A POPULAR SHOWMAN.

At recent fall fairs in Ontario, one of the most popular showmen has been Hon. Adam Beck, chairman of the Hydro-Electric Commission. Mr. Beck has been telling the farmers how to use electricity on their farms and showing them how to do it.

In his address at the Renfrew fair, Mr. Beck showed how on one farm in North Oxford Township electric power was being used to grind oats, cut corn, milk cows, heat water, for sawing, turnip pulping, washing and ironing clothes, bed and house warming and lighting—and all this at a cost of but \$96 per year.

Mr. Beck points out that the used of electricity in farming in countries older than Canada is more general than in this country. In Canada, where the scarcity of labor is felt so keenly, electricity was calculated to be of immense service. Between twenty and thirty farms were now using it in Western Ontario and the efficacy of the power had been established. Besides working the machinery of the farm, electricity was being used to light the buildings and the roads, making rural life brighter and better.

The reception given to Hon. Adam Beck at these fall fairs is non-political in character. Those who understand his mission will know the reason.—(Ottawa Journal).

STATISTICS OF THE BRITISH EMPIRE.

Her home area is a mere matter of 121,000 square miles, but that of the empire is eleven and a third million square miles. The population of the United Kingdom, estimated at the middle of 1912, is a little over forty-five and a half millions; the population of the empire, according to the census of 1911, is slightly over 417 millions.

SEATS.

Because Stock Exchange seats have again sold under the \$50,000 mark is no reason to believe a serious decline is coming. On the last slump they touched \$37,000, on the later rally \$50,000. With the membership limited to 1100 and the population 100,000,000 and unlimited, seats should ultimately sell at \$100,000. They touched \$95,000 in the last boom. Certainly they should exceed this price in the next one.—(Adam's in Boston News Bureau).

BONDS.

Though the edge is off of the bond market the head of an investment house tells me that its mail is daily replete with letters from intending buyers in quest of advice.
