

THE ACADIAN.

WOLFVILLE, N. S., MAR. 8, 1895.

Town Council.

The regular monthly meeting of the Town Council was held on Tuesday evening. The Mayor and all the Councilors were present, with the Recorder.

The first item of business was the hearing and confirming of appeals of assessment placed by the Appeal Court.

The various standing committees of the town presented monthly reports, which were received and adopted.

A petition was read from the town truckmen, asking that a license be required from all doing trucking in the town. This was referred to the License Com. to consider and report thereon at next meeting.

The following amounts were ordered paid:

Table with 2 columns: Name and Amount. Includes T. E. Sherwood (\$3.20), Burpee Witter (2.50), C. M. Vaughn (5.00), Geo. C. Johnson (3.50), Assin. Estab. Electric Co. (3.48), Town Clerk (15.00), J. J. Anslow (45.73), Poor District of Horton (16.90), Selien Sanford (6.00), J. W. Wallace (20.00).

Resolved that the siren whistles which had been sent for trial be returned to owners, not proving satisfactory as a fire alarm.

The following appointments were made: Supt. of Water Works—Wm. B. Hardwick, with a salary of \$100.

Supt. of Streets—Lewis A. Murphy, with a salary of \$100.

Constables—Lewis A. Murphy, in place of C. M. Vaughn, and L. W. Sleep, in place of B. O. Davison.

Scott Act Inspector—J. M. Toys, with a salary of \$50.

Resolved that the matter of naming the streets of the town, be referred to the Street Committee.

Resolved that the amount of fines collected under the Scott Act be placed aside as a fund for prosecuting offenders against the Act.

Coun. Harris gave notice that at next meeting he would move a resolution to amend the town bye-laws relating to the impounding of cattle.

Resolved that the Mayor and Recorder and Couns. Starr and Davison be a Committee to suggest some change in the time for payment of water rates.

The Delinquent for April is called the Spring Assessment Number, and is an excellent specimen of this most popular woman's magazine. Supplementary to the regular issue of patterns there is a new section on Crochet and Tissue Papers, new and exceedingly pretty designs are given in Venetian Iron Work, Knitting, Tatting, Netting and Crocheting, and the chapter on Braid Leather Work gives the illustrations and information of the necessary tools and implements and advice to beginners. The Cookery article gives recipes for some new dishes. There is a paper on the Servicing of Pine-apples and Grape Fruit, one on Table Decoration and the usual contribution on Floral Culture. Around the Tea-Table is bright and entertaining. Mother and Son is a most instructive, and a delightful evening's amusement. There is also a review of the Newest Books, some Instrumental Music and an Ester Carol. Begin a subscription with this Number.

At the meeting of the Council on Tuesday evening the Committee on Police and Licenses reported that the fines against W. H. Townsend for violation of Canada Temperance Act, to the amount of \$150, had been paid over and placed to the credit of the town. The matter has been standing for about a year and has caused a great deal of trouble, and the town is to be congratulated on having it at last satisfactorily settled. Those who have been opposed to the enforcement of the law on the ground of expense will now have a load of anxiety removed from their burdened minds. It also demonstrates that the town authorities cannot be openly defied with impunity.

The international conventions of the Young Men's Christian associations are held every second year on this side of the water. This year the convention will be at Springfield, Mass. It is announced that Sir Geo. Williams has signified his intention, should his health permit, of being present at this gathering next May.

It is met H. Rider Haggard, as stated, but his brother, Colonel Haggard, now in the Rockies, who is to spend some time at Mr. Wm. O'Key's farm, in this county, the coming summer.

C. Putnam, M. P. for Harris Co., has again consented to be the Liberal Conservative candidate for that county; although it had been announced he would retire.

Among the books prohibited from sale in Russia is "Brook's American Commonwealth."

Teachers' Grants.

For some years previous to 1888, A. D., teachers employed for the full year received as a Provincial grant for a grade B. license \$120, grade C. \$90, grade D. \$60.

From that date to the end of the last school year, the fixed sum of \$107,500 was paid to teachers of the common schools, annually.

While in no case could a teacher receive more than the sum granted previous to 1888, he was liable to a reduction when the number of teachers, or the number holding an advanced grade was increased. The reduction has been, therefore, to individual teachers, and not a reduction in the sum given to common schools. That sum has remained the same from April 1888 to Aug. 1894, so far as the sum given to common school teachers is concerned, and has been apportioned so that for every one dollar given to a B. teacher, a C. would receive three-fourths of a dollar, and a D. one-half of a dollar.

It will be new to many of your readers to see the exact sums paid to the different grades of teachers for the past seven years. The following table shows this:

Table with 4 columns: Year, Grade B, Grade C, Grade D. Shows amounts for 1888, 1889, 1890, 1891, 1892, 1893, 1894.

To understand the reduction to individual teachers, compare the sums in the table with \$120 for grade B, \$90 for grade C, and \$60 for grade D.

It should be noticed that the year 1893 was a transitional period and only three-fourths of the usual school year, and the grant corresponds to the time.

This occurred by ending the year on July 31st instead of Oct 31, so as to begin the new term Aug. 1st. But half of the year 1895 has passed and the grant given represents the sums paid to teachers who taught the full half year ended Feb. 1st. It will be observed that the grant has been increased to the original amount.

This increase has been made by the addition of the \$15,000, put in the estimates last year, for schools, to the previous grant of \$167,500 for the year. The grant just paid to the teachers of Kings county amounted to \$3090 50-100, of which the teachers of Wolfville High School received \$319.44.

COLIN W. ROSCOE.

Should Teach a Lesson.

The following extract from a letter written by a lady who had been attending a Horticultural college, and handed to the ACADIAN by a subscriber, should be a warning to localities where the establishment of such an institution is contemplated. In plain language the lady evidently wished to convey the information that she had "taken up" her sitting-room carpet:

We have been attending lectures on bacteria at the Horticultural school, and are alive with it, not alive with bacteria or similar vermin, I don't mean that, but alive to the importance of the subject—and after hearing some astounding statistics on the extremely prolific system of reproduction practised by these germs, I thought me that a sanitary scientific reform, that like charity "begins at home," was incumbent on me as a housekeeper and I could best begin by the disinfection of a few hundreds of millions of bacilli who camp in our sitting-room carpet—an ancient and much demoralized Brussels. In the interests of science and hygiene we took up the old carpet and the book and text it will convince of the final disinfection, miasma and consequent bereavement of the bulk of the millions of microscopic germ families; and in the slaughter, swallowing many, very many quadrillions of bacteria spores, that we did not find at all "falling at the price." But we went on blood-thirstily to extend the massacre and routed a few billions of aerobic and anaerobic cells that were holding a slugging match in the dark corners. With abominatory weapons and alkali ammunition, we conquered quadrillions of bacillae, oospores, and eggs, that were conducting a veritable warfare on their atmospheric campus, and then we again baited our bacteria trap I. e. tacked down the old carpet, and at this point decided that our studies in the natural history of microbes, might cease, having earned a diploma spicula mundi, as a reward for our grand scientific, hygienic, and experimental research in bacteriological microorganisms.

Since the death of John Bunyan, who was pastor of the Bunyan Meeting House in Bedford, England, about 200 years ago, there have been but six pastors, each accepting one, serving the church until death removed him. John Bunyan served the church for sixteen years, and the sixth and present incumbent, the Rev. John Moore, became pastor in 1821.

NOTICE!

MARCH! Month When 'Tis Easiest to Regain Health. GET STRONG BEFORE DEBILITATING SPRING COMES ON.

Feed the Worn Out Brain with Paine's Celery Compound.

LET CHANGING SEASON FIND SYSTEM IN HEALTH.

TAKE THE GREAT REMEDY THAT MAKES PEOPLE WELL.

A perfectly healthy body has its parts completely nourished and its nerves constantly refreshed and stored with energy from the vigorous blood that all the time bathes it.

But to do this important work of conveying sufficient nutrition to the tissues, the blood must be kept rich and full of red corpuscles.

The only trouble with two-thirds of the men and women whom the coming spring will claim for its victims, is a vital lack of proper nerve food. What these weak, nervous people need is a more general feeding and storing of their blood and tissues with fresh, highly vitalized material.

The great body of physicians throughout the United States, England and Canada, believe profoundly in it, and prescribe it in all cases of nervous weakness and debility. In preparing this greatest of all nerve tonics and blood renews, the eminent professor of Dartmouth College, Edward E. Phelps, M. D., LL. D., had in mind the countless men and women with brains overworked and nerves unstrung by worry and lack of proper nutrition.

Clerks, their employers, lawyers, doctors, mothers of families, hard working men and women in every county and province, and hosts of brain workers—the most intellectual part of the community—are to day taking Paine's Celery Compound, with the happiest results, to relieve themselves of rheumatism, neuralgia, nervous exhaustion, dyspepsia, sleeplessness and low spirits. Paine's Celery Compound cures diseases of the important organs of digestion, circulation and excretion, by purifying the blood, by regulating the entire nervous system and supplying the body with strength to combat disease.

Paine's Celery Compound makes people well. It takes away all the tremor and irritability from the nerves, and gives that calm, strong feeling of assured health that invariably accompanies a perfectly well-nourished bodily system. Get rid of languor, clear the muddy, unhealthy skin, plump out the body and get back to a normal vigorous condition with Paine's Celery Compound, and begin now.

Very important changes are being made in the tactical strategy of the United States army. It is announced that the authorities are convinced that the principal duties of the soldiers in the future will be to deal with large mobs in the centres of population. Hence the old manoeuvres in battle-field tactics must be replaced by new ones adapted to the streets of great cities. Accordingly the instruction at West Point has been slightly modified, while at the war college in Newport army officers are being instructed and are practicing tactics adapted to the dispersion of great mobs and to the bombardment of houses. Similar changes in the drilling of the militia are to be made in the States of New York, Pennsylvania and Ohio.

The court of appeals has sustained the verdict convicting Dr. R. W. Buchanan in New York of murdering his wife by administering poison, so the sentence of death in the electric chair will probably now be carried out.

Sir Charles Tepper is shortly coming out from England and will spend the summer in Nova Scotia.

General Booth sailed from New York for Europe on the steamer City of Paris on Tuesday last.

Morse—the lot measured 60 feet by 264 feet and has on it a choice variety of fruit trees, apple, pear, plum and cherry—possession 1st May next. Also two choice building lots near the west end of College Avenue on the north side thereof, measuring 75 feet front by 185 ft. deep. For further particulars apply to

L. W. DESBARRES, Halifax, or E. S. CRAWLEY, Wolfville, Mar. 7, 1895.

While out duck shooting on Bass Island last Tuesday, Mr. O. D. Harris had a rather narrow escape from being carried out to the little fishes. He had fired at a duck, which, after flying some distance, seemed to have that feeling, and fell asleep among the rocks on the other side of the Island. Mr. Harris immediately ran over to take possession of his prize, but could not find the exact spot where the bird had fallen. He had been gone but a short time, when chance led him to look around for his fellow hunters, Messrs D. R. Munro and F. F. Rockwell, whom he has left on the other side, he observed that the "Grouse" was rapidly filling up. Not wishing to become intimate with the clouds, Mr. Harris, with that recklessness which has characterized him throughout his life, stepped into the raging surf, and landed triumphantly on the banks of safety. With the exception of a cool and refreshing bath, Mr. Harris was none the worse for his adventure.

A public meeting of the Women's Suffrage League Hall to-morrow evening will be given by M. P. P., Rev. Jones and G. E. will be provided and Miss Mann is now causing throughout the doubt be a full collection will penes.
