Right at the beginning, please remember that FROST fence is unlike any other woven fence.

FROST fence is exclusive in design. Its lock is different.
Its wire is different. Its galvanizing is different. The weaving of the fence is different. It's the combination of all these that makes

The Frost Waved aterals

Frost Fence First The FROST lock is unique in construction. It doesn't look like any other fence lock—and most fence

locks are similar as peas in a pod.

The FROST lock will stand strains that will loosen and often pull other locks to pieces. Look at it yourself and see how much more substantial and secure the FROST lock is. Then look at that special FROST "wave" in the laterals. This long and deep wave gives a wonderful degree of spring and reserve power to FROST fence. It puts real backbone in the fence.

The stays on the FROST fence are straight and stiff and the spacing is accurate. Our special looms weave FROST fence more slowly and consequently the fence looks neater, and better in the rolls, and stretches up straight and true when putting it up. It is a fence the farmer is proud to show to his neighbors.

By making FROST fence complete in our own mills we are able to produce a fence that will out-

s. We put the quality in the wire, in the galvanizing and in the weaving that puts FROST fence in a different class as compared with the ordinary woven fences made of common commercial wire. You can see the difference by comparing FROST fence with others.

You can prove it to the hilt by seeing FROST fences that have been defying wear and tear on Canadian farms for years. There must be some FROST fences in your locality, for we have dealers in almost every part of the wide Dominion. If you don't know the name of a nearby one, write us.

A style for every purpose.
