Now, how can the newspaper be considered as a Bible? Well, the Bible is a record of the facts, fictions and teach ing of the past. The newspaper is the record of the facts, fictions and teachings of the present. The latter is our modern "Book of Chronicles," the acts of present humanity. The Bible is the

mirror of a past life: the newspaper is a mirror of present life. Hence the

difference is one of time, with all cause it deals with the life that now is. Where ought our greatest interests centre? In the dead annals of antighty or in the living records of today? The prophets of Israel studied present conditions, the priests lived in the past.
