

GRADE 2 PUPILS FOUND SMOKING

Many Youngsters Confirmed
Tobacco Users, Says Camp-
bellton Nurse

Red Cross Society Takes Action
to See That Selling Law
Observed

IN investigating the lamentable practice of cigarette-smoking among local school pupils of tender age, Miss MacPhail, the public health nurse here, has made an important and rather startling discovery in learning that many youngsters in the lower grades are apparently confirmed tobacco-users, says the Campbellton Graphic, which continues: "The discovery—at first made on an accidental though later followed up in an endeavor to ascertain the extent of the regrettable practice—discloses the disturbing fact that even many pupils in Grade II. are smoking regularly. One youngster in Grade III, when questioned, replied with something of the air of an old smoker, that he smoked 'about a box a day.'"

TO TRY TO STOP IT.
In other grades, too, the habit is even more deeply rooted and the situation, regarded from any angle, is frankly disturbing. When asked where they secured their cigarettes in most cases the pupils replied, "Oh, anywhere." Several, of course, were able to state at what stores they obtained their "smokes," but all names mentioned are withheld for obvious reasons.

Following this discovery, however, the Red Cross Society propose to see that the situation is remedied at once. The law prohibits the sale of tobacco in any form to minors and it is the intention of the society to see that this regulation is adhered to. There is no desire to lay any charge against any particular merchant at present as a great many children frequently buy tobacco for a parent, but the society are now further investigating the matter and following this warning will take whatever measures are considered necessary to have the law observed by all.

Chief Inspector Hawthorne Here

J. B. Hawthorne, chief liquor inspector, who arrived in the city at noon today from Fredericton, said he had nothing to give out about the vendor's licenses in the province, as the official list would appear in the next issue of the Gazette.

Of the nine licenses granted in Saint John, as announced yesterday, he said four were renewals, those of Watson R. Dunlop, E. R. W. Ingham and W. N. McKel, in West Saint John, and Fullerton Brothers, 297 Charlotte street. The other five, J. E. Gorman, Germain street; S. H. Hawker, Prince William street; E. J. Powers, Prince Edward street; Harry Cohen, Dock street; and S. M. Wetmore, Queen street, were new vendors.

Those who did not have their licenses renewed, the inspector said, would be given opportunity to dispose of the stock they had on hand. He said he thought it likely they would ship it back to the Liquor Commission and that body would refund the money paid for the goods. This, he said, had been the custom in the past.

EARTHQUAKE SHOCK FELT.

SYDNEY, N. S. W., Nov. 14.—The Riverview observatory recorded a severe earthquake shock at 10.24 last night. The centre of the disturbance is believed to have been in the Philippine Islands.

DAMAGE DONE TO PROPERTY IS VERY HEAVY

Continued from Page 1.

England for 24 hours were abating somewhat today, but left in their wake a toll of two dead, a number of injured, and heavy property damage. The schooner Northern Light went ashore near the breakwater at Rockland, Maine, and the coast guard patrol boat 135, was driven on to Menemsha breakwater, on Martha's Vineyard. Both crews were safe. Ample storm warnings enabled coastal shipping, for the most part, to escape the full fury of the gale, which reached a velocity of 80 miles an hour at points along the water front.

TWO ELECTROCUTED

Inland, the gale blew down trees and poles, shattered small buildings and unroofed others, causing heaviest damage in the Northern States. A torrential downpour washed out roads, flooded lowlands and generally delayed automobile, railroad and trolley traffic. Tangled trees brought down by fallen trees and poles disrupted telephone and electric light service in many places and two met death by electrocution, while engaged in repair work. Jesse Neville, an electric light company lineman, was killed in New Hampshire, when he was struck by a paper mill company employee in Pittsfield, was electrocuted in the mill machinery, which was believed to have become charged when a tree was blown across high tension wires leading to the mill.

INJURED AT SEA.

The fishing schooner Eleanor reached Portland, Maine, yesterday, with stories of a sick man nearly drowned in his bunk, when heavy seas flooded the forecastle, the cool galley stove, and a seaman was swept to the rail on one wave and then landed on his feet amidships by another. The Northern Light, which is high and dry near the Rockland breakwater, was burned when a tree was blown across high tension wires leading to the mill.

STOCK COMPANY CLOSES TONIGHT

Opera House Will Probably
Be Idle All Next
Week

As already announced the Carroll Players will close their Opera House engagement this week, and on Monday proceed to Salem, Mass., where they have been engaged for a lengthy season. In commenting on the matter, Mr. Spencer expressed regret that not sufficient support was forthcoming this season to retain a stock company, which means that Saint John will be somewhat limited in the character of the entertainment offered for an indefinite period at least.

Unfortunately, Mr. Spencer added, several attractions that were hurriedly but definitely arranged for, when it was decided to abandon the stock policy, have found it impossible to reach here, in time to prevent an unfortunate period of Opera House idleness, which it is hoped will not be for more than one or two weeks.
