"Acme" Thread 200 Yard Spool 7c

In a Recent Test of Threads

Acme Came up to the Standard for Evenness of STRENGTH, BLEACH, DYE and FINISH

IT SHOULD be good; it should give the best of satisfaction, because every care and thought is given it in manufacture. For instance, "Sakelardes" is considered to be the best cotton obtainable for commercial purposes, because it is long stapled. It grows near the great Assouan dam on the banks of the Nile in far-away Egypt. Necessarily it costs more than most cotton, but the satisfaction it gives is worth the price; and every endeavor is made to have "Acme" wholly of "Sakelardes." (Failing this, only the finest grade Sea Island cotton is used.)

From Egypt it is taken to Lancashire, the home of the thread industry, where it is put through the many phases of spinning. From England it comes to our own thread factory, where it is twisted, bleached, dyed and put on spools.

"Acme" thread should give the best of results, for it ranks with the best for quality. Here a point arises about thread that may prove interesting to you. And that is, a certain sized thread must be used with a certain sized needle, otherwise trouble may be expected, frequent breaks and knots being the result. For instance, if one were sewing on a

SINGER MACHINE—B needle would be correct for No. 50 or 60 thread; O for No. 70 or 80 thread; OO for No. 100.

NEW WILLIAMS—Size 4 needle with No. 50 or 60 thread; size 3 with No. 70 or 80 thread; size 2 with No. 100 thread.

FLAT RAYMOND—Size 3 needle with No. 50 or 60 thread; size 2 with No. 70 or 80 thread; size 1 with No. 100 thread.

Experienced salespeople in the Thread Section will be ready at all times to give any information regarding thread and needles.
