

THE PNEU-MA-CHEMIC MULTIPLE COMMINUTER

The Ideal Apparatus for Office Practice.

This apparatus, just recently perfected, is the most useful scientific and efficient invention ever offered to physicians for the direct application of remedies to the respiratory tract, and other cavities of the body, and for the administration of anesthetics, etc. It is also the most unique, novel and artistic apparatus any doctor can have in his office.

It is called a comminuter because, by a mechanical process, it reduces the substance acted upon to such infinitesimal particles that it is transformed from the liquid state to the condition of a visible elastic fluid. In this state it is projected through the flexible tube in great volume, and with whatever force it may be desirable or necessary to reach the respiratory tract, eyes, ears, the rectum, vagina, or other passages, cavities, or surfaces of the body, in the most effective manner. Six different prescriptions or single remedies can be put in the apparatus and used separately, or in any desired combination, without changing the medicines or removing the flasks.

Medicine insoluble in each other, or even chemically incompatible in the liquid state, can be administered in perfect combination, without precipitation or decomposition.

The complete apparatus is 30 inches long, 17 inches high and 7 inches wide at the base. It is elegantly finished in nickel, hard rubber and flint glass, with polished hardwood base. All parts are of the best workmanship, and so constructed as not to get out of order. It can be used in connection with any compressed air receiver.

Full directions and many valuable formulæ that have been used successfully with the Multiple Commiuter, by well-known physicians, furnished every purchaser.

Considering the scientific and expensive construction of the Multiple Commiuter, the perfection of its operation, efficiency, utility, convenience, economy of time and medicines, and many other advantages, it is the cheapest apparatus offered on the market. Physicians who are using it have informed us that it has paid for itself in a few weeks.

Ask your instrument dealer or write for full information to the manufacturers.
