

"The Premier Road Dressing & Binder"

Fluxphalte

"FLUXPHALTE" is a heavy road oil containing 80% of solid pure bitumen combined with sufficient liquid to bring it to a proper consistency for road dressing. It is absolutely free from greasy oils.

"FLUXPHALTE" remains a part of the road—it doesn't flake or blow away. It builds up a true asphaltic surface that outwears a number of applications of inferior products.

"FLUXPHALTE" is spread on roads by our special "FLAPPER" Machine which is highly efficient. This machine is loaned to municipalities using our product.

The Problem of the Road Engineer

Road Engineers are always faced with the two-fold problem:—

1.—The prevention of dust.

2.—The maintenance of roads to meet the new conditions.

Much attention has been given to the subject and various materials have been used, but engineers have long sought for a material, which, while acting as a dressing in preventing the dust, would also add to the durability and wearing quality of the road.

The best municipal engineers of to-day are using "FLUXPHALTE" for the following reasons:—

"Fluxphalte" is an Asphalt Macadam Binder, produced from the vast natural oil resources of Mexico, by refiners who have spent years of careful investigation in perfecting the methods of refining, aided by the best available experts.

It is absolutely free from greasy oils

and has demonstrated its superiority over all other dressings in the following points:

PERMANENCE.

Has remained a carpet on the road surface long after tar, applied at the same time had disappeared.

SILENCE.

This bituminous carpet on the road surface is plastic, resilient, silent, and non-slippery.

CEMENTING POWER.

It penetrates the road surface and binds the metal.

NON-POISONOUS.

It contains no poisonous elements to contaminate streams or rivers, with consequent danger to fish life.

COST.

Practically as cheap as tar, and the many so-called asphalt and bituminous binders.

"FLUXPHALTE" is as easily applied as any binder, and gives far better results
