to the lowest living rates practically admitted. If the threat of competition and that threat a "mighty weakly" one compels Messrs. Redpath to reduce their prices what will actual live competition do.—Toronto National.

Robinson's Phosphorized Emulsion of Cod Liver Oil with Lacto-Phosphate of Lime. It is the most esteemed remedies in the catalogue of the "Materia Medica." Lacto-Phosphate of Lime, which enters so largely into the formation of bone matter and other important tissues of the body,—Phosphorus, the great brain and nerve tonic and invigorator. In a form and combination most desirable to obtain its fullest effects, together with other powerful remedial agents, not the least of which is Iron, the great blood-producing element. These are all intimately combined in one demulcent fluid of homogeneous composition and delicate flavor, possessing remarkable power in arresting the decay and supplying the waste constantly going on in those abnormal conditions of the system affected by such diseases as Anemia, Malnutrition, vitiate the blood, and sap the vital forces. It is highly recommended for Consumption, Chronic Bronchitis, Coughs, Scrophulous, Scrophulous and Syphilitic Ulcers, Tumors, Diseases of the Bones, Joints and Spine, General Debility, Emaciation, and all impurities of the Blood. It is particularly adapted to debilitated Females in those low states of the system that manifest themselves in so many of the ailments peculiar to their sex. To the aged and infirm its nourishing and invigorating properties will give renewed energy and buoyancy of spirit; and to very young children its continued use will be found of incalculable benefit, as its tonic and nutritive properties supply the materials for the growth and development of bone and muscle structure, and thus furnish the foundation for strength and healthy constitutions. It is very pleasant to the taste. Prepared and sold by J. H. ROBINSON, Pharmaceutical Chemist, St. John, N.B., and by sale by Druggists and General Dealers. Price, \$1 per bottle; six bottles for \$5.00.

AGE OF ENLIGHTENMENT.—In an age of enlightenment like the present, the value of electricity, and of compounds containing an electric principle as remedial agents, is widely appreciated. Foremost among the latter, both as regards the thoroughness and safety of its effects, and the rapidity of its action, is THOMAS' ELECTRIC OIL, a widely popular external and internal remedy for coughs, colds, sore throat, asthma, croup, and other affections of the breathing organs; an invaluable outward specific for lame back, soreness and contraction of the muscles, and every variety of sore or hurt; a prompt source of relief for pain, and a medicine upon which the public can also implicitly depend in cases of rheumatism, neuralgia, piles and kidney complaints, inflammatory affections, dysentery, and many other ailments. Its persistent use eradicates the most obstinate of the disorders to which it is adapted. Physicians speak of it in the highest terms. Moreover, horsemen and stock raisers administer it with the greatest success for diseases and hurts of horses and cattle. Sold by all medicine dealers. Price, 25 cents. Prepared only by NOR-THROP & LYMAN, Toronto, Ont.

Finance and Commerce.

Items. May 11.—Incoming steamships report about forty vessels between Antwerp and Quebec. —The imports at New York during April were \$28,000,000, against \$29,750,000 during the preceding April. —The first cargo of Liverpool salt per ship "Callistebanus" sold in Quebec yesterday at 48 cents per sack, 10 to the ton. —The April earnings of the Chicago & North-western Railway are estimated as showing a decrease of \$100,000 from last year. —Messrs. Spring wheat advanced 2d to 3d; winter wheat advanced 1d. Montreal Horse Market. May 10th, 1879. The state of the above market this week has been very satisfactory to buyers. Large numbers of horses have been exposed for sale at extremely low prices. A number of dealers are in town who intend making large purchases. The opening of the Corporation Horse market in College street occurred yesterday, and a fair number of sales reported. The exported horses this week are as follows:— On May 3rd 1 horse sold for \$200; May 4th 19 horses brought \$1,850; May 6th 18 horses sold for \$1,495.50; May 6th 4 horses changed hands for \$324; also one fine stallion for breeding purposes sold for \$200; 20 horses for breeding purposes brought \$500; 10 horses at \$1,223; 5 horses \$388.50; 10 horses at \$1,481; 21 horses \$988.50; 14 horses \$811; 21 horses \$1,544; 19 horses 1,488; May 9th one beautiful horse brings \$350; On the same day 15 horses were exported for \$1,205. Viger Cattle Market. May 13, 1879. The receipts of live stock at this market yesterday included 100 head of cattle, 200 calves and 100 sheep. The prices realized were, for first-class cattle, \$5.50 per cwt; 2nd, \$4.50; third, \$3.50. Calves were sold at from \$2.50 to 6.00, according to size and quality; and for sheep \$6 was paid for first; \$4.50 for seconds, and \$3.50 for thirds. The above shows an advance of 50c per cwt on last week's prices for beefs. To-day there were not many fat cattle offering; about 60 which cows arrived, but there were not many buyers present, and prices, though fair, show no quotable advance on those of last week. First-class milk cows sold to-day at \$35 to \$45 for second-class, \$15 to 20, and a few of very inferior quality changed hands at \$12 to 14. St. Gabriel Cattle Market. Monday, May 12. The receipts at this market to-day comprised 20 carloads of cattle, nearly all of good quality, one carload hogs, and a few first-class sheep. There was a good attendance of buyers, and nearly all offering was sold at top prices for the English market. Cattle brought \$4.75 to \$5.50 per cwt. for first-class, and \$4 to \$4.50 for second-class. There were not many sheep offering, but all were sold for \$5 to \$5.25 per cwt, and for live hogs, \$5 to \$6.25 was paid.

The Montreal Hay Market. May 10th, 1879. No alterations are expected at this market until the crops are in. The demand this week has been large. Anticipations of hay becoming higher. Dealers report business to be brisker. During the week about 200 loads of hay and straw were exposed for sale. The quotations are as follows:—Hay per load, from \$9 to \$10.50. Mill threshed straw, from \$4 to \$6; stall threshed straw, between \$6 and \$7. No classification for hay. Russian Habits and Vices. One of the most ruinous habits of Russian peasants is displayed at marriage celebrations. A peasant, to celebrate the marriage of his son, procures twenty-five gallons of whiskey, to get money for which he sells his horse, cow or pigs, and is ready to become a pauper. He cannot resist the practice, for custom requires that the population of the village—men, women and children—must get drunk. A rich peasant at the marriage festival will procure one hundred gallons of whiskey, and the neighboring villages are invited to take part in the carousal. The Only One That's Thorough. It is a fact not generally known that the various cathartic medicines each attack only a special point in the alimentary canal. The only one that cleanses it throughout is Castor Oil, but the nauseous taste and smell of this invaluable purgative arouse, in most people, an invincible repugnance to its administration. Even those who best understand its mild yet thorough cathartic action and its marvellous healing powers, shrink from taking it, and yet Castor Oil is made not only inoffensive but actually palatable. You will find it so in Scott & Bowne's Palatable Castor Oil. Price, 25 cents a bottle. 129-413.

COUNTRY PEOPLE! That are coming into the City of Montreal to purchase Overcoats, Suits and Ulsters, are invited to call at A. BEATTY'S, 190 St. Joseph Street. Such goods as we have in our line never were known in the Dominion, or our cheap sales of ready-made Clothing. We have sold more Overcoats this Fall than all the other houses together. Our sales of Overcoats were over 100 a day.

Applications to Parliament. The testamentary executors of the late Hon. able Joseph Masson, here give notice that they will apply to the Legislature of the Province of Quebec, at its next session, to obtain an Act authorizing them to build warehouses on the streets of Montreal, and to acquire the site of their property situated in the city of Montreal, at the corner of Port and Common streets, and designated as the official plan and book of reference of the cadastre of the west end of the city of Montreal, under number five (5), without being submitted to the dispositions of an act passed on the twenty-seventh and twenty-eighth of March, 1878, and of the Act of the twenty-sixth of any other law, statute or by-law authorizing the sale of City of Montreal to have plans or maps of the streets prepared for each block of the city, and without being submitted to the conditions imposed by such acts, statutes or by-laws depriving the proprietors of all indemnity of the buildings which they may construct, without conforming to such plans or maps. Montreal, 2nd April, 1879. GEOFFRION, KINFRET & DORIX, Attorneys for the said Testamentary Executors.
