### The "Money King."

Mr. Pierpont Morgan, who was born

poleon of finance, his cash fortune being estimated at between £25,000,000 trolling interest in financing concerns representing nearly one-fourth of the total assets of the United States. He possessed palatial mansions in London, New York and the country, and pleasure yachts and private railway trains, which enabled him to travel like royalty. His residences were veritable stores of treasure, for he accumulated the finest pictures and curios that money could buy. The bulk of his art treasures were for many years housed at his mansion in Prince's Gate. London, but were removed to New York a few months before his death, and a considerable selection of them lent to the Metropolitan Museum there He began his career as a banker's clerk in London, in 1857, but in the same year, at the age of 20, he returned to America, and entered the private banking house of Duncan, Sherman & Co. Seven years later he founded the firm of Datney. Morgan & Co., which was financed by was dissolved and Mr. Morgan joined Drexel, Morgan & Co., Philadelphia, which eventually, after the death of gan & Co. From his father, Mr. Pierpont Morgan inherited two million pounds. His first great commercial fight was in 1868, against Jay Gould and Jim Fisk, whose attempted capture of the Albany and Susquehanna Railway he defeated. The property was placed in safe hands, and the stock, which was selling at 18, jumped up to 100; the stockholders were guaranteed, and the employees secure. ### A New Development in **Light Sixes**

Before we began experimental work on our new six-cylinder motor three years ago, we made a very thorough investigation of the light

six field. We found out just what qualities car owners desired in the power plants of their motor cars and then we designed an engine to meet these requirements.

The wisdom of our method is attested by the unanimous approval given our five-passenger "Glenbrook" model. With its first appearance, it immediately won the enthusiastic support of motorists.

And, by its dependable and economical performance, it has so clearly demonstrated its high character as an investment value that our production schedule is already proving unequal to the demand.

The "Glenbrook" is a truly remarkable development in five-passenger cars. Won't you arrange for a demonstration while our dealer is in position to meet your requirements as to delivery?
