Just then a light sound as of a foot fall under the window was heard. Both sprang apart, listening with pale faces. La Fabienne, donning his hat, pulled up his coat collar, carefully closed the door upon Margaret and, going by the recumbent figure of Matthew Allen, walked out of doors and gave a careful, searching glance in all ons, but all now was quiet. No ounds reached his ears save the whiniving of an impatient horse not far distant down the readway. So, after convincing himself that no intruder was about, he re-entered the prison, going at once to Margaret's cell.

"All is well," he hastened to assur her. "The wind is rising, and the sound no doubt was but the creaking of a loose grating. Gads, the villagers sleep soundly tonight that they may get good rest for tomorrow's gala day. But we do tarry here too long. Here's a Puritan bonnet-'twill disguise thee, Margaret-and throw this cloak over thy shoulders. "Margaret, my love, take courage," he urged. "Art thou never coming through the doorway?".

At his words she seemed to grow braver and, raising her head with a movement that indicated sudden resolution, said firmly: "I am coming now, dear rescuer, over the threshold—ever will we bless it, Godfrey—of hope, liberty, love and life."

La Fablenne retaining her hand in his strong clasp, they ran swiftly down the dark pathway under the protecting shadows of the trees.

A short fime later Joslah Taunston, sleeping the uneasy, fiftul sleep of the guilty, was disturbed by the sound of horses' feet going down the mountain road. Raising himself in bed on his elbow, he listened intently.

"Hait! Who goeft there?"

The cry of the sentinel was brought to his straining ears by the light wind.

'The remark that animals do not grow

wiser with age is contradicted by the nabit of elephants, noticed even in succent times, of making the young mes cross a ford first. The officer who superintended the embarkation of the lephants sent from India to Abysinia for use in Lord Napier's cam-paign tells how one old elephant voleered to drive all the others on board. His services were invaluable, but when they had all embarked and he was invited to follow them he firmy declined and had to be left on shore. I myself have noticed the acquired caution of the older dogs of Constantinople, which left untouched the crusts I threw them, while the young ones ate them ravenously. A Greek native told me that this was because Euro peans were in the cruel habit of throwing poisoned bread to the street dogs; hence the old ones, having seen the bad effects on their companions, refused to eat bread thrown by Europeans, though they took it readily from my Turkish beggar who shared his canty fare with them.
