This Built-in Quality Means Lower Cost of Operation

The fast-increasing number of new good Maxwell cars on the streets is causing widespread comment. It is a perfectly logical happening, for no other car delivers the Maxwell combination of 58 miles an hour, 5 to 25 miles in 8 seconds, and 25 miles to a gallon of gasoline.

But there are still greater satisfactions for the Maxwell owner. The car is completely manufactured within its own great plants. This is an advantage of genuine importance to the buyer. In no other way could you be assured of the quality that distinguishes the new good Maxwell from all other cars.

It is this high quality that accounts very largely for the dependable nature of Maxwell performance, the car's durability and, above all, costs of operation and maintenance so low as to create a new standard of economy.

We are always eager to demonstrate the new good Maxwell, for a ride in the car proves at once that it offers more fine motoring than was ever before available at the price.
