HAMILTON HAPPENINGS

VINEGAR WORKS BURNED
LOSS REACHES \$20,000

Firemen Had Sharp Battle With
Flames—Factory Likely
to Be Rebuilt.

HAMILTON, Jan. 14.—(Special.)—Fire destroyed the plant and building of the Dominion Vinegar Works at 41 Stuart-street west Saturday afternoon. About \$20,000 of the stock was saved. The loss will be about \$20,000. Insurance to the amount of only \$5000 was carried on the business. F. H. Yepp, owner of the vinegar works, stated to-night that the plant would probably be rebuilt. The temporary use of the old customs house building has been secured, in which to carry on the business in the meantime.

Small Blazes.
An overheated stove set fire to the frame house at 23 Chatham-street yesterday afternoon and did \$200 damage. Another blaze at 117 King-street west at five p.m. Saturday, destroyed a valuable painting, and at 7:50 o'clock this morning the firemen were called to a small fire, which did little damage.

Hotel Hanrahan, corner Barton and Catharine-streets, Hamilton, conveniently situated and easily reached from all parts of the city. Erected in 1908. Modern and strictly first-class American plan. Rates \$1.50 to \$2.00 per day. Thos. Hanrahan, proprietor. Phone 1465.

VADUCT AND BOARD OF
CONTROL RECOUNT TO-DAY

At 10 a.m. to-day a recount of the vote on the Bloor-street viaduct by-law and the board of control contest will commence before Judge Winchester in the city hall. The final result will in all probability be known within two days.

It will be remembered that the viaduct was only beaten by 59 votes, according to the official figures of the city clerk. The figures compiled unofficially at the night of the election, gave the by-law a large majority, but it was found later that a mistake of 3000 had been made in adding up the votes in Ward Two. There is a chance that the recount may prove that the by-law has carried.

It is scarcely likely that the recount will result in any change in the board of control contest. Ex-Controller Spence, who asked for the recount, was the fifth man in the race, being 226 votes behind Controller Church. Last year Mr. Spence obtained 280 more votes than Controller Church.

The rule is that the applicant for a recount would deposit \$100 as security for costs. This is returned if the result proves the appellant upheld.

WATER SUPPLY IMPROVING

About six feet of water remained in the reservoir yesterday, and hence conditions are the same as last week. The danger of a water famine still exists.

Assistant City Engineer Fellows stated yesterday, however, that conditions would be somewhat better to-day, as the consumption of water on Sunday was never as great as on a week day.

LINER SHEATHED IN ICE.

HALIFAX, Jan. 14.—With her forward deck and hull covered with ice two feet thick, the Italian liner, with 1000 passengers for Philadelphia via St. John's, Nfld., put in the port this morning. She was four days out on the route from St. John's, which should have been made in 48 hours.

The Corinthian left St. John's in a blizzard and there was no let up till Halifax was reached. Ex-Admiral Cape Pine her stern gear broke down and for three hours, while it was being repaired, the ship was steered by hand, comparatively little difficulty being experienced in this.

Two Coaches Ditched.
TOLEDO, O., Jan. 14.—Fifty passengers on Big Four train No. 1 from Detroit to Cincinnati are reported to have been hurt in a wreck which occurred early this afternoon four miles south of Carey, Ohio. Two of the day coaches left the track on account of spreading rails. These two cars went into a ditch alongside the track.

SUNDAY SLIDING
STERS BOONIE TERE
Asserts Rev. C. O. Johnston,
Yesterday—Minor Mishaps
and Serious Injuries Spoil
Pleasures of Many.

All records were broken at the High Park slides on Sunday afternoon, when 15,000 tobogganers were on hand to take advantage of the hills, which were never in better condition. All day long a procession of tobogganers could be seen shooting down the icy incline, and traveling across the slender pond. About three o'clock in the afternoon the crowd was at its largest.

Genadier Pond was also an attraction and the skaters were there in great numbers. Some complaint was made, however, that the skating area was too small. The south end of the pond was practically the only part that was free from snow, and this will soon be taken from skaters, as the ice companies will begin shortly gathering in their crop of blocks.

The enormous crowd at High Park yesterday was largely due to the advertising slides received thru the protests of the Ministerial Association last week. Mayor Geary's opinion to the effect that tobogganing should be permitted on Sunday and the fact that no objection was raised by the board of control reminded people that there was plenty of Sunday amusement to be found in High Park.

Several slides were well patronized. The different rinks under the supervision of the parks department, also presented a holiday appearance. It is even rumored that many of the younger generation went skating and neglected to go to Sunday school, but these statements have not been verified.

Three or four rather serious accidents occurred, and, owing to the big crowds, minor mishaps were frequent, but besides and broken toboggans being the chief result of most of the mishaps.

While sliding in Riverside Park yesterday afternoon, little fifteen-year-old James Banks, 805 Danforth-avenue, fell and broke his right leg shortly after four o'clock. He was removed to his home in the city ambulance.

While walking on the ice at Grenadier pond, Arnold Shelley, 207 Sorauren-avenue, was knocked down by a toboggan coming down the slide and sustained a broken leg. He was attended to by Dr. Dunken of Roncesvalles-avenue and taken home in the city ambulance.

Frank Kemper, 21 Silver-avenue, had four ribs broken while tobogganing on slide No. 1, High Park, about 4:30 o'clock. He collided with a hand sled and was thrown off onto the snow. He was attended to by Dr. Dunken and removed to the Western Hospital. Others on the toboggan were unhurt.

HE REFUSED CHAMPAGNE.

At a dinner party the other evening a hostess was much surprised to notice that one of her guests, a well-known "bon vivant," refused champagne and asked if he might have a little red and radnor. He explained, however, that he found that Radnor Water blended so deliciously with Canadian whiskey that he preferred it to any other beverage.

SLIPS INTO BOILING WATER

William Murphy, an employee of the Police Ice works, fell into the boiler while working in the Toronto Star Building on Saturday night. He was several feet under the water in the boiler room and found it necessary to empty the water out of the boiler tank into a hole in the floor. A few minutes afterwards Murphy missed his footing and stepped into the boiling water. He was rescued in the city ambulance to his home.

PORTUGAL KING TO MISSIONARIES.

LISBON, Jan. 13.—(Can. Press.)—The government announces that the American, German and British missionaries will be allowed to remain in Portuguese East Africa. This decision was taken after conferences had been held with the diplomatic representatives of these three countries here. Portugal, however, has decided to establish its own missions in Africa, to counterbalance the influence of foreign missionaries.

The Double-track Way to Montreal.
The Grand Trunk Railway System. This, however, is but one of the many attractions of the Grand Trunk route, as the modern electric-lighted Pullman sleepers, excellent dining car service, up-to-date parlor-library cars and comfortable vestibule day coaches well deserve your patronage. Four trains leave Toronto daily, 7:15 and 9:00 a.m., 8:30 and 10:30 p.m. Remember, the Grand Trunk is the only double-track route.

Secure your tickets, berth reservations and full information at City Ticket Office, north-west corner King and Yonge-streets, Phone Main 4208.

Will Speak on Bible Critics.
Rev. J. Peters Smyth, pastor of St. George's Church, Montreal, will lecture at St. Simon's Church, Howland-street, on Wednesday evening at 8 o'clock. His subject will be "The Bible, Thought for the Present." "Unrest." Dr. Smyth is one of the leading authorities in the Anglican Church on the modern study of the Bible, and he will deal with the work that has been done by the devout critics.

Little Fire on East King.
Shortly after 6 o'clock Saturday evening a small fire broke out at 506 East King street, occupied by Thomas Rutherford. The damage to property was about \$100. The cause is unknown.

Asphalt Plant Damaged.
One hundred dollars' damage was done by fire to a shed at the Barber Asphalt Company's premises yesterday afternoon. The cause of the fire is unknown.

NATURAL GAS EXPLOSION.
WELLAND, Jan. 14.—Early this morning, Oswald Hickey was badly burned by a natural gas explosion, and the house he occupied, owned by Cory Homes, wrecked and burned. The loss, \$1000, is covered by insurance. Escaping gas caused by the rubber tube becoming disconnected.

Mrs. C. C. Cummings, to-day.

MORE ATTENTION TO FRUIT.

OTTAWA, Jan. 14.—(Special.)—The convention of fruit growers, which is to be held here next month, will, if the fruit men have their way, result in much closer co-operation between the department of agriculture and the fruit industry. It is probable that a resolution will be presented and passed favoring the establishment of a fruit division of the department on much broader lines than those upon which the fruit branch is now conducted. The government is said to look with favor upon such a change.

Then Discarded as Impracticable—Pro's Angus on Production of Steam Power.

R. W. Angus, professor of mechanical engineering at Toronto University, was the speaker at the regular weekly meeting of the Canadian Institute on Saturday night, and delivered an instructive and interesting address on "Steam Engines."

Aided by lantern slides, Prof. Angus illustrated the progress of various inventions of steam engines from the Newcomen and Stevenson type of 1769, to the many varieties of reciprocating engines; the rotary engine and the more modern types of turbine engines. He spoke in rather discouraging terms of all types of rotary engines, with the exception of the Tesla type, he contending that the friction was so great as to cause rapid wearing of the parts and consequent escaping of steam and heavy expense. Of the Tesla type, he could say little, as that was a new invention, the proficiency of which was more or less unknown. The other rotary engines he thought would never have been invented had the prospective inventors considered it from a scientific standpoint; a curious fact, how-
