r'ourth Week Great Make-Room Sale!

House and Office Bargains

Make-Room! Mr. Business Man, for some of the splendid office equipment we list among this week's bargains.

If you'd like to bring YOUR office appointments up to the efficiency standard, here is when and where, you can do it at a considerable saving to yourself.

Typewriter Desks, **Filing Cabinets**

Our Office Supplies are of special attraction to the shrewd business man, who wants his equipment "just so" without paying fabulous prices. The huge reductions on the Desks and Cabinets below make them remarkable from the point-of-view of the man who likes a good Bargain.

Typewriter Desks. Plain White Oak; Golden finish. Regular Price\$45.00 Typewriter Desk and Cabinet.

Pdain White Oak; Golden finish. Cabinet includes 3 paper file boxes with wood fronts and label pulls. Index File Cabinets for Desk Tops. Golden finish Oak; contains 16 file boxes with wood fronts and label pulls. To fit desk top 42 inches long. Regular Price\$25.00 The same Cabinet to fit Desk top 48 inches long, contains 18 files. The same Cabinet to fit Desk Tops 54 inches long, Regular Price \$35.00

Electric Boudoir and Desk Lamps. 10 only Portable Boudoir Lamps, strongly yet daintily built, with mahogany finished base; Rose, Gold and Blue Silk shades.

Adjustable Electric Desk Lamps; Brush Brass

Revolving Bookcases.

A boon to book-lovers. Fine Golden Oak with Book-rest. A very finely constructed piece of furniture. Make-room Price\$25.00 Very large and massive revolving Book-Case; adapted for heavier reference works; Commercial Oak

A Panel for Kiddies at Rest and Play.

Swing Cots Both for Baby's comfort and Mother's convenience is this dainty Cot of White Enamel. The bas-ket is 15 inches high and has Spring Mattress 24 x 36. It swings easily with little effort, but is so ar-

ranged that it cannot tilt beyond a perfectly safe angle, while an easily applied attachment renders the Cot stationary when required. The Stand has an adjustable canopy rod, and is fitted with ball-bearing casters. Altogether a very desirable Baby Cot.

Regular Price

Light Travelled 186,000 Miles a Second

The record long distance for stellar objects is held at present by a faint globular star cluster in Delphinus which is 220,000 light years from the earth. This cluster is known only by When the human race was still in also been journeying onward at the has covered a distance of 14 light years. Every 15,750 years the sun covers a distance of one light year, which is equal to about a trillion miles. The nearest star, Alpha Centauri, is four and one-third light years away, and the brightest star, Sirius, is 31/2 light years from the

earth. So our solar system has trav-

which separates us from the nearest

stars while the light from this cluster

has been speeding toward us. The method of measuring the distances and diameters of the globular tar clusters was developed by Dr. Harlow Shapley, formerly of the tor of the Harvard College observatory. Dr. Shapley has made a detailed study of practically all of the known globular clusters, about 70 in number. The results of his investigations enormous distances from the earth. Even the nearest, Omega Centauri, is more than 22,000 light years away and many of the clusters are nearly as distant as N. G. C. 7006.

Measurements of the distances of the globular clusters are obtained through a determination of the apparthat exist in all of the clusters. The brightness of the giant red and giant white variable stars is very accurately known. So, when the apparent brightness of these stars has been found, the distance of the cluster they are in is obtained from a very simple relationship connecting the apparent brightness and the absolute magnitude or intrinsic brightness. In fact, now that the method has been perfected, there is less labor entailed in determining the distance of a globular star cluster many thousand light years away than in finding the distance of the nearest stars by the trigonometric method of direct measurement, and the results are proportionately more accurate It has been estimated that the errors in the values given for the distances of the globular clusters do not exceed one fifth of the measured

All of the globular clusters consist of thousands of suns, many of which are several hundred times more brilliant than our own sun. Indeed a star no brighter than the sun would be entirely invisible if located in one of these clusters. The diameters of some of the globular clusters are so great that light would take several hundred years to cross them.

In the most powerful telescope N. G. C. 7006 appears visually as a nebulous star, but a seven-minute exposure on a fast photographic plate has shown about 200 stars in this cluster that are well within the limit of visibility of the greatest telescopes .--Kansas City Star.

Latest model Halliwell Gas-Electric Hair Dryer. Heaviest head of hair dried in ten minutes. MRS. J. L. COURTNEY, 2 Prescott Street. 'Phone 1559. -may17,tf

NOTICE.

Four weeks after date hereof appli-cation will be made to His Excellency the Governor in Council for Letters Patent for "New and Useful Improve-ments in Electron Discharge Devices" keeper of New York, in the United States of America, Engineer.
Dated at St. John's, this 17th day
