

Halifax, in particular, implanted in our breasts, and we have always looked back upon the three years spent amongst you as one of the happiest portions of our existence.

The feelings which we revisit Halifax must, as you will readily believe, be much saddened by the absence of so many of the cherished friends we parted from, and who have since passed away, but I trust that the present generation will allow us to endeavour to deserve some portion of that esteem and attachment with which their fathers honored us.

It is my bounden duty and it will also be my pleasure, to promote, by every means in my power, the continuance of that harmony and good will which have always so hospitably prevailed between yourselves and the officers and men of Her Majesty's Fleet, and I earnestly assure you that it will at all times afford me the greatest satisfaction, if I can in any manner, forward the interests of this community, for whom I entertain the sincerest respect.

HOUSTON STEWART. PROVINCIAL SECRETARY'S OFFICE—Halifax, June 18, 1857. His Excellency the Lieutenant-Governor, by the advice of the Executive Council, has been pleased to make the appointments undermentioned—

To be Justices of the Peace in King's County, John Givan, Charles Eaton, Winckworth Chipman, Abraham Newcomb, Samuel Dennison, Zelon Noy, Sydney Welton, Wm. A. Allison, Daniel Hearty, Elisha D. Harris, John W. Russ, John W. Borden, Benjamin H. Calkin, John N. Roles, John Kirkpatrick, Charles P. Lacey, Wm. W. Patterson, Wm. H. Lyons, Wm. Hayes, Charles J. Tolin, and Edward J. Ross. Esquires. In St. Mary's District, Guyborough, Dr. Henry Elliott. To be a Coroner in St. Mary's District, Guyborough, Dr. Henry Elliott. To be Notaries and Tellebans Public, Wm. Gray, Esq., Attorney at Law, Halifax. George Campbell, Esq., Barrister, T. Truro.

To be Surrogate Judge of the Court of Probate for the County of Colchester, in the absence of Adams G. Archibald, Ebenezer F. Munro, of Windsor, Esq.

To be Commissioners for the further Revising and Indexing of the Statutes of this Province, in conformity with a Resolution of both branches of the Legislature in the last Session: Hon. M. I. Wilkes, William A. Heary, and James R. Smith, Esquires.

To be one of the Commissioners for the management of the Cornwallis Bridge, Mr. John Langley, in place of Thos. B. Campbell, Esq., resigned.

To be one of the Commissioners of Schools for King's County, James E. Hand, Esq.

THE HORTICULTURAL GARDENS will be open to the public from 10 o'clock to 4 p.m., on Monday last the Band commenced to play on the grounds, and we understand that by the kindness of the commanding officers, there will be music of the most excellent description every Monday and Friday afternoons during the season. Fountains have been set up in each of the ponds, accumulation made for the musical fountain, while the general arrangement of the site and attentive superintendent, Mr. Hutton, we need scarcely remark are in every respect perfect. Nothing has been left undone in order to enter the community from the dust and smoke of the city to this delightful retreat.—Colonist.

DRESSING OCCURRENCE—FOUR MEN DROWNED—River John, June 24th, 1857. Yesterday evening a gloom was cast over this community by the receipt of the distressing intelligence that four men, residents of this neighborhood had lost their lives from the upsetting of a boat. The name of the deceased are Messrs. Rogers, Edward Davis, David Hayden, and John Hynes. They had been fishing in the river, off Annet Island, and early in the afternoon they went commenced to load and being very squally, they ran for the land, having both sails close reefed. On nearing the land, however, they found they could not make the point they wished, and the wind being somewhat abated they sought out their reefs, and stood off again to endeavor to make a better landing. On hearing the land the second time, and when about half a mile from the shore, a squall struck the boat which upset her, and she sunk almost immediately. Several other boats had been out in company with them; but some had taken shelter from the squall under the island, and others who were in sight were to assist—others incapable of rendering any assistance.

Several witnesses of this sad occurrence were eye witnesses of the scene of disaster, and on reaching the spot a few pieces of drift wood from the boat was all that could be found, and no traces of the bodies of the unfortunate men have yet been discovered. Burke, one of the deceased, was the father of the lad that perished on the ice last winter. All four were married men and in the prime of life; Hayden leaves a wife and one child, the other three have large and helpless families.—Eastern Chronicle.

INQUEST AT KEMPT—An Inquest was held by Dr. Wm. Dennison, Coroner at Kempt in the County of Hants, on the bodies of Edward and Henry Lape, who were drowned in the mill pond, a few yards from their dwelling, when the younger brother went down; the other attempting to save him also sank; he has left a wife, who witnessed the melancholy scene, and two children. Verdict returned—Accidental Drowning.—Chronicle.

DEATH OF MR. SMILER, PUBLISHER OF THE TELEGRAPH.—The British Constitution of the 23rd inst., says:—It becomes our painful duty to announce the death of our respected fellow-citizen and brother of the press, Mr. CHRISTOPHER SMILER, late Editor and Publisher of the Temperance Telegraph. He died at his residence in this City, on Sunday morning last, and is deeply lamented by a large circle of relations and friends. The malady under which he suffered was disease of the heart. He will be greatly missed from amongst those with whom he was intimately acquainted. The Temperance Reform, to which he has for many years been a warm and attached friend, will materially feel the weight of this dispensation of Divine Providence. Mr. Smiler commenced the publication of the "Telegraph" when the Temperance reform first started in this city, and has always been a post bellum of the time of his summons to the land of the eternal. He was 35 years of age, and unmarried. Many have lost in him a warm-hearted friend, and even those who would be called his enemies, we think will be willing to say, now that he is gone, that he did what he could. We deeply sympathize with the bereaved, and hope that what has been their loss has been their gain, as we have been informed that he died in the peaceful glow of a blissful immortality.

MELANCHOLY ACCIDENT.—Yesterday morning, a boat containing six men, working, we understand, at Langley's Mills, near Indian Town, was upset while coming through the Falls, and melancholy to relate, five of them were lost. Their names were—Robert Collins, Michael Carlin and John Kelly, of Portland; Henry McCue of Indian Town, and Alfred Byles, of Musquodiu Cove.

Archibald Brown, the man who was saved, succeeded in holding on to a pair of skulls which were in the boat, and was picked up almost exhausted in the eddy at Blind Island. We learn they were industrious men, and some of them have left families to deplore their loss. It is said that the boat started before the proper time for passing through, and approaching too near the Falls, she was drawn into the vortex, and upset in the whirlpools.—Northern Spectator.

The frame of the new Episcopal Church was erected on Friday on a lot of land presented by Joseph F. Allison, Esq., for that purpose. The Church is to be built after a model furnished by his Lordship the Bishop of the diocese. It stands on a dry knoll, near the residence of the former gentleman. The spire will be 108 feet from the ground, the style is Gothic; and the building promises to be a chaste and elegant structure, and an ornament to that already handsome part of this thriving village.—Barrett, June 12th.

P. E. Island. THE WEATHER AND CROPS.—In some localities, considerable failure has been already noticed both in Wheat and Oats. Some attributes it to grain, some to thrashing machines, and others to malted or heated grain. But whatever may be the cause, the fact is certain. The month of May was unusually dry, and the weather has been chilly, and notwithstanding the earliness of the Spring, we do not consider the grain crops further advanced than in average years. Present appearances may indicate faintly the Autumnal result; but as we have yet to encounter the ravages of the wheat maggot, our importers will act prudently not to calculate on a heavy crop.—Colonist.

Canada. FEARFUL DISASTER.—MONTREAL, June 27.—The Montreal which left Quebec last night at 12 o'clock, when opposite Cape Rouge, took fire. She had 500 passengers on board, and 200 are supposed to be lost. The steamer Napoleon being near by rendered every assistance in her power, and succeeded in saving from 175 to 200 of the passengers. The principal portion of the passengers were Scotch emigrants just landed at Quebec, on their way to the West.

STILL LATER.—Montreal, 1835. The Napoleon with the saved passengers has arrived. We conversed with several of the passengers who assure us that the number of lost will reach from 200 to 350. Out of 40 cabin passengers only some 8 or 10 were saved. Col. Irving, A. D. C. Governor General, who came up from Sorrel, has given us the following particulars which he got from the passengers on board the unfortunate steamer. The Montreal was left Quebec last night at 12 o'clock, when opposite Cape Rouge, took fire. She had 500 passengers on board, and 200 are supposed to be lost. The steamer Napoleon being near by rendered every assistance in her power, and succeeded in saving from 175 to 200 of the passengers. The principal portion of the passengers were Scotch emigrants just landed at Quebec, on their way to the West.

THE WEATHER AND CROPS IN CANADA.—The season has on the whole been a backward one. Nevertheless there is every prospect so far of good crops. We read of encouraging indications throughout both the Western States and Western Canada, and the prices of provisions keep up to the present mark, it will seem to be due to the great demand for food than to its scarcity. In Lower Canada, where there is no Fall Wheat, a crop of little can yet be said of the appearance of the grain crops. The seed was got in, however, under favorable circumstances, when we augur well. With us a late season is often a good one, as the young corn is not so much subjected to the untimely frost, and what abated they shook out their reefs, and stood off again to endeavor to make a better landing. On hearing the land the second time, and when about half a mile from the shore, a squall struck the boat which upset her, and she sunk almost immediately. Several other boats had been out in company with them; but some had taken shelter from the squall under the island, and others who were in sight were to assist—others incapable of rendering any assistance.

THE WEATHER AND CROPS IN CANADA.—The season has on the whole been a backward one. Nevertheless there is every prospect so far of good crops. We read of encouraging indications throughout both the Western States and Western Canada, and the prices of provisions keep up to the present mark, it will seem to be due to the great demand for food than to its scarcity. In Lower Canada, where there is no Fall Wheat, a crop of little can yet be said of the appearance of the grain crops. The seed was got in, however, under favorable circumstances, when we augur well. With us a late season is often a good one, as the young corn is not so much subjected to the untimely frost, and what abated they shook out their reefs, and stood off again to endeavor to make a better landing. On hearing the land the second time, and when about half a mile from the shore, a squall struck the boat which upset her, and she sunk almost immediately. Several other boats had been out in company with them; but some had taken shelter from the squall under the island, and others who were in sight were to assist—others incapable of rendering any assistance.

THE REV. DR. TWINGING and the Hon. A. STEWART, C. B. have been elected Governors of King's College, Windsor.

THE Legislature of New Brunswick was opened on the 24th inst. Mr. Harling was elected Speaker.

LETTERS and MONEY received the past current week will be acknowledged on the return of the Book Steward.

NEVER TOO LATE.—Many just within the grasp of Consumption are cured every year by the faithful use of Dr. Wistar's Balsam of Wild Cherry. Its success in allaying and curing severe protracted coughs is remarkable.—Colonist.

A GOOD SIGN.—In these days of quack medicines and humbugs, it is refreshing to find a modest advertisement, like that of Jonas Whitcomb's Remedy for Asthma. One of the most severe cases on record, was cured by it, and the sufferer was induced to try it because he says, it didn't pretend to cure everything and everything.—Comm.

R. R. R.—HOT WEATHER.—DIARRHOEA, DYSENTERY.—Painful discharges from the bowels are more frequent in hot weather than in cold; this is caused by the heat determining an undue quantity of blood to the surface of the body, thereby leaving the bowels an easy prey to irritating causes. Indulgence in green vegetables, fruits, shell fish, and fresh meats, will frequently cause Diarrhoea and Dysentery. RAYBURN'S RELIEF, taken when these pains are present, will, in a few minutes, check all dysenteric symptoms, stop the pain, and withdraw the blood from the surface to its proper channel. It is a safe and reliable remedy, and is recommended by Dr. Wistar's Regulator, taken twice every week, will keep the system in a healthy and regular condition.

SHIPMASTERS should always keep a supply of the Ready Relief on board their vessels, as it will protect all on board against Ship Fevers, Yellow Fevers, Cholera, and all other infectious diseases. In the most unhealthy parts of the Tropics, where Yellow Fever, Ship Fever, and Cholera was killing of the people by scores, not a single life was lost, on these vessels, they used the Ready Relief.

FOR SICK HEADACHE, NEURALGIA, TOOTHACHE, RHEUMATISM, RADWAY'S READY RELIEF will stop the most distressing pains in a few minutes. Bilious attacks are prevented by taking a dose of Regulator, at the first symptoms of an attack of Biliousness, Fever and Ague, and all other diseases.

GRAVE AND STONE.—By this we understand a collection of sand substance having been lodged in the passage of the urine. When the system is in a healthy state, this substance is carried off by the natural passage of the body; but when there is a weakness of any organ, especially the kidneys, they become incapable of expelling the sand, and it accumulates in the bladder, causing great inflammation to those organs, and great pains and swelling, and great difficulty in voiding urine. It has been ascertained by many physicians, that Morse's Indian Root Pills are made out of some particular plants which have a tendency to dissolve the sand, and to carry it off by the natural passage of the body. It is a safe and reliable remedy, and is recommended by Dr. Wistar's Regulator, taken twice every week, will keep the system in a healthy and regular condition.

NO ONE'S ENTRY INTO BOLOGNA took place on the evening of Thursday, the 9th amidst grand demonstrations of rejoicing. He was received by the local authorities, and deputations from the various countries of the province, at a distance of half-mile from the city. When the ambulance containing the Pope, with a triumphal arch, Cardinal Viale-Presicci received the Pope at the cathedral, and Cardinal Vannicelli, with 15 bishops, was likewise in attendance. The city is described as overflowing. Next morning he was occupied, after celebrating mass in the cathedral, with crowning the miraculous image of St. Luke, which enjoys the peculiar veneration of the Bolognese. After this idolatrous ceremony, and placing the crown, a costly ornament executed at the Pope's own expense, on the head of the image, "his Holiness" addressed the assembled multitude in terms which, it is said, drew tears from the eyes of all.

THE accounts from Belgium speak of tranquillity being generally restored, although some slight agitation still subsists. The objection to the late bill on charitable institutions appear to gain ground. The Commercial Council of Ghent, in its sitting of the 2nd, voted, by a majority of 18 to 5, an address to the King, in which the Convention of Brussels. The Commercial Council of Namur was to assemble on the same day to draw up a similar address. The royal intention in regard to the claim on the obnoxious crown, and the position of the ministry have received some elucidation. It is understood that his majesty has made up his mind to cut short all possibility of renewing discussions on the irritating question, by proroguing the session without further convocation, which right he possessed, in virtue of the 11th article of the constitution, after they have been assembled for business forty days. He is the more entitled to do so at present, as the session has extended over more than six months, and the budgets have been voted. The Moniteur will therefore, probably publish a royal oratorical bill which will merge for the present. The ministers, by this evasive means, will retain their places; a dissolution will be avoided; the aristocracy will retain their majority; and the king will be relieved from the necessity of appointing, or submitting to the nomination of, a Cabinet formed from either extreme. This is not what the country most desired, but the general will console themselves with the latter check administered to the aristocracy.

THE London Bill of Monday, and that several of our citizens have induced the proprietors to publish some account of its wonderful properties, and to offer it for the benefit of those afflicted with Cholera, and other diseases of the bowels. The late JONAS WHITCOMB, of Boston, so well known and so universally esteemed for his sterling integrity and general usefulness to his country, and his kind and generous heart, became interested in his case, promised him relief. He followed the treatment ordered, and to his surprise and joy his asthma, almost instantly disappeared. He procured the recipe which he accomplished so much for him, brought it with him to this country, and it became the property of the present proprietor. Within the next few years the remedy has been used in upwards of one thousand of the worst cases in Boston and its immediate vicinity, with astonishing and uniform success, and it is now offered to the public with full confidence in its merits. It contains no poisonous or injurious properties whatever, and an infant may take it with perfect safety. Prepared by JOSEPH BURNETT & CO., Boston. For sale by dealers generally. Price \$1.00 per bottle.

MORSE'S INDIAN ROOT PILLS, Prepared by Fleming Bros., Pittsburgh, Pa. From the unobscured testimony constantly offered from all quarters of the country, it is impossible to resist a conviction that the above mentioned Pills are a cure for all diseases of the Liver and Stomach. The following letter from Toronto, Canada, is one of the many testimonials that have been received. MESSRS. FLEMING BROS., Sir:—I take this opportunity of informing you of the benefits I have derived from your Pills. I have for two years past been afflicted with severe pain over the eyes, accompanied with a nervousness and sense of dizziness; a malady which has rendered me almost insensible to the power and skill of our physicians to relieve and cure, caused, as far as I myself could judge, by a diseased state of the liver and stomach. Some of the doctors tried bleeding, and various other remedies, but all in vain. At last I procured a box of your valuable Liver Pills from a Druggist here, and after taking three or four bottles, I found that several of the most distressing symptoms were removed, and my vision over the eyes has almost entirely left me. I will close by advising all those afflicted as I have been, to procure the valuable medicine at once, and save much time and pain, with little expense. With sincere gratitude and respect, I remain yours
