

EXPLANATION OF PLATE II.

INTERNAL ORGANS OF THE HORSE.

This cut shows the position of each organ in the body.

- | | |
|---|--|
| 1. Pharynx, or throat. | 9. Rectum, or back bowel. |
| 2. Œsophagus, or the tube which carries the food to the stomach. | 10. Bladder. |
| 3. Right lung. | 11. Urethra. |
| 4. Spleen. | 12. Small bowels. |
| 5. Stomach. | 13. Large bowels. |
| 6. Liver. | 14. Diaphragm, or curtain which separates the stomach and bowels from the lungs and heart. |
| 7. Kidney. | 15. Heart. |
| 8. Ureter. This is the tube which carries the water or urine from the kidneys to the bladder. There is one tube to each kidney. | 16. Common Aorta, which is the largest artery in the body. |
| | 17. Trachea, or wind pipe. |
| | 18. Mouth. |

SPECIAL NOTICE.—Every place where Tablespoonful is mentioned in this book should read: **SMALL**, or **DESSERT TABLESPOONFUL**, which is equal to two Teaspoonfuls.
