DISCRESHING THE CONSERVATIVES ALLEGED IRISH POLICY.

Lossion, Oct. 11,-The Freeman's Journal describes the alleged Tory Home Rule scheme as a deliberate plan to split the National League organization and minimize the national demand. The Irish Times pronounces the story that the present Government intend to propose a Home Rule bill is so palpable a canard that it is a wonder any journal could have been deceived by it. Conservative newspapers avoid direct mention of the Daily News' statement that the Government will introduce a bill giving four provincial councils to Ireland. The Standard refers to a big gooseberry revelation of important Cabinet secrets before ministers themselves have arrived at any decision. The Times attributes the Daily News' story about the Government's intentions relative to Ireland to the despair of the Gladstonian and Parnellite parties over the growing power of the Government and Uniquist cause and the failure of the tant war through the inclina-tion of the landlonde to offer and tenants to accept reasonable remissions

A NARROW ESCAPE.

PERILOUS POSITION OF A YOUNG MAN ABOVE NIAGARA FALLS.

NIAGARA FALLS, October 5.—The town is all excitement over a thrilling accident that occurred here this evening. Charlie Robinson, a young man 17 years of age, a resident of Niagara Falls, N.Y., left the Scholasser Club house, on the river, about two miles above here, in a small boat to come home. By some accident he lost his course and got into the rapids, where his boat cap-sized and he was whirled in the angry torrent towards Bath island, near the site where the Petabone Paper mill stood. together with its piers and water dams, since demolished by the Niagara state reservation. and Robinson was dashed against one of these and grasped it. He managed by all the power he possessed to get his legs around it and hold himself fast. The news of the accident was soon spread. Tom Conroy, Jack McCloy and John Haines, com-monly known as "Sailor Jack," nothing daunting, volunteered their lives to save that of a fellow being. They took a rope and waded out into the broken down piers and into the rapids above Goat Island bridge, where the water was shallow, and after feet. Robinson managed to get hold of it and fasten it around his body. He then let go his hold of the iron rod. The current soon swept him past the brave fillows who held the line, and he was quickly dragged to them. He was lifted from the water at 10 o'clock com-pletely exhausted, and carried safely to shore. Had it not been for the courage of the stout men, the young man in a short time would have been swent over the falls.

AN AMERICAN ON THE EASTERN QUESTION.

New YORK, Oct. 11. -In an interview, Hon. S. S. Cox said the grandest educational institution in Turkey was the American college. The students were principally Bulgarians, with a aprinkling of Armenians, Greeks and other nationalities. The lessons of popular and personal liberty as illustrated in America are taught therein. Many of the alumni, especially from Bulgaria, leavened the dough of Bulgarian politics. There students have been the mester-minds in the recent movements in Bu'garia by which Prince Alexander attained prominence I am very much mistaken if Russia will not fin it a very difficult matter to overwhelm this popular element. Now, how this question may be settled without involving Europe in a gigantic war is a difficult problem to solve. The English Minister who foiled the attempt of Russia after Prince Alexander's avnexation of Eastern Roumelia to Bulgaria in September, 1885, was Sir Wm. White. When I left Constantinople the Russian and German ambassadors, who dread the coming of Sir William White, were moving heaven and earth and the powers under the earth to prevent his reception by the Sultan. If Turkey should throw herself under the legis of Russia she would pursue a sacerdotal policy. If Russia is allowed to establish her influence in Bulgaria and Rou-melia the independence of Turkey is at an end.

THE TORY HOME RULE SCHEME.

UNITED STATES CROPS. REPORT OF THE DEPARTMENT OF AGRICULTURE FUR OCTOBER.

WASHINGTON, Oct. 11.—The report of the Department of Agriculture for October gives local estimates of the yield per acre of small grains, with the condition of corn, potatoes and other late crops. The results corroborate the previous returns of wheat, confirming the expectation of a slight increase from the first record of threshing, without making any very material addition to the crop aggregate. The average yield upon an area of fully thirty-seven million acres appears to be close to 12; bushels per acre, making the crop an average of a series of years. [From the New York World.] The great success of the Knabe Pianos is alone due to their brilliant and superior qualities for harmony, sweetness of tone, great power, and a thorough equalization throughout the entire scale, as well as their pliant touch. They are universally pronounced by the press and the musical profession as being unsurpassed by the instruments of any other maker. One of the most prominent qualities of the Knabe Piano, and one which is generally overlooked by the purchaser, is the superior workmanship that characterizes them, and it is conceded that they will retain their tone, and the general usages of wear, far beyond those of any other first-class

TORONTO WHOLESALE MARKETS. Business during the past week has been fairly active.

GRAIN.—The market is extremely quiet,

and values inclined to be easier. Wheat is unchanged and dull; barley has gone lower and is weak at the decline. Oats are quiet, but rather easier; peas altogether nominal; core and rye unchanged.

HIDES AND SKINS.—An active demand exists for hides and prices well maintained.

Prices obtained by dealers are 95c for cows

in car lots and he more for steers. There is a fair supply of sheepskins and they are readily taken at quotations. Calfskins are very dull, as they have been all season. Tallow is dull at 41c to 41c for rendered. PROVISIONS.—Trade has been quiet during

the week, with an easier feeling developed in hog products. Stocks of these are so light here that the decline is less felt. We quote hams, smoked, 13c to 14c with green half cent less; long clear, 8½0 to 8½0; mess beef is held at \$10.50 to \$11.00; choice butter is scarce and in active demand at 17c, poor is neglected. Cheese is higer, finest jobbing at 12c; the cable is 56s to-day. Nothing is doing in dried fruits; eggs are in good request and higher, being quoted at 17c to 18c by the case. The hop market is tolerably steady, a choice article of 1885 growth brings 23c to 25c. The new crop is considered a failure.

shipping season being over Strictly fine "timothy is not far out of the way at \$5,50 per cental; flax seed is nominal at quotations. Wook.-There is scarcely any special fea-
