Certainty of Maximum Prices Has Bearish Effect at Chicago.

Chicago, July 21.—Assumed certainty of the enactment of minimum wheat prices guaranteed by the federal government, had a bullish effect today on the wheat market here. An advance of five cents to 9%c net took place, and the close was strong with July at \$2.55 and September at \$2.27%. Corn finished heavy, unchanged to 1%c lower at \$1.63 to \$1.63% for September, and \$1.15% to \$1.16% for December.

The outcome in oats was ½c off to 1%c up, and for provisions an advance of 5c to 25c.

Wheat started upwards almost as soon as the market opened and there was at no time any important setback. Unfavorable crop reports from the northwest continued to be a source of anxiety to shorts, and it was said millers were readily absorbing all the available offers of new crop wheat in the northwest.

STANDARD SALES.

While actual conditions at the Hargrave property in Cobalt are good, financial returns for the silver shipped by this company are much better, according to information received over the long distance telephone from Manager J. T. Shaw on Saturday. Of their production the company has shipped in the neighborhood of 31,000 ounces and received payment at the rate of 80½ cents an ounce for this silver. This shipment will mean a little over \$24,000 for the company.

High-grade ore is being found all over the property, and Manager Shaw stated that up to the present some two tons of 5,000-ounce silver have been bagged. This high-grade ore is not confined to any one section of the property, but is found all over the working and in the portions which are being prospected. Assays on the 255 foot level are very good, and on Monday several machines will be started at this point.
