Summary.....	7
Introduction.....	8
Description of stages.....	9
Eggs.....	9
Larvæ.....	9
Pupæ.....	10
Adults.....	10
Habits.....	11
Habits of the larvæ.....	11
Hibernation.....	11
Food plants.....	12
Feeding habits.....	12
Migration of the larvæ and behaviour to light.....	13
Pupation.....	14
Habits of the moths.....	14
Emergence.....	14
Dates of flight.....	15
Attraction to light and buildings.....	15
Entrance into houses.....	16
Maturation of the ovaries.....	16
Oviposition and eggs.....	17
Date of oviposition.....	17
Location of eggs.....	17
Number of eggs laid by an individual moth.....	18
Length of egg stage.....	18
Number of broods.....	19
Natural enemies.....	19
Predators.....	19
Parasites.....	20
Diseases.....	22
Methods of control.....	23
Preventive measures.....	23
Clean summer-fallow.....	23
Remedial measures.....	23
Poisoned baits.....	23
Trap furrows.....	24
Construction of trap furrows.....	24
Poisoned bait in trap furrows.....	26
Poisoned shorts.....	26
Poisoned vegetation.....	26
Effects of cannibalism upon poisoning in furrows.....	28
Comparative value of poisoning in furrows and brood-sting.....	28
Number and location of furrows.....	28
Maintenance of furrows.....	29
Spraying alfalfa.....	29
Irrigation ditches.....	29
Control measures sometimes recommended but unsuitable to prairie conditions.....	30
Trapping in post holes.....	30
Lantern traps for the adults.....	30
Rolling.....	30
Acknowledgments.....	30
Literature referred to in text.....	30
