Wheat cutting is general to-day in Portage Plains, the Brandon district, Indian Head, parts of the Soo line and everywhere where the crop is not late.

Several trainloads of harvesters are being sent out to-day from this city, and the demand by farmers is brisk, wages being about the same as last year, \$1.75 per day and \$45 per month up.

Hon. W. J. Hanna last night had not read the report made by G. A. Armstrong on the escape of prisoners from the jail. He declined to discuss it before he had read it, which he intended to as soon as other important business had been despatched.

Trains with natvesters from Ontario comming in report no more trouble, the several were stoned in passing by irate sectionmen and construction gangs, smarting under the insults and indignities they had received from the law-less crowd from the Maritime Provinces.

Corn-No. 3 yellow, 88c. \$1.60—Swimming Club excursion to Bala, C.P.R., 9.40 a.m., next Saturday. Saturday. Bala, C.P.R., 9.40 a.m., next Saturday. Sat To My Friends, the Whole American People:

I had intended to-day's advertisement as a thank you for the magnificent way you have answered my call, but circumstances demand sterner things than thank yous.

The stupendous, overwhelming response you have made to my call has brought about a crisis which must be handled with X-ray delicacy. All my facilities and my brokers' facilities for handling your mail and orders have become clogged from your first day's response. To-day, Saturday, we are all buried beneath your mail, telegrams and orders, and it may be days before we can open the mail and assort the orders we now have, while next week and week after, when the public receives the "National Stock" pamphlets, the receipts of mail and orders will be tremendous. The fact that I have one lot of about 10,000 orders with checks, cash, money orders and stocks attached left over to-day which have not even been assorted, and the fact that to-day's mail is as yet unopened, and the additional fact that it is understood I execute no orders, but simply pass them along to Stock Exchange and responsible Curb houses, will give you a peep at the situation. The applications for pamphlets already run into millions, and these applications for pamphlets represent the heavy and more business-like buying which will not commence until pamphlets are received and read. Second—As the tremendous future buying crowds the price, I will do all in my power to regulate it so that its advance will be orderly, and to this end I earnestly ask that every buyer sending orders as late as Wednesday limit his price so that whoever receives his order cannot pay over \$3 per share, Boston price, for it must be understood that they sell "National Stock," in the New York market on a peculiar basis, which makes the Boston price of \$3 read \$6. I say this because it is of the greatest importance that we have no runaway market. The necessity for this precaution can be seen in the fact that over 50 out-of-town banking and brokerage houses have already wired for an average of 5,000 to 10,000 pamphlets each, and their telegrams are almost all uniform to the effect that their houses are beseiged with hordes of buyers who demand the pamphlets before ordering the

NATIONAL STOCK. A CRISIS.

represent the heavy and more business-like buying which will not commence until pamphlets are received and read. By working a number of printing houses day and night we will begin to mail pamphlets and reward blanks on Wednesday, and from the time they get into applicants' hands I look for a serious clog in the execution of orders. The following has been and will be our procedure, for it is of vital importance that neither you nor myself, because of our tremendous success, get rattled:

First—I am holding the stock at 2 or under, allowing all holders who wish to sell and take their profit to do so, and thus enabling new holders to get in fair

Boston, August 15, 1908.

Yesterday's transactions in "National Stock," quoting from the official sheet, were over 800,000 shares in Boston and New York alone. This breaks all Stock Exchange records for a day's business in a single stock. At the same time the market for "National Stock" held at the top, while all other stocks were crashing. The day before 500,000 shares of "National Stock" were traded in, the day before that 500,000, and the two days before that 400,000 each, also breaking all records. There are 3,700,000 shares of old outstanding stock in the hands of 60,000 stockbrokers. No man can tell how many of these will sell. There are 16,000,000 shares in the treasury, which I wish to dispose of as to average the treasury.

\$4 a share for 5,000,000 shares. \$6 a share for 5,000,000 shares. \$8 a share for 5,000,000 shares. \$15 a share for 1,000,000 shares.

This means I must have days or weeks in which to regu-This means I must have days or weeks in which to regulate the market. While I earnestly ask everyone everywhere to continue sending in their orders for "National Stock," I also, but more earnestly, ask all such to constantly keep in mind the tremendous task I have undertaken and my situation during the next week or so while handling it. While we will not get rattled at this end, and while we will be able for a few weeks to put in 26 hours a day until our different trains are off on schedule time, and our time-tables have been shown to be fitted to the actual conditions which our success has brought into existence, you should constantly hear in mind that you must do your share in should constantly bear in mind that you must do your share in the way of patience and in remembering that ours is the most extraordinary condition which has ever existed.

Already the System is panic-stricken and on a frenzied run.
All System stocks during the past few days, or since the publication of my plans, have been smashing wide open, the decline since my advertising began having run into 10 to 20 points in the active stocks. This, too, has been accentuated by the fact that all sections of the country are gathering in millions of savings for investment in "National Stock."

In sending you this brief outline, I earnestly ask all of you to withhold from doing anything at the present time to further hurt the market for "System stocks," as the decline has already been greater than present conditions warrant. So firmly am I of the opinion that it is best for the American people everywhere at the present time to prevent the continuation of the past two or three days' market for System stocks, that on Monday I will take a hand in staying the decline and bringing about an orderly condition of affairs in Wall Street. I think I can do this, as my buying power at the present time is enormous, and after the serious decline of the past few days System stocks are cheap.

Wheat—There is little to be said of wheat other than to record 1½c to 1½c break. Holders are influenced to realize by the near approach of spring wheat movement, and this same factor induced considerable short sellings. It will probably develop that old crop supplies are exhausted in the northwest, and that millers will take the new crop freely. After we have had a good run of wheat in that section, and the trade is all bearish because of it, there will be an opportunity to buy wheat for a good turn. Liverpool closed %c lower, which was strong, as compared with our market on Saturday. Acceptances were generally reported light thru the winter wheat sections. Considerable cash wheat was reported, but much more was done than turned in. Local receipts were 177 cars, with 258 expected tomorrow.

Provisions—Very light hog receipts gave provisions an early buile. The advance brought out offerings of lard from packers and others, and this, coupled with weakness in grain, caused a setback, port and lard closing low, while ribs still retained some improvement. This was due to the excellent cash demand for dry salted meats. Thirteen thousand hogs estimated for to-morrow.

J. R. Heintz & Co. wired to R. B. Holden:

Wheat—Market opened easy; general rains in northwest: rains mostly local. Armour brokers soid December. We may get a little more setback when it will be safe to buy December and May. The cash demand is good, both from a foreign and domestic standpoint. There is a large short therest in September wheat. It looks to us as the this option might be boosted and make things uncomfortable, therefore we advise keeping off that side of the market. Three has been considerable wheat thrown on the market to-day and support poor.

Corn—Has ruled steady. Heavy rains reported all thru the corn belt. Elevator people bought September. We believe the weakness in corn is only temporary on account of the light stocks. Cash prices remain strong. There may be some further liquidation, but on breaks think purchases are safe.

Oats have shown more firmness than corn. This market looks very high to us there is an increased movement, also an improvement in quality. Cash demand rather slack.

Provisions—Hogs to-day, 22,000; foc to 20c higher. Pork showed the most strength. On good breaks January provisions will do to buy.
